CENTRAL STAFF TRAINING AND RESEARCH INSTITUTE

EN-81, Sector-V, Salt Lake City,

Kolkata – 700 091

ACKNOWLEDGEMENT

The DGT sincerely acknowledges contributions of the Industries, State Directorates, Trade Experts, Domain Experts and all others who contributed in revising the curriculum. Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

List of Expert Members participated for finalizing the course curriculum of Electronics Mechanic trade on 13.01.2017 at CSTARI, Kolkata

S No.	Name & Designation Shri/Mr./Ms.	Organization	Remarks
1.	DEEPANKAR MALLICK, DDG (Trg.)	DGT, MSDE, New Delhi	Chairman
2.	H. V. SAMVATSAR, Director	CSTARI, Kolkata	Member
3.	SANJAY KUMAR Joint Director of Trg.	CSTARI, Kolkata	Member
4.	L. K. MUKHERJEE Dy. Director of Trg.	CSTARI, Kolkata	Member
5.	R. N. BADYOPADHYAYA Chairman	Board of Studies & Skill, WBSCT&VE&SD	Member
6.	P. K. BISWAS Sr. DGM	BHEL – PSER, Salt Lake, Sec – II	Member
7.	P. C. BHANDARI Technical Advisor	J K Cement Ltd. Kanpur	Member
8.	AMALENDU JANA Manager	TATA Communication Pvt. Ltd. Ultadanga, Kolkata	Member
9.	VIVEK KR. SINGH SC-D & DDO	SAMEER Kolkata Centre Plot – L2, Block –GP, Sec-V, Kolkata-91	Member
10.	K. RAVIKUMAR DGM	AAI, NetajiSubhash Chandra Bose International Airport	Member
11.	K. C. DUTTA Sr. Superintendent	AAI, NetajiSubhash Chandra Bose International Airport	Member
12.	SUMANTA MODAK, General Manager (Works)	EVEREADY Industries Pvt. Ltd. (Representative of CII)	Member
13.	D. W. PATNE, Secretary/Principal	Association of Non Govt. ITI, Maharastra	Member
14.	UPENDRA KUMAR MALLICK Dy. Director	DTE&T, Odisha	Member
15.	R. K. JHA Dy. Director of Trg.	FTI, Jamshedpur	Member
16.	N. R. PATTANAIK	Govt. ITI Balasore, Odisha	Member

	Principal		
17.	VIVEK CHAUDHARI Principal	Ujjwal ITI Nashirabad, Dist- Jalgaon, Maharashtra	Member
18.	Fr. JOSE PADAMATTAM Principal	Don Bosco Technical Institute, Park Circus	Member
19.	NIRMALYA NATH Asst. Director of Trg.	CSTARI, Kolkata	Member
20.	Brindaban Das Asst. Director of Trg.	CSTARI, Kolkata	Member
21.	RANADIP MITRA Manager (HRD)	GRSE Ltd., Kolkata	Member
22.	JOYDEEP PAL MAJUMDER Asst. Work Manager	Rifle Factory, Ishapore, Ministry of Defence, Govt. India, WB	Member
23.	PRABHAT SAMIR PAL Jr. Manager	GRSE Ltd., Kolkata	Member
24.	SATYABADI SATAPATHY Training Officer	HAL – Koraput Division, Koraput, Odisha	Member
25.	P. K. BAIRAGI Training Officer	CSTARI, Kolkata	Member
26.	B. K. NIGAM Training Officer	CSTARI, Kolkata	Member
27.	RUPA MALLIK Instructor	Govt. ITI Gariahat, Kolkata – 19	Member
28.	DEBLINA ROY Instructor	Don Bosco Technical Institute, Park Circus	Member
29.	H. B. KOSHTI, Craft Instructor	Govt. ITI Byculla, Mumbai - 400011	Member

Skill India

कौशल भारत - कुशल भारत

1. COURSE INFORMATION

During the two-year duration of Electronics Mechanic trade a candidate is trained on professional skill, professional knowledge, Engineering Drawing, Workshop Calculation & Science and Employability skill. In addition to this a candidate is entrusted to undertake project work and extracurricular activities to build up confidence. The Broad components covered professional skill, subjects are as below:-

1st Year – In this year the trainee learns about safety and environment, use of fire extinguishers, artificial respiratory resuscitation to begin with. He gets the idea of trade tools & its standardization, Familiarize with basics of electricity, test the cable and measure the electrical parameter. Skilling practice on different types & combination of cells for operation and maintenance of batteries being done. Identify and test passive and active electronic components. Construct and test unregulated and regulated power supplies. Practice soldering and de-soldering of various types of electrical and electronic components on through hole PCBs. Assemble a computer system, install OS, Practice with MS office. Use the internet, browse, create mail IDs, download desired data from internet using search engines. The candidate will be able to construct and test amplifier, oscillator and wave shaping circuits. Testing of power electronic components. Construct and test power control circuits. Identify and test opto electronic devices. Able to achieve the skill on SMD Soldering and De-soldering of discrete SMD components. Verifying the truth tables of various digital ICs by referring Data book. Practice circuit simulation software to simulate and test various circuits. Identify various types of LEDs, LED displays and interface them to a digital counter and test. Construct and test various circuits using linear ICs 741 & 555.

2nd Year – In this year the trainee will be able to operate DSO and perform various functions. Gaining the skill by practicing SMD Soldering and De-soldering of various types of IC Packages. Able to identify the defects and do rework of PCB. Construct and test simple electrical control circuits and various electrical protective devices. Identify, prepare, terminate and test various types of electronic cables used in various electronic systems. Identify various functional blocks and I/O Ports of a 8051 microcontroller system, Familiarize with the instruction set of 8051 micro controller. Interface a model application with the Microcontroller kit and run the application. Construct and test various modulation/demodulation circuits. The trainee will identify and test various types of sensors used in electronic industries and construct and test circuits using various sensors system. They can construct and test analog and digital IC based application circuits as a part of project work. The trainee will work with DPM Modules to measure various electrical parameter, Also interface the LCD modules to display a word. They will also skilled with various modulation techniques to acquaint with fibre optic communication techniques by using trainer kit. Identify various functional blocks/major components/ICs in the given stabilizer, rectify the faults. Identify various Input and output sockets/connectors of the given SMPS and UPS. Install and troubleshoot the given solar panel system. Dismantle and assemble various types of cell / smart phones and trouble shoot the cell/smart phone. Dismantle and assemble the given LED light stack. Design a LED light for the given ratings. Assemble decorative lighting system (serial lights) using LED strips. Dismantle, assemble, trouble shoot and rectify LED and LCD TV sets.

2.1 GENERAL

Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under aegis of National Council of Vocational Training (NCVT). Craftsman Training Scheme (CTS) and Apprenticeship Training Scheme (ATS) are two pioneer programmes of NCVT for propagating vocational training.

Electronics Mechanic trade under CTS is one of the most popular courses delivered nationwide through network of ITIs. The course is of two years duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory & Practical) impart professional skills and knowledge, while Core area (Workshop Calculation and science, Engineering Drawing and Employability Skills) impart requisite core skill & knowledge and life skills. After passing out the training program, the trainee is awarded National Trade Certificate (NTC) by NCVT which is recognized worldwide.

Candidates need broadly to demonstrate that they are able to:

- Read & interpret technical parameters/documentation, plan and organize work processes, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional knowledge, core skills & employability skills while performing the job and repair & maintenance work.
- Check the job with circuit diagrams/components as per drawing for functioning, diagnose and rectify faults in the electronics components/module.
- Document the technical parameters in tabulation sheet related to the task undertaken.

2.2 CAREER PROGRESSION PATHWAYS:

- Can appear in 10+2 examination through National Institute of Open Schooling (NIOS) for acquiring higher secondary certificate and can go further for General/ Technical education.
- Can take admission in diploma course in notified branches of Engineering by lateral entry.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).
- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming instructor in ITIs.

2.3 COURSE STRUCTURE:

Table below depicts the distribution of training hours across various course elements during a period of two years: -

S No.	Course Element	Notional Training Hours
1	Professional Skill (Trade Practical)	2184
2	Professional Knowledge (Trade Theory)	504
3	Workshop Calculation & Science	168
4	Engineering Drawing	252
5	Employability Skills	110
6	Library & Extracurricular activities	142
7	Project work	320
8	Revision & Examination	480
	Total	4160

2.4 ASSESSMENT & CERTIFICATION:

The trainee will be tested for his skill, knowledge and attitude during the period of course and at the end of the training programme as notified by Govt of India from time to time. The Employability skills will be covered and tested in the first year itself.

a) The **Internal assessment** during the period of training will be done by **Formative assessment method** by testing for assessment criteria listed against learning outcomes. The training institute have to maintain individual *trainee portfolio* as detailed in assessment guideline. The marks of internal assessment will be as per the template (Annexure – II).

b) The final assessment will be in the form of summative assessment method. The All India trade Test for awarding NTC will be conducted by NCVT as per guideline of Govt of India. The pattern and marking structure is being notified by govt of India from time to time. **The learning outcome and assessment criteria will be basis for setting question papers for final assessment. The examiner during final examination will also check** individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Practical is 60% & minimum pass percent for Theory subjects is 33%.

2.4.2 ASSESSMENT GUIDELINE:

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking assessment.

Due consideration to be given while assessing for team work, avoidance/reduction of scrap/wastage and disposal of scarp/wastage as per procedure, behavioral attitude, sensitive to environment and regularity in training. The sensitivity towards OSHE and self-learning attitude to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidence of internal assessment to be preserved until forthcoming examination for audit and verification by examination body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60 -75% to be allotted during assessment	
For performance in this grade, the candidate with occasional guidance and showing due regard for safety procedures and practices, has produced work which demonstrates attainment of an acceptable standard of craftsmanship.	<ul style="list-style-type: none"> • Demonstration of good skill in the use of hand tools, machine tools and workshop equipment • 60-70% accuracy achieved while undertaking different work with those demanded by the component/job. • A fairly good level of neatness and consistency in the finish • Occasional support in completing the project/job.
(b) Weightage in the range of above 75% - 90% to be allotted during assessment	
For this grade, the candidate, with little guidance and showing due regard for safety procedures and practices, has produced work which demonstrates attainment of a reasonable standard of craftsmanship.	<ul style="list-style-type: none"> • Good skill levels in the use of hand tools, machine tools and workshop equipment • 70-80% accuracy achieved while undertaking different work with those demanded by the component/job. • A good level of neatness and consistency in the finish • Little support in completing the project/job

(c) Weightage in the range of above 90% to be allotted during assessment

For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.

- High skill levels in the use of hand tools, machine tools and workshop equipment
- Above 80% accuracy achieved while undertaking different work with those demanded by the component/job.
- A high level of neatness and consistency in the finish.
- Minimal or no support in completing the project.

Skill India

कौशल भारत - कुशल भारत

Brief description of job roles:

Electronics Fitter, General; fits, assembles and repairs various kinds of electronic equipment in factory or workshop or at place of use. Examines drawings and wiring diagrams; checks parts for accuracy of fit and minor adjustments; assembles parts or mounts them on chassis or panels with aid of hand tools; installs and connects wiring, soldering joints equipment, diagnoses faults with aid of electronic testing equipment; dismantles equipment if required and replaces faulty parts or wiring.

Electronics Fitter, other; include all other workers engaged in fitting, assembling, repairing and maintaining electronic equipment, machinery, appliances, etc., not elsewhere classified.

Electronics Mechanic; Electronic Equipment Mechanic repairs electronic equipment, such as computers, industrial controls, transmitters, and telemetering control systems following blueprints and manufacturer's specifications and using hand tools and test instruments. Tests faulty equipment and applies knowledge of functional operation of electronic units and systems to diagnose cause of malfunction. Tests electronic components and circuits to locate defects, using instruments, such as oscilloscopes, signal generators, ammeters and voltmeters. Replaces defective components and wiring and adjusts mechanical parts, using hand tools and soldering iron. Aligns, adjusts and calibrates testing instruments. Maintains records of repairs, calibrations and test.

Radio Technician (Radio Manufacturing); tests assembled radio sets with testing equipment to ensure that assembly soldering, frequency, performance, etc. are in accordance with prescribed standards. Places assembled radio set in position and visually examines it to ensure that position of components, connections, soldering, wiring, etc. are in order. Switches on and operates different knobs to check calibration, audibility and general performance of set by varying its tone and listening to various stations and frequencies. Tightens loose nuts and screws, locates faults, replaces defective components and conducts necessary changes. Approves correctly assembled sets for further processing and rejects defective ones for rectification. May tests sets at different stages of assembly. May service, repair and overhaul radio sets.

Solar Panel Installation Technician; is also known as 'Panel Installer', the Solar Panel Installation Technician is responsible for installing solar panels at the customers' premises. The individual at work checks the installation site, understands the layout requirement as per design, assesses precautionary measures to be taken, installs the solar panel as per customer's requirement and ensures effective functioning of the system post installation.

Optical fibre technician; is responsible for maintaining uptime and quality of the network segment (both optical media and equipment) assigned to him by undertaking periodic preventive maintenance activities and ensuring effective fault management in case of fault occurrence. He is also required to coordinate activities for installation and commissioning of Optical Fibre Cable (OF) as per the route plan.

Field Technician: UPS and Inverter; is also called, 'UPS repair Technician', this is an after sales service job for installing and providing support to customers of different types of UPS and inverters. The individual at work installs the newly purchased UPS or inverter. The individual also and interacts with customers to diagnose problems in them, assesses possible causes, rectifies faults or replaces faulty modules or recommends factory repairs for bigger faults as per the route plan. Installation, service, repair and overhaul radio sets service centre. May install television sets.

Television Installation Man; installs and adjusts television receivers and antennas, using hand tools. Selects antenna according to type of set and location of transmitting station. Bolts cross arms and dipole elements in position to assemble antenna. Secures antenna in place with bracket and guy wires, observing insurance codes and local ordinances to protect installation from lightning and other hazards. Drills and waterproofs holes in building to make passage for transmission line. Connects line between receiver and antenna and fastens it in place. Tunes receiver on all channels and adjusts screws to obtain desired density, linearity, focus and size of picture. Orients antenna and installs reflector to obtain strongest possible reception.

Cable Television Installer; installs cable television cables and equipment on customer's premises, using electrician's tools and test equipment: Measures television signal strength at utility pole, using electronic test equipment. Computes impedance of wire from pole to house to determine additional resistance needed for reducing signal to desired level. Installs terminal boxes and strings lead-in wires, using electrician's tools. Connects television set to cable system and evaluates incoming signal. Adjusts and repairs cable system to ensure optimum reception. May collect installation fees and explain cable service operation to subscriber. May clean and maintain tools, test equipment.

Television Service and Repairman; repairs and adjusts radios and television receivers, using hand tools and electronic testing instruments. Tunes receiver on all channels and observes audio and video characteristics to locate source of trouble. Adjusts controls to obtain desired density, linearity, focus and size of picture. Examines chassis for defects. Tests voltages and resistance of circuits to isolate defect following schematic diagram and using voltmeter, oscilloscope, signal generator and other electronic testing instruments. Tests and changes tubes, solders loose connections and repairs or replaces defective parts, using hand tools and soldering iron. Repair radios and other audio equipment.

Television Repair Technician; job role is applicable to both Television manufacturing facilities as well as electronics service centers. This role pertains to rectify faults identified during testing of TV on in manufacturing process and providing after sales assistance and ensuring appropriate functioning of television sets. A TV repair technician identifies the section in the TV that is not functioning. If the problem identified is in the Printed Circuit Board (PCB), the technician identifies the specific fault in the PCB and corrects it. Replaces the dysfunctional PCB with a new one, if the damage identified requires fixing at the service centre.

Plan and organize assigned work and detect & resolve issues during execution. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

Skill India

कौशल भारत - कुशल भारत

4. NSQF LEVEL COMPLIANCE

NSQF level for **Electronics Mechanic** trade under CTS: **Level 5**

As per notification issued by Govt. of India dated- 27.12.2013 on National Skill Qualification Framework total 10 (Ten) Levels are defined.

Each level of the NSQF is associated with a set of descriptors made up of five outcome statements, which describe in general terms, the minimum knowledge, skills and attributes that a learner needs to acquire in order to be certified for that level.

Each level of the NSQF is described by a statement of learning outcomes in five domains, known as level descriptors. These five domains are:

- a. Process
- b. professional knowledge
- c. professional skill
- d. core skill
- e. Responsibility

The Broad Learning outcome of **Electronics Mechanic** trade under CTS mostly matches with the Level descriptor at Level- 5.

The NSQF level-5 descriptor is given below:

Level	Process required	Professional knowledge	Professional skill	Core skill	Responsibility
Level 5	Job that requires well developed skill, with clear choice of procedures in familiar context.	knowledge of facts, principles, processes and general concepts, in a field of work or study	a range of cognitive and practical skills required to accomplish tasks and solve problem by selecting and applying basic methods, tools, materials and information.	Desired mathematical skill, understanding of social, political and some skill of collecting and organizing information, communication.	Responsibility for own work and Learning and some responsibility for other's works and learning.

5. GENERAL INFORMATION

Name of the Trade	ELECTRONICS MECHANIC
NCO - 2015	7421.0100, 7421.0300, 7422.1100, 7422.1200. 7422.1300, 7422.1302, 7422.1400, 7421.1401, 7422.0801, 7421.0801
NSQF Level	Level-5
Duration of Craftsmen Training	Two Years
Entry Qualification	Passed 10 th class examination
Unit Strength (No. Of Student)	24
Space Norms	56 Sq. m
Power Norms	3.04 KW
Instructors Qualification for	
1. Electronics Mechanic Trade	<p>Degree in Electronics / Electronics and Telecommunication/ Electronics and communication Engineering from recognized Engineering College/ university with one year experience in the relevant field</p> <p style="text-align: center;">OR</p> <p>Diploma in Electronics / Electronics and telecommunication/ Electronics and communication from recognized board of technical education with two years experience in the relevant field</p> <p style="text-align: center;">OR</p> <p>10th class examination and NTC/NAC in the Trade With 3 years' post qualification experience in the relevant field.</p> <p><u>Essential Qualification:</u> Craft Instructor Certificate in relevant trade under NCVT.</p> <p><i>Out of two Instructors required for the unit of 2(1+1), one must have Degree/Diploma and other must have NTC/NAC qualifications.</i></p>

6. LEARNING OUTCOME

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

6.1 GENERIC LEARNING OUTCOME

1. Apply safe working practices.
2. Comply with environment regulation and housekeeping.
3. Interpret & use company and technical communication
4. Demonstrate basic mathematical concept and principles to perform practical operations.
5. Understand and explain basic science in the field of study including simple machine.
6. Read and apply engineering drawing for different application in the field of work.
7. Understand and apply the concept in productivity, quality tools, and labour welfare legislation in day to day work to improve productivity & quality.
8. Explain energy conservation, global warming and pollution and contribute in day to day work by optimally using available resources.
9. Explain personnel finance, entrepreneurship and manage/organize related task in day to day work for personal & societal growth.
10. Utilize basic computer applications and internet to take benefit of IT developments in the industry.

6.2 SPECIFIC LEARNING OUTCOME

FIRST YEAR

11. Perform basic workshop operations using suitable tools for fitting, riveting, drilling etc observing suitable care & safety.
12. Select and perform electrical/electronic measurement of single range meters and calibrate the instrument.
13. Test & service different batteries used in electronic applications and record the data to estimate repair cost.
14. Plan and execute soldering & de-soldering of various electrical components like Switches, PCB& Transformers for electronic circuits.
15. Test various electronic components using proper measuring instruments and compare the data using standard parameter.
16. Assemble simple electronic power supply circuit and test for functioning.
17. Install, Configure, interconnect given computer system(s) and demonstrate & utilize application packages for different application.
18. Construct, test and verify the input/output characteristic of various analog circuits.

19. Plan and construct different power electronic circuits and analyse the circuit functioning.
20. Select the appropriate opto electronics components and verify the characteristics in different circuit.
21. Assemble, test and troubleshoot various digital circuits.
22. Simulate and analyze the analog and digital circuits using Electronic simulator software
23. Identify , place, solder and desolder and test different SMD discrete components and IC's package with due care and following safety norms using proper tools/setup
24. Construct and test different circuits using ICs 741 Operational amplifiers & ICs 555 linear integrated circuits and execute the result.

SECOND YEAR

25. Measure the various parameters by DSO and execute the result with standard one.
26. Rework on PCB after identifying defects from SMD soldering and de-soldering.
27. Construct different electrical control circuits and test for their proper functioning with due care and safety.
28. Prepare, crimp, terminate and test various cables used in different electronics industries.
29. Assemble and test a commercial AM /FM receiver and evaluate performance.
30. Test, service and troubleshoot the various components of different domestic/ industrial programmable systems.
31. Execute the operation of different process sensors, identify, wire & test various sensors of different industrial processes by selecting appropriate test instruments
32. Plan and carry out the selection of a project, assemble the project and evaluate performance for a domestic/commercial applications.
33. Prepare fibre optic setup and execute transmission and reception.
34. Plan and Interface the LCD, LED DPM panels to various circuits and evaluate performance.
35. Detect the faults and troubleshoot SMPS, UPS and inverter.
36. Install a solar panel, execute testing and evaluate performance by connecting the panel to the inverter.
37. Dismantle, identify the various parts and interface of a cell phone to a PC. Estimate and troubleshoot.
38. Check the various parts of a LED lights and stacks and troubleshoot
39. Identify, operate various controls, troubleshoot and replace modules of the LCD/LED TV & its remote.

7. LEARNING OUTCOME WITH ASSESSMENT CRITERIA

GENERIC LEARNING OUTCOME	
LEARNING OUTCOME	ASSESSMENT CRITERIA
1. Apply safe working practices	1.1 Follow and maintain procedures to achieve a safe working environment in line with occupational health and safety regulations and requirements and according to site policy.
	1.2 Recognize and report all unsafe situations according to site policy.
	1.3 Identify and take necessary precautions on fire and safety hazards and report according to site policy and procedures.
	1.4 Identify, handle and store / dispose off dangerous goods and substances according to site policy and procedures following safety regulations and requirements.
	1.5 Identify and observe site policies and procedures in regard to illness or accident.
	1.6 Identify safety alarms accurately.
	1.7 Report supervisor/ Competent of authority in the event of accident or sickness of any staff and record accident details correctly according to site accident/injury procedures.
	1.8 Identify and observe site evacuation procedures according to site policy.
	1.9 Identify Personal Protective Equipment (PPE) and use the same as per related working environment.
	1.10 Identify basic first aid and use them under different circumstances.
	1.11 Identify different fire extinguisher and use the same as per requirement.
2. Comply with environment regulation and housekeeping	2.1 Identify environmental pollution & contribute to the avoidance of instances of environmental pollution.
	2.2 Deploy environmental protection legislation & regulations
	2.3 Take opportunities to use energy and materials in an environmentally friendly manner
	2.4 Avoid waste and dispose waste as per procedure
	2.5 Recognize different components of 5S and apply the same in the working environment.
3. Interpret & use company and technical communication	3.1 Obtain sources of information and recognize information.
	3.2 Use and draw up technical drawings and documents.
	3.3 Use documents and technical regulations and occupationally related provisions.

	3.4	Conduct appropriate and target oriented discussions with higher authority and within the team.
	3.5	Present facts and circumstances, possible solutions & use English special terminology.
	3.6	Resolve disputes within the team
	3.7	Conduct written communication.
<hr/>		
4. Demonstrate basic mathematical concept and principles to perform practical operations.	4.1	Yearly examination to test basic skills on arithmetic, algebra, trigonometry and statistics.
	4.2	Applications will be assessed during execution of assessable outcome and will also be tested during theory and practical examination.
<hr/>		
5. Understand and explain basic science in the field of study including simple machine.	5.1	Yearly examination to test basic skills on science in the field of study including friction, heat, temperature and simple machine.
	5.2	Applications will be assessed during execution of assessable outcome and will also be tested during theory and practical examination.
<hr/>		
6. Read and apply engineering drawing for different application in the field of work.	6.1	Yearly examination to test basic skills on engineering drawing.
	6.2	Applications will be assessed during execution of assessable outcome and will also be tested during theory and practical examination.
<hr/>		
7. Understand and apply the concept in productivity, quality tools, and labour welfare legislation in day to day work to improve productivity & quality.	7.1	Yearly examination to test the concept in productivity, quality tools and labour welfare legislation.
	7.2	Applications will be assessed during execution of assessable outcome.
<hr/>		
8. Explain energy conservation, global warming and pollution and contribute in day to day work by optimally using available resources.	8.1	Yearly examination to test knowledge on energy conservation, global warming and pollution.
	8.2	Their applications will be assessed during execution of assessable outcome.

9. Explain personnel finance, entrepreneurship and manage/organize related task in day to day work for personal & societal growth.	9.1 Yearlyexamination to test knowledge on personnel finance, entrepreneurship.
	9.2 Their applications will be assessed during execution of assessable outcome.
10. Utilize basic computer applications and internet to take benefit of IT developments in the industry.	10.1 Yearlyexamination to test knowledge on basic computer working, basic operating system and uses internet services.
	10.2 Their applications will be assessed during execution of assessable outcome.

Skill India

कौशल भारत - कुशल भारत

SPECIFIC LEARNING OUTCOME	
LEARNING OUTCOME	ASSESSMENT CRITERIA
FIRST YEAR	
11. Perform basic workshop operations using suitable tools for fitting, riveting, drilling etc observing suitable care & safety	11.1 Identify basic hand tools for fitting, riveting, drilling etc. with due care and safety.
	11.2 Fix surface mounting type of accessories in a panel board.
	11.3 Connect electrical accessories.
	11.4 Make and Wire up of a test board and test it.
12. Select and perform electrical/ electronic measurement of single range meters and calibrate the instrument.	12.1 Plan work in compliance with standard safety norms.
	12.2 Identify the type of electronic instruments.
	12.3 Determine the measurement errors while measuring resistance by voltage drop method.
	12.4 Extend the range of MC voltmeter and ammeter.
	12.5 Measure the value of resistance, voltage and current using digital multimeter.
	12.6 Calibrate analog multimeter.
13. Test & service different batteries used in electronic applications and record the data to estimate repair cost.	13.1 Identify Tools and instruments for testing of batteries.
	13.2 Observe safety procedure during testing of batteries and work as per standard norms and company guidelines
	13.3 Identify the primary and secondary cells.
	13.4 Measure and test the voltages of the given cells/battery using analog / digital multimeter.
	13.5 Charging and discharging the battery.
	13.6 Maintain and estimate the repair cost of secondary battery.
	13.7 Use a hydro meter to measure the specific gravity of these secondary battery.
14. Plan and execute soldering & de-soldering of various electrical components like Switches, PCB & Transformers for electronic circuits.	14.1 Plan work in compliance with standard safety norms.
	14.2 Identify different types of mains transformers and test.
	14.3 Identify the primary and secondary transformer windings and test the polarity.
	14.4 Measure the primary and secondary voltage of different transformers.
	14.5 Solder the given components
	14.6 Identify and test the variac.

	14.7 Avoid waste, ascertain unused materials and components for disposal, store these in an environmentally appropriate manner and prepare for disposal.
15. Test various electronic components using proper measuring instruments and compare the data using standard parameter.	15.1 Ascertain and select tools and materials for the job and make this available for use in a timely manner.
	15.2 Plan work in compliance with standard safety norms.
	15.3 Identify the different types of resistors.
	15.4 Measure the resistor values using colour code and verify the reading by measuring in multi meter.
	15.5 Identify the power rating using size.
	15.6 Measure the resistance, Voltage, Current through series and parallel connected networks using multi meter.
	15.7 Identify different inductors and measure the values using LCR meter.
	15.8 Identify the different capacitors and measure capacitance of various capacitors using LCR meter.
	15.9 Ascertain and select tools and materials for the job and make this available for use in.
16. Assemble simple electronic power supply circuit and test for functioning.	16.1 Practice soldering on components, lug and board with safety.
	16.2 Identify the passive /active components by visual appearance, Code number and test for their condition.
	16.3 Identify the control and functional switches in CRO and measure the D.C. & A.C. voltage, frequency and time period.
	16.4 Construct and test a half & full wave rectifiers with and without filter circuits.
	16.5 Construct and test a bridge rectifier with and without filter circuits.
	16.6 Construct and test a Zener based voltage regulator circuit.
17. Install, configure, interconnect given computer system(s) and demonstrate & utilize application packages for different application.	17.1 Plan, work in compliance with standard safety norms.
	17.2 Select hardware and software component.
	17.3 Install and configure operating systems and applications.
	17.4 Integrate IT systems into networks.
	17.5 Deploy tools and test programmes.

	17.6 Avoid e-waste and dispose the waste as per the procedure.
18. Construct, test and verify the input/ output characteristics of various analog circuits.	<p>18.1 Ascertain and select tools and instruments for carrying out the jobs.</p> <p>18.2 Plan and work in compliance with standard safety norms.</p> <p>18.3 Practice on soldering components on lug board with safety.</p> <p>18.4 Identify the passive /active components by visual appearance, Code number and test for their condition.</p> <p>18.5 Construct and test the transistor based switching circuit</p> <p>18.6 Construct and test CB,CE & CC amplifier circuit</p> <p>18.7 Ascertain the performance of different oscillator circuits.</p> <p>18.8 Construct and test Clipper, Clamper and Schmitt trigger circuit.</p>
19. Plan and construct different power electronic circuits and analyse the circuit functioning.	<p>19.1 Construct and test of Transistor and JFET amplifiers, oscillators and multi vibrators.</p> <p>19.2 Construct and test a UJT as relaxation oscillator.</p> <p>19.3 Construct and test lamp dimmer using TRIAC/DIAC with safety.</p> <p>19.4 Construct and test MOSFET, IGBT test circuit and apply for suitable operation with proper safety.</p> <p>19.5 Construct and test the universal motor speed controller using SCR with safety.</p> <p>19.6 Construct and test a switching circuits using optical devices.</p>
20. Select the appropriate opto electronics components and verify the characteristics in different circuit.	<p>20.1 Plan work in compliance with standard safety norms.</p> <p>20.2 Identify the different types of LEDs and IR LEDs.</p> <p>20.3 Measure the resistance, voltage, current through electronic circuit using multimeter.</p> <p>20.4 Construct and test a circuit using photo transistor and verify its characteristics.</p> <p>20.5 Identify photo coupler/ optical sensor input/output terminals and measure the quantum of isolation between the terminals.</p>
21. Assemble, test and troubleshoot various digital circuits.	<p>21.1 Illustrate to practice the digital trainer kit with safety.</p> <p>21.2 Identify various digital ICs, test IC using digital IC tester and verify the truth table.</p> <p>21.3 Construct and verify the truth table of all gates using NOR and NAND gates.</p>

	21.4 Construct an adder cum subtractor circuits and verify the truth table.
	21.5 Construct a decoder and encoder, multiplexer and de-multiplexer circuits and verify the truth table.
	21.6 Construct a multiplexer and de-multiplexer and verify the truth table.
	21.7 Construct and verify the truth table of various flip flop, counter and shift register circuits.
22. Simulate and analyze the analog and digital circuits using Electronic simulator software.	22.1 Plan the work in compliance with standard procedure.
	22.2 Prepare simple analog and digital electronic circuits using the simulator software.
	22.3 Simulate and test the prepared analog and digital circuits.
	22.4 Convert the prepared circuit into layout diagram.
	22.5 Explore various trouble shooting and fault finding the resources provided in the simulation software
23. Identify, place, solder and desolder and test different SMD discrete components and ICs package with due care and following safety norms using proper tools/setup.	23.1 Identify the various crimping tools for various IC packages.
	23.2 Identify different types of soldering guns and choose the suitable tip for the application.
	23.3 Practice the soldering and de-soldering the different active and passive components, IC base on GPCBs using solder, flux, pump and wick.
	23.4 Make the necessary setting on SMD soldering station to solder and de-solder various IC's of different packages by following the safety norms.
	23.5 Identify SMD components, de-solder and solder the SMD components on the PCB.
	23.6 Check the cold continuity, identify loose/dry solder and broken track on printed wired assemblies and rectify the defects.
	23.7 Avoid waste, ascertain unused materials and components for safe disposal.
24. Construct and test different circuits using ICs 741 operational amplifiers & ICs 555 linear integrated circuits and execute the result.	24.1 Demonstrate analog trainer kit with safety precautions.
	24.2 Identify various ICs, differentiate by code No. and test for their condition.
	24.3 Construct and test various OPAMP circuits.
	24.4 Construct and test R-2R ladder type digital to analog converter circuit.
	24.5 Construct and test different configurations of 555 IC e.g. astable, monostable, bi-astable and VCO circuits.

SECOND YEAR	
25. Measure the various parameters by DSO and execute the result with standard one.	25.1 Identify and demonstrate various control elements on front panel of a DSO.
	25.2 Measure different parameters of electronic signals using DSO.
	25.3 Store the waveform of a signal in DSO.
	25.4 Connect DSO with a printer and take printout of signal waveforms.
26. Rework on PCB after identifying defects from SMD soldering and de-soldering.	26.1 Plan the work in compliance with standard safety procedures.
	26.2 Demonstrate various tools and accessories used in PCB rework.
	26.3 Construct a PCB to demonstrate defects on soldered joints.
	26.4 Repair defective soldered joints.
27. Construct different electrical control circuits and test for their proper functioning with due care and safety.	27.1 Measure the coil winding of the given motor.
	27.2 Prepare the setup and control an induction motor using a DOL starter by following the safety norms.
	27.3 Construct a direction control circuit to change direction of an induction motor.
	27.4 Connect an overload relay and test for its proper functioning.
28. Prepare, crimp, terminate and test various cables used in different electronics industries.	28.1 Plan and work in compliance with standard safety norms.
	28.2 Prepare, terminate and test various electronics cable using proper crimping tools.
29. Assemble and test a commercial AM/ FM receiver and evaluate performance.	29.1 Plan and select tools to assemble the receiver.
	29.2 Modulate and Demodulate various signals using AM and FM on the trainer kit and observe waveforms.
	29.3 Construct and test IC based AM Receiver.
	29.4 Construct and test IC based FM transmitter and receiver.
	29.5 Modulate and Demodulate a signal using PAM,PPM,PWM Techniques.
	29.6 Troubleshoot and replace the faulty components.
	29.7 Check the functionality of AM/FM receiver.
30. Test, service and troubleshoot the various	30.1 Understand and interpret the procedure as per manual of Micro controller.

components of different domestic/ industrial programmable systems.	30.2 Identify various ICs & their functions on the given Microcontroller Kit.
	30.3 Identify the address range of RAM & ROM.
	30.4 Write data into RAM & observe its volatility.
	30.5 Identify the port pins of the controller & configure the ports for Input & Output operation.
	30.6 Demonstrate entering of simple programs, execute & monitor the results.
31. Execute the operation of different process sensors, identify, wire & test various sensors of different industrial processes by selecting appropriate test instruments.	31.1 Ascertain and select tools, material for the job and make this available for use in the timely manner.
	31.2 Plan work in compliance with safety norms.
	31.3 Demonstrate possible solution and agree task within the team.
	31.4 Identify sensors used in process industries such as RTDs, Temperature ICs, Thermocouples, proximity switches (inductive, capacitive and photo electric), load cells, strain gauge. LVDT by their appearance.
	31.5 Measure temperature of a lit fire using a Thermocouple and record the readings referring to data chart.
	31.6 Measure temperature of a lit fire using RTD and record the readings referring to data chart.
	31.7 Measure the DC voltage of a LVDT.
	31.8 Detect different objectives using capacitive, inductive and photoelectric proximity sensors.
32. Plan and carry out the Selection of a project, assemble the project and evaluate performance for a domestic/commercial applications.	32.1 Plan, analyze and estimate the cost of the particular project.
	32.2 Identify the various tools required for the job.
	32.3 Prepare the simple digital/ analog electronic circuit.
	32.4 Simulate and test the prepared circuit.
	32.5 Assemble and test the circuit.
33. Prepare fibre optic setup and execute transmission and reception.	33.1 Plan and select appropriate tools to complete the job safely.
	33.2 Identify the resources and their need on the given fiber optic trainer kit.
	33.3 Make optical fibre setup to transmit and receive analog and digital data.
	33.4 Demonstrate and apply FM modulation and demodulation using OFC trainer kit using audio signal and voice link.

	33.5 Demonstrate PWM modulation and demodulation using OFC trainer kit using audio signal and voice link.
	33.6 Demonstrate PPM modulation and demodulation using OFC trainer kit using audio signal and voice link.
34. Plan and Interface the LCD, LED, DPM panels to various circuits and evaluate performance.	34.1 Identify LCD/LED Display module and its decoder/driver ICs and display a word on a two line LCD/LED.
	34.2 Measure/current flowing through a resistor and display it. Measure/current flowing through a sensor and display it on a LCD/LED module (DPM).
	34.3 Avoid waste and dispose the waste as per the procedures.
35. Detect the faults and troubleshoot SMPS, UPS and inverter.	35.1 Identify the tools and equipments to perform the job with due care and safety.
	35.2 Dismantle the given stabilizer and find major sections/ ICs components.
	35.3 Identify various input and output sockets / connectors of the given SMPS.
	35.4 Identify major sections/ ICs/components of SMPS.
	35.5 Identify and replace the faulty components and construct and test IC Based DC-DC converter for different voltages.
	35.6 Identify front panel control & indicators of UPS.
	35.7 Connect Battery & load to UPS & test on battery mode.
	35.8 Open Top cover of UPS & identify isolator transformer & UPS transformer & additional circuit other than inverter.
	35.9 Identify various circuit boards in UPS and monitor voltages at various test points.
	35.10 Test UPS under Fault condition & rectify fault.
36. Install a solar panel, execute testing and evaluate performance by connecting the panel to the inverter.	36.1 Select appropriate tools and equipment.
	36.2 Install a solar panel to a roof.
	36.3 Wire a solar panel to a solar controller.
	36.4 Wire a solar controller to a battery storage station.
	36.5 Connect storage batteries to a power inverter.
	36.6 Wire a power inverter to an electrical service panel.
	36.7 Connect and test solar panel to the Inverter and run the load.
	36.8 Installation of Solar Inverter.
	36.9 Demonstrate the installation with team.
37. Dismantle, identify the various parts and interface of a cell phone to a PC.	37.1 Understand and interpret repair procedure as per manual of cell phone and select appropriate tools & equipment for undertaking job.

Estimate and troubleshoot.	37.2 Plan to repair and assemble the components used as per circuit diagram.
	37.3 Dismantle, identify the parts and assemble different types of smart phones.
	37.4 Interface the cell phone/smart phone to the PC and transfer the data and browse internet.
	37.5 Flash the various brands of cell phone/smart phone (at least 3) and upgrade the OS.
	37.6 Format the cell phone/smart phone for virus (approach the mobile repair shop/service centre).
	37.7 Identify the defective parts and rectify.
38. Identify the various parts of a LED lights & stacks and troubleshoot.	38.1 Understand and interpret measuring procedure as per manual.
	38.2 Conduct systematic trouble shooting.
	38.3 Dismantle the LED light, identify the connections of LEDs stacks, protection circuits, regulator.
	38.4 Measure the voltage across LED stacks.
	38.5 Identify the rectifier, controller part of LED lights.
	38.6 Test various subassemblies of the given LED light system.
	38.7 Comply with safety rules when performing the above operations.
	38.8 Avoid waste, ascertain unused materials and components for disposal, store these in an environmentally appropriate manner and prepare for disposal.
39. Identify, operate various controls, troubleshoot and replace modules of the LCD/LED TV & its remote.	39.1 Ascertain and select tools and materials for the job and make this available for use in a timely manner.
	39.2 Plan to Dismantle and assemble modules as per circuit diagram.
	39.3 Identification and operate different Controls on LCD, LED TV.
	39.4 Dismantle, Identify the parts of the remote control.
	39.5 Trace and rectify the faults of a various remote controls.
	39.6 Identify various connectors and connect the cable operator's external decoder (set top box) to the TV.
	39.7 Comply with safety rules when performing the above operations.
	39.8 Avoid waste, ascertain unused materials and components for disposal, store these in an environmentally appropriate manner and prepare for disposal.

SYLLABUS FOR ELECTRONICS MECHANIC TRADE			
FIRST YEAR			
Week No.	Reference Learning Outcome	Professional Skills (Trade Practical) With Indicative Hours	Professional Knowledge (Trade Theory)
1	Apply safe working practices	Trade and Orientation 1. Visit to various sections of the institute and identify location of various installations. (5 hrs) 2. Identify safety signs for danger, warning, caution & personal safety message. (3hrs) 3. Use of personal protective equipment (PPE). (5 hrs) 4. Practice elementary first aid.(5hrs) 5. Preventive measures for electrical accidents & steps to be taken in such accidents.(2 hrs) 6. Use of Fire extinguishers.(5hrs)	Familiarization with the working of Industrial Training Institute system. Importance of safety and precautions to be taken in the industry/shop floor. Introduction to PPEs. Introduction to First Aid. Response to emergencies e.g. power failure, fire, and system failure. Importance of housekeeping & good shop floor practices. Occupational Safety & Health: Health, Safety and Environment guidelines, legislations & regulations as applicable.
2-3	Perform basic workshop operations using suitable tools for fitting, riveting, drilling etc observing suitable care & safety	Hand tools and their uses 7. Identify the different hand tools. (5 hrs) 8. Selection of proper tools for operation and precautions in operation. (7hrs) 9. Care & maintenance of trade tools. (8hrs) 10. Practice safety precautions while working in fitting jobs. (10hrs) 11. Workshop practice on filing and hacks awing. (5hrs) 12. Practice simple sheet metal works, fitting and drilling.(5hrs) 13. Make an open box from metal sheet. (10 hrs)	Identification, specifications, uses and maintenance of commonly used hand tools. State the correct shape of files for filing different profiles. Riveting of tags and lugs, cutting and bending of sheet metals, chassis and cabinets.
4-5	Select and perform	Basics of AC and Electrical Cables	

	electrical/ electronic measurement of single range meters and calibrate the instrument.	<p>14. Identify the Phase, Neutral and Earth on power socket, use a testers to monitor AC power. (6hrs)</p> <p>15. Construct a test lamp and use it to check mains healthiness. (7hrs)</p> <p>16. Measure the voltage between phase and ground and rectify earthing. (5hrs)</p> <p>17. Identify and test different AC mains cables. (7hrs)</p> <p>18. Prepare terminations, skin the electrical wires /cables using wire stripper and cutter. (7hrs)</p> <p>19. Measure the gauge of the wire using SWG and outside micrometer. (5hrs)</p> <p>20. Refer table and find current carrying capacity of wires. (3 hrs)</p> <p>21. Crimp the lugs to wire end. (5hrs)</p> <p>22. Measure AC and DC voltages using multi meter. (5hrs)</p>	<p>Basic terms such as electric charges, Potential difference, Voltage, Current, Resistance. Basics of AC & DC.</p> <p>Various terms such as +ve cycle, -ve cycle, Frequency, Time period, RMS, Peak, Instantaneous value.</p> <p>Single phase and Three phase supply.</p> <p>Terms like Line and Phase voltage/ currents.</p> <p>Insulators, conductors and semiconductor properties.</p> <p>Different type of electrical cables and their Specifications.</p> <p>Types of wires & cables, standard wire gauge (SWG).</p> <p>Classification of cables according to gauge (core size), number of conductors, material, insulation strength, flexibility etc.</p>
6	Select and perform electrical/ electronic measurement of single range meters and calibrate the instrument.	<p>23. Identify the type of meters by dial and scale marking/ symbols. (3 Hrs)</p> <p>24. Demonstrate various analog measuring Instruments. (3 Hrs)</p> <p>25. Find the minimum and maximum measurable range of the meter. (3 Hrs)</p> <p>26. Carryout mechanical zero setting of a meter. (4Hrs)</p> <p>27. Check the continuity of wires, meter probes and fuse etc. (5 Hrs)</p> <p>28. Measure voltage and current using clamp meter. (5Hrs)</p>	<p>Single range meters</p> <p>Introduction to electrical and electronic measuring instruments. Basic principle and parts of simple meters.</p> <p>Specifications, symbols used in dial and their meaning.</p>
7	Test & service different batteries used in electronic applications and	<p>Cells & Batteries</p> <p>29. Identify the +ve and -ve terminals of the battery. (2 hrs)</p> <p>30. Identify the rated output voltage and Ah capacity of</p>	<p>Cells & Batteries</p> <p>Construction, types of primary and secondary cells. Materials used, Specification of cells and batteries.</p>

	record the data to estimate repair cost.	<p>given battery. (1 hrs)</p> <p>31. Measure the voltages of the given cells/battery using analog/ digital multimeter. (3 hrs)</p> <p>32. Charge and discharge the battery through load resistor. (5 hrs)</p> <p>33. Maintain the secondary cells. (5 hrs)</p> <p>34. Measure the specific gravity of the electrolyte using hydrometer. 3 hrs)</p> <p>35. Test a battery and verify whether the battery is ready for use of needs recharging. (6 hrs)</p>	<p>Charging process, efficiency, life of cell/battery.</p> <p>Selection of cells / Batteries etc.</p> <p>Use of Hydrometer.</p> <p>Types of electrolytes used in cells and batteries.</p> <p>Series/ parallel connection of batteries and purpose of such connections.</p>
8-9	Test various electronic components using proper measuring instruments and compare the data using standard parameter.	<p>AC & DC measurements</p> <p>36. Use the multi meter to measure the various functions (AC V, DC V, DC I, AC I, R) (8 hrs.)</p> <p>37. Identify the different types of meter for measuring AC & DC parameters (8hrs.)</p> <p>38. Identify the different controls on the CRO front panel and observe the function of each control (12hrs.)</p> <p>39. Measure DC voltage, AC voltage, time period using CRO sine wave parameters (10hrs.)</p> <p>40. Identify the different controls on the function generator front panel and observe the function of each controls (12 hrs.)</p>	<p>Introduction to electrical measuring instruments.</p> <p>Importance and classification of meters.</p> <p>Forces necessary to work a meter. MC and MI meters.</p> <p>Range extension, need of calibration.</p> <p>Characteristics of meters and errors in meters.</p> <p>Multi meter, use of meters in different circuits.</p> <p>Care and maintenance of meters.</p> <p>Use of CRO, Function generator, LCR meter</p>
10	Plan and execute soldering & de-soldering of various electrical components like Switches, PCB & Transformers for	<p>Soldering/ De-soldering and Various Switches</p> <p>41. Practice soldering on different electronic components, small transformer and lugs. (5 hrs)</p> <p>42. Practice soldering on IC bases and PCBs. (5 hrs)</p> <p>43. Practice de-soldering using pump and wick (2 hrs)</p>	<p>Different types of soldering guns, related to Temperature and wattages, types of tips.</p> <p>Solder materials and their grading. Use of flux and other materials. Selection of soldering gun for specific requirement.</p> <p>Soldering and De-soldering</p>

	electronic circuits.	<p>44. Join the broken PCB track and test (3 hrs)</p> <p>45. Identify and use SPST, SPDT, DPST, DPDT, tumbler, push button, toggle, piano switches used in electronic industries (5 hrs)</p> <p>46. Make a panel board using different types of switches for a given application (5 hrs)</p>	<p>stations and their specifications. Different switches, their specification and usage.</p>
11-13	Test various electronic components using proper measuring instruments and compare the data using standard parameter.	<p>Active and Passive Components</p> <p>47. Identify the different types of active electronic components. (3hrs).</p> <p>48. Measure the resistor value by colour code and verify the same by measuring with multimeter (3hrs)</p> <p>49. Identify resistors by their appearance and check physical defects. (2 hrs)</p> <p>50. Identify the power rating of carbon resistors by their size. (3 hrs)</p> <p>51. Practice on measurement of parameters in combinational electrical circuit by applying Ohm's Law for different resistor values and voltage sources. (9hrs)</p> <p>52. Measurement of current and voltage in electrical circuits to verify Kirchhoff's Law (5Hrs)</p> <p>53. Verify laws of series and parallel circuits with voltage source in different combinations. (5 hrs)</p> <p>54. Measure the resistance, Voltage, Current through series and parallel connected networks using multi meter (8hrs)</p> <p>55. Identify different inductors and measure the values using LCR meter (5 hrs)</p>	<p>Ohm's law and Kirchhoff's Law. Resistors; types of resistors, their construction & specific use, color-coding, power rating. Equivalent Resistance of series parallel circuits. Distribution of V & I in series parallel circuits. Principles of induction, inductive reactance. Types of inductors, construction, specifications, applications and energy storage concept. Self and Mutual induction. Behaviour of inductor at low and high frequencies. Series and parallel combination, Q factor. Capacitance and Capacitive Reactance, Impedance. Types of capacitors, construction, specifications and applications. Dielectric constant. Significance of Series parallel connection of capacitors. Capacitor behaviour with AC and DC. Concept of Time constant of a RC circuit. Concept of Resonance and its application in RC, RL & RLC series and parallel circuit. Properties of magnets and their materials, preparation of artificial magnets, significance of electro</p>

		<p>56. Identify the different capacitors and measure capacitance of various capacitors using LCR meter (5 hrs)</p> <p>57. Identify and test the circuit breaker and other protecting devices. (5 hrs)</p> <p>58. Dismantle and identify the different parts of a relay. (5 hrs)</p> <p>59. Connect a timer relay in a circuit and test for its working. (3 hrs)</p> <p>60. Connect a contactor in a circuit and test for its working (2 hrs)</p> <p>61. Construct and test RC time constant circuit (4 hrs)</p> <p>62. Construct a RC differentiator circuit and convert triangular wave into square wave (5 hrs.)</p> <p>63. Construct and test series and parallel resonance circuit (3 hrs)</p>	<p>magnetism, types of cores. Relays, types, construction and specifications etc.</p>
14-15	Assemble simple electronic power supply circuit and test for functioning.	<p>Power Supply Circuits</p> <p>64. Identify different types of diodes, diode modules and their specifications. (5 hrs)</p> <p>65. Test the given diode using multi meter and determine forward to reverse resistance ratio. (5 hrs)</p> <p>66. Measure the voltage and current through a diode in a circuit and verify its forward characteristic. (8 hrs)</p> <p>67. Identify different types of transformers and test. (3 hrs)</p> <p>68. Identify the primary and secondary transformer windings and test the polarity (2 hrs)</p> <p>69. Construct and test a half wave, full wave and Bridge rectifier circuit. (10hrs)</p>	<p>Semiconductor materials, components, number coding for different electronic components such as Diodes and Zeners etc. PN Junction, Forward and Reverse biasing of diodes. Interpretation of diode specifications. Forward current and Reverse voltage. Packing styles of diodes. Different diodes, Rectifier configurations, their efficiencies, Filter components and their role in reducing ripple. Working principles of Zener diode, varactor diode, their specifications and applications. Working principle of a Transformer,</p>

		<p>70. Measure ripple voltage, ripple frequency and ripple factor of rectifiers for different load and filter capacitors. (5 hrs)</p> <p>71. Identify and test Zener diode. (2 hrs)</p> <p>72. Construct and test Zener based voltage regulator circuit. (5 hrs)</p> <p>73. Calculate the percentage regulation of regulated power supply. (5 hrs)</p>	<p>construction, Specifications and types of cores used.</p> <p>Step-up, Step down and isolation transformers with applications.</p> <p>Losses in Transformers.</p> <p>Phase angle, phase relations, active and reactive power, power factor and its importance.</p>
16-20	<p>Install, configure, interconnect given computer system(s) and demonstrate & utilize application packages for different application.</p>	<p>Computer Hardware, OS, MS office and Networking</p> <p>74. Identify various indicators, cables, connectors and ports on the computer cabinet. (5 hrs)</p> <p>75. Demonstrate various parts of the system unit and motherboard components. (5 hrs)</p> <p>76. Identify various computer peripherals and connect it to the system. (5 hrs)</p> <p>77. Disable certain functionality by disconnecting the concerned cables SATA/ PATA. (5 hrs)</p> <p>78. Replace the CMOS battery and extend a memory module. (5 hrs)</p> <p>79. Test and Replace the SMPS (5 hrs)</p> <p>80. Replace the given DVD and HDD on the system (5 hrs)</p> <p>81. Dismantle and assemble the desktop computer system. (10 hrs)</p> <p>82. Boot the system from Different options (5 hrs)</p> <p>83. Install OS in a desktop computer. (5 hrs)</p> <p>84. Install a Printer driver software and test for print outs (5 hrs)</p> <p>85. Install antivirus software, scan the system and explore the</p>	<p>Basic blocks of a computer, Components of desktop and motherboard.</p> <p>Hardware and software, I/O devices, and their working.</p> <p>Different types of printers, HDD, DVD.</p> <p>Various ports in the computer.</p> <p>Windows OS</p> <p>MS widows: Starting windows and its operation, file management using explorer, Display & sound properties, screen savers, font management, installation of program, setting and using of control panel., application of accessories, various IT tools and applications.</p> <p>Concept of word processing,: MS word</p> <p>– Menu bar, standard tool bar, editing, formatting, printing of document etc.</p> <p>Excel – Worksheet basics, data entry and formulae. Moving data in worksheet using tool bars and menu bars, Formatting and calculations, printing worksheet, creating multiple work sheets, creating charts.</p> <p>Introduction to power point</p>

		<p>options in the antivirus software. (5 hrs)</p> <p>86. Install MS office software (5 hrs)</p> <p>87. Create folder and files, draw pictures using paint. (5 hrs)</p> <p>88. Explore different menu/ tool/ format/ status bars of MS word and practice the options. (8 hrs)</p> <p>89. Explore different menu/ tool/ format/ status bars of MS excel and practice the options. (7 hrs)</p> <p>90. Prepare power point presentation on any three known topics with various design, animation and visual effects. (5 hrs)</p> <p>91. Convert the given PDF File into Word file using suitable software. (5 hrs)</p> <p>92. Browse search engines, create email accounts, practice sending and receiving of mails and configuration of email clients. (5 hrs)</p> <p>93. Identify different types of cables and network components e.g. Hub, switch, router, modem etc. (5 hrs)</p> <p>94. Prepare terminations, make UTP and STP cable connectors and test. (5 hrs)</p> <p>95. Connect network connectivity hardware and check for its functioning. (5 hrs)</p> <p>96. Configure a wireless Wi-Fi network (5 hrs)</p>	<p>Basics of preparing slides, different design aspects of slides, animation with slides etc.</p> <p>Concept of Internet, Browsers, Websites, search engines, email, chatting and messenger service. Downloading the Data and program files etc.</p> <p>Computer Networking:- Network features - Network medias Network topologies, protocols- TCP/IP, UDP, FTP, models and types. Specification and standards, types of cables, UTP, STP, Coaxial cables. Network components like hub, Ethernet switch, router, NIC Cards, connectors, media and firewall. Difference between PC & Server.</p>
21	Assemble simple electronic power supply circuit and test for functioning.	<p>IC Regulators</p> <p>97. Construct and test a +12V fixed voltage regulator. (5 hrs)</p> <p>98. Identify the different types of fixed +ve and -ve regulator</p>	<p>Regulated Power supply using 78XX series, 79XX series. Op-amp regulator, 723 regulator, (Transistorized & IC based). Voltage regulation, error</p>

		<p>ICs and the different current ratings (78/79 series) (5 hrs)</p> <p>99. Identify different heat sinks for IC based regulators. (2 hrs)</p> <p>100. Observe the output voltage of different IC 723 metal/plastic type and IC 78540 regulators by varying the input voltage with fixed load (8 hrs)</p> <p>101. Construct and test a 1.2V – 30V variable output regulated power supply using IC LM317T. (5 hrs)</p>	correction and amplification etc.
22-23	<p>Project work / Industrial visit</p> <p>Broad areas:</p> <p>a) Full wave Voltage rectifier with indicator.</p> <p>b) Transformer less 12 V dual power supply</p> <p>c) Versatile regulated power supply</p> <p>d) AC/DC voltage tester.</p> <p>e) Modular rectifiers.</p> <p>f) Half wave dual power supply with zener diode.</p>		
24-26	Revision		
27	<p>• Construct, test and verify the input/output characteristics of various analog circuits.</p>	<p>Transistor</p> <p>102. Identify different transistors with respect to different package type, B-E-C pins, power, switching transistor, heat sinks etc. (5 hrs)</p> <p>103. Test the condition of a given transistor using ohm-meter. (5 hrs)</p> <p>104. Measure and plot input and output characteristics of a CE amplifier. (7 hrs)</p> <p>105. Construct and test a transistor based switching circuit to control a relay (use Relays of different coil voltages and Transistors of different β) (8 hrs)</p>	<p>Construction, working of a PNP and NPN Transistors, purpose of E, B & C Terminals.</p> <p>Significance of α, β and relationship of a Transistor.</p> <p>Need for Biasing of Transistor.</p> <p>VBE, VCB, VCE, IC, IB, Junction Temperature, junction capacitance, frequency of operation.</p> <p>Transistor applications as switch and amplifier.</p> <p>Transistor input and output characteristics.</p> <p>Transistor power ratings & packaging styles and use of different heat sinks.</p>
28-29	Construct, test and	Amplifier	

	verify the input/output characteristics of various analog circuits.	<p>106. Construct and test fixed-bias, emitter-bias and voltage divider-bias transistor amplifier. (12 hrs)</p> <p>107. Construct and Test a common emitter amplifier with and without bypass capacitors (5 hrs)</p> <p>108. Construct and Test common base amplifier. (5 hrs)</p> <p>109. Construct and Test common collector/emitter follower amplifier. (5 hrs)</p> <p>110. Construct and Test Darlington amplifier. (5 hrs)</p> <p>111. Construct and test a two stage RC Coupled amplifier. (5 hrs)</p> <p>112. Construct and test a Class B complementary push pull amplifier. (8 hrs)</p> <p>113. Construct and test class C Tuned amplifier. (5 hrs)</p>	<p>Different types of biasing, various configurations of transistor (C-B, C-E & C-C), their characteristics and applications.</p> <p>Transistor biasing circuits and stabilization Techniques.</p> <p>Classification of amplifiers according to frequency, mode of operation and methods of coupling.</p> <p>Voltage amplifiers - voltage gain, loading effect.</p> <p>Single stage CE amplifier and CC amplifier.</p> <p>Emitter follower circuit and its advantages.</p> <p>RC coupled amplifier, Distinguish between voltage and power amplifier, Push pull amplifier and class C tuned amplifier.</p> <p>Alpha, beta, voltage gain, Concept of dB dBm.</p> <p>Feedback and its types.</p>
30	Construct, test and verify the input/output characteristics of various analog circuits.	<p>Oscillators</p> <p>114. Demonstrate Colpitts oscillator, Hartley oscillator circuits and compare the output frequency of the oscillator by CRO. (7 hrs)</p> <p>115. Construct and test a RC phase shift oscillator circuits. (5 hrs)</p> <p>116. Construct and test a crystal oscillator circuits. (5 hrs)</p> <p>117. Demonstrate Astable, monostable, bistable circuits using transistors. (8 hrs)</p>	<p>Introduction to positive feedback and requisites of an oscillator.</p> <p>Study of Colpitts, Hartley, Crystal and RC oscillators.</p> <p>Types of multi vibrators and study of circuit diagrams.</p>
31	Construct, test and verify the input/output characteristics of various analog circuits.	<p>Wave shaping circuits</p> <p>118. Construct and test shunt clipper. (6 hrs)</p> <p>119. Construct and test series and dual clipper circuit using diodes. (7 hrs)</p> <p>120. Construct and test clamper circuit using diodes. (5 hrs)</p>	<p>Diode shunt clipper circuits, Clamping / limiting circuits and Zener diode as peak clipper, uses their applications.</p>

		121. Construct and test Zener diode as a peak clipper. (7 hrs)	
32-33	Plan and construct different power electronic circuits and analyse the circuit functioning.	<p>Power Electronic Components</p> <p>122. Identify different power electronic components, their specification and terminals. (6 hrs)</p> <p>123. Construct and test a FET Amplifier. (6 hrs)</p> <p>124. Construct a test circuit of SCR using UJT triggering. (7 hrs)</p> <p>125. Identify different heat sinks used in SCRs. (3 hrs)</p> <p>126. Construct a snubber circuit for protecting SCR use freewheeling diode to reduce back emf. (7 hrs)</p> <p>127. Construct a jig circuit to test DIAC. (7 hrs)</p> <p>128. Construct a simple dimmer circuit using TRIAC. (7 hrs)</p> <p>129. Construct UJT based free running oscillator and change its frequency. (7 hrs)</p>	<p>Construction of FET & JFET, difference with BJT.</p> <p>Purpose of Gate, Drain and source terminals and voltage / current relations between them and Impedances between various terminals.</p> <p>Heat Sink- Uses & purpose.</p> <p>Suitability of FET amplifiers in measuring device applications.</p> <p>Working of different power electronic components such as SCR, TRIAC, DIAC and UJT.</p>
34	Plan and construct different power electronic circuits and analyse the circuit functioning.	<p>MOSFET & IGBT</p> <p>130. Identify various Power MOSFET by its number and test by using multimeter. (5 hrs)</p> <p>131. Identify different heat sinks used with various power MOSFET devices. (5 hrs)</p> <p>132. Construct MOSFET test circuit with a small load. (5 hrs)</p> <p>133. Identify IGBTs by their numbers and test by using multimeter. (5 hrs)</p> <p>134. Construct IGBT test circuit with a small load. (5 hrs)</p>	<p>MOSFET, Power MOSFET and IGBT, their types, characteristics, switching speed, power ratings and protection.</p> <p>Differentiate FET with MOSFET.</p> <p>Differentiate Transistor with IGBT.</p>
35	Select the appropriate opto electronics components and	<p>Opto Electronics</p> <p>135. Test LEDs with DC supply and measure voltage drop and current using multimeter. (5</p>	<p>Working and application of LED, IR LEDs, Photo diode, photo transistor, their characteristics</p>

	verify the characteristics in different circuit.	hrs) 136. Construct a circuit to test photo voltaic cell. (5 hrs) 137. Construct a circuit to switch a lamp load using photo diode. (5 hrs) 138. Construct a circuit to switch a lamp load using photo transistor. (5 hrs) 139. Identify opto coupler input and output terminals and measure the quantum of isolation between input/output terminals and operate a relay by connecting a switch. (5 hrs)	and applications. Optical sensor, opto-couplers, circuits with opto isolators. Characteristics of LASER diodes.
36	Assemble, test and troubleshoot various digital circuits.	Basic Gates 140. Identify different Logic Gates (AND, OR, NAND, NOR, EX-OR, EX-NOR, NOT ICs) by the number printed on them. (6 hrs) 141. Verify the truth tables of all Logic Gate ICs by connecting switches and LEDs. (8 hrs) 142. Construct and verify the truth table of all the gates using NAND and NOR gates. (6 hrs) 143. Use digital IC tester to test the various digital ICs (TTL and CMOS). (5 hrs)	Introduction to Digital Electronics. Difference between analog and digital signals. Logic families and their comparison, logic levels of TTL and CMOS. Number systems (Decimal, binary, octal, Hexadecimal). BCD code, ASCII code and code conversions. Various Logic Gates and their truth tables.
37	Assemble, test and troubleshoot various digital circuits.	Combinational Circuits 144. Construct Half Adder circuit using ICs and verify the truth table. (3 hrs) 145. Construct Full adder with two Half adder circuit using ICs and verify the truth table. (5 hrs) 146. Construct the adder cum subtractor circuit and verify the result. (5 hrs) 147. Construct and Test a 2 to 4 Decoder. (3 hrs)	Combinational logic circuits such as Half Adder, Full adder, Parallel Binary adders, 2-bit and four bit full adders. Magnitude comparators. Half adder, full adder ICs and their applications for implementing arithmetic operations. Concept of encoder and decoder. Basic Binary Decoder and four bit binary decoders.

		<p>148. Construct and Test a 4 to 2 Encoder. (3 hrs)</p> <p>149. Construct and Test a 4 to 1 Multiplexer. (3 hrs)</p> <p>150. Construct and Test a 1 to 4 De Multiplexer. (3 hrs)</p>	<p>Need for multiplexing of data. 1:4 line Multiplexer / De-multiplexer.</p>
38	Assemble, test and troubleshoot various digital circuits..	<p>Flip Flops</p> <p>151. Identify different Flip-Flop (ICs) by the number printed on them. (5 hrs)</p> <p>152. Construct and test four bit latch using 7475. (5 hrs)</p> <p>153. Construct and test R-S flip-flop using IC7400 with clock and without clock pulse. (5 hrs)</p> <p>154. Verify the truth tables of Flip-Flop ICs (RS, D, T, JK, MSJK) by connecting switches and LEDs. (10 hrs)</p>	<p>Introduction to Flip-Flop. S-R Latch, Gated S-R Latch, D-Latch.</p> <p>Flip-Flop: Basic RS Flip Flop, edge triggered D Flip Flop, JK Flip Flop, T Flip Flop.</p> <p>Master-Slave flip flops and Timing diagrams.</p> <p>Basic flip flop applications like data storage, data transfer and frequency division.</p>
39-40	Simulate and analyze the analog and digital circuits using Electronic simulator software.	<p>Electronic circuit simulator</p> <p>155. Prepare simple digital and electronic circuits using the software (10 hrs)</p> <p>156. Simulate and test the prepared digital and analog circuits (16 hrs)</p> <p>157. Convert the prepared circuit into a layout diagram. (10 hrs)</p> <p>158. Prepare simple, power electronic and domestic electronic circuit using simulation software. (14 hrs)</p>	<p>Study the library components available in the circuit simulation software.</p> <p>Various resources of the software.</p>
41-43	Assemble, test and troubleshoot various digital circuits.	<p>Counter & shift Registers</p> <p>159. Construct and test a four bit asynchronous binary counter using 7493 (6hrs)</p> <p>160. Construct and test 7493 as a modulus-12 counter. (6hrs)</p> <p>161. Construct and test a four bit Synchronous binary counter using 74163. (8hrs)</p> <p>162. Construct and test synchronous Decade</p>	<p>Basics of Counters, types, two bit and three bit Asynchronous binary counters and decade counters with the timing diagrams.</p> <p>3-bit Synchronous counters and synchronous decade counters.</p> <p>Types of seven segment display. BCD display and BCD to decimal decoder.</p>

		<p>counter. (6hrs)</p> <p>163. Construct and test an up/down synchronous decade counter using 74190 and monitor the output on LEDs. (8hrs)</p> <p>164. Identify and test common anode and common cathode seven segment LED display using multi meter. (5hrs)</p> <p>165. Display the two digit count value on seven segment display using decoder/driver ICs. (6hrs)</p> <p>166. Construct a shift register using RS/D/JK flip flop and verify the result. (6hrs)</p> <p>167. Construct and test four bit SIPO register. (8hrs)</p> <p>168. Construct and test four bit PIPO register. (8hrs)</p> <p>169. Construct and test bidirectional shift registers. (8hrs)</p>	<p>BCD to 7 segment display circuits.</p> <p>Basics of Register, types and application of Registers.</p>
44-47	<p>Construct and test different circuits using ICs 741operational amplifiers & ICs 555 linear integrated circuits and execute the result.</p>	<p>Op – Amp & Timer 555 Applications</p> <p>170. Use analog IC tester to test the various analog ICs. (5 hrs)</p> <p>171. Construct and test various Op-Amp circuits Inverting, Non-inverting and Summing Amplifiers. (15 hrs)</p> <p>172. Construct and test Differentiator and Integrator (10 hrs)</p> <p>173. Construct and test a zero crossing detector. (5 hrs)</p> <p>174. Construct and test Instrumentation amplifier (10 hrs)</p> <p>175. Construct and test a Binary weighted and R-2R Ladder type Digital-to-Analog Converters (15hrs.)</p> <p>176. Construct and test Astable</p>	<p>Block diagram and Working of Op-Amp, importance, Ideal characteristics, advantages and applications.</p> <p>Schematic diagram of 741, symbol.</p> <p>Non-inverting voltage amplifier, inverting voltage amplifier, summing amplifier, Comparator, zero cross detector, differentiator, integrator and instrumentation amplifier, other popular Op-Amps.</p> <p>Block diagram of 555, functional description w.r.t. different configurations of 555 such as monostable, astable and VCO operations for various application.</p>

		<p>timer circuit using IC 555 (10 hrs)</p> <p>177. Construct and test mono stable timer circuit using IC 555. (10 hrs)</p> <p>178. Construct and test VCO (V to F Converter) using IC 555. (10 hrs)</p> <p>179. Construct and test 555 timers as pulse width modulator (10 hrs)</p>	
48-49	<p>Project work / Industrial visit</p> <p>Broad Areas:</p> <p>a) Delayed automatic power on circuit.</p> <p>b) Neon flasher circuit using IC 741</p> <p>c) UJT act as a relaxation oscillator</p> <p>d) Up/down synchronous decade counter</p> <p>e) Portable continuity cum capacitor tester</p>		
50-51	Revision		
52	Examination		

Note: -

1. Some of the sample project works (indicative only) are given at the mid and end of each year.
2. Instructor may design their own projects and also inputs from local industry may be taken for designing such new projects.
3. The project should broadly cover maximum skills in the particular trade and must involve some problem solving skill. Emphasis should be on Teamwork: Knowing the power of synergy/ collaboration, work to be assigned in a group (Group of at least 4 trainees). The group should demonstrate Planning, Execution, Contribution and Application of Learning. They need to submit a Project report after completion.
4. If the instructor feels that for execution of specific project more time is required then he may plan accordingly in appropriate time during the execution of normal trade practical.

SYLLABUS FOR ELECTRONICS MECHANIC TRADE

SECOND YEAR

Week No.	Reference Learning Outcome	Professional Skills (Trade Practical) With Indicative Hours	Professional Knowledge (Trade Theory)
53	Measure the various parameters by DSO and execute the result with standard one.	Digital Storage Oscilloscope 180. Identify the different front panel control of a DSO. (5 hrs) 181. Measure the Amplitude, Frequency and time period of typical electronic signals using DSO. (7 hrs) 182. Take a print of a signal from DSO by connecting it to a printer and tally with applied signal. (6 hrs) 183. Construct and test function generator using IC 8038. (7 hrs)	Advantages and features of DSO. Block diagram of Digital storage oscilloscope (DSO)/ CRO and applications. Applications of digital CRO. Block diagram of function generator. Differentiate a CRO with DSO.
54	Identify, place, solder and desolder and test different SMD discrete components and IC,s package with due care and following safety norms using proper tools/setup.	Basic SMD (2, 3, 4 terminal components) 184. Identification of 2, 3, 4 terminal SMD components. (5 hrs) 185. De-solder the SMD components from the given PCB. (5 hrs) 186. Solder the SMD components in the same PCB. (5 hrs) 187. Check for cold continuity of PCB. (3 hrs) 188. Identification of loose /dry solder, broken tracks on printed wired assemblies. (7 hrs)	Introduction to SMD technology Identification of 2, 3, 4 terminal SMD components. Advantages of SMD components over conventional lead components. Soldering of SM assemblies - Reflow soldering. Tips for selection of hardware, Inspection of SM.
55-56	Identify, place, solder and desolder and test different SMD discrete components and IC,s package with due care and	SMD Soldering and De-soldering 189. Identify various connections and setup required for SMD Soldering station. (5 hrs) 190. Identify crimping tools for various IC packages. (3 hrs)	Introduction to Surface Mount Technology (SMT). Advantages, Surface Mount components and packages. Introduction to solder paste

	following safety norms using proper tools/setup.	<p>191. Make the necessary settings on SMD soldering station to de-solder various ICs of different packages (at least four) by choosing proper crimping tools (14 hrs)</p> <p>192. Make the necessary settings on SMD soldering station to solder various ICs of different packages (at least four) by choosing proper crimping tools (14 hrs)</p> <p>193. Make the necessary setting rework of defective surface mount component used soldering / de-soldering method. (14 hrs)</p>	<p>(flux). Soldering of SM assemblies, reflow soldering. Tips for selection of hardware, Inspection of SM. Identification of Programmable Gate array (PGA) packages. Specification of various tracks, calculation of track width for different current ratings. Cold/ Continuity check of PCBs. Identification of lose / dry solders, broken tracks on printed wiring assemblies. Introduction to Pick place Machine, Reflow Oven, Preparing stencil,& stencil printer</p>
57-58	Rework on PCB after identifying defects from SMD soldering and de-soldering.	<p>PCB Rework</p> <p>194. Checked and Repair Printed Circuit Boards single, Double layer, and important tests for PCBs. (12 hrs)</p> <p>195. Inspect soldered joints, detect the defects and test the PCB for rework. (8 hrs)</p> <p>196. Remove the conformal coatings by different methods. (8 hrs)</p> <p>197. Perform replacement of coating. (8 hrs)</p> <p>198. Perform baking and preheating. (8 hrs)</p> <p>199. Repair solder mask and damage pad. (6 hrs)</p>	<p>Introduction to Static charges, prevention, handling of static sensitive devices, various standards for ESD. Introduction to non soldering interconnections. Construction of Printed Circuit Boards (single, Double, multi-layer), Important tests for PCBs. Introduction to rework and repair concepts. Repair of damaged track. Repair of damaged pad and plated through hole. Repair of solder mask.</p>
59	Construct different electrical control circuits and test for their proper functioning with due care and safety.	<p>Protection devices</p> <p>200. Identify different types of fuses along with fuse holders, overload (no volt coil), current adjust (Biometric strips to set the current). (9 hrs)</p> <p>201. Test the given MCBs. (8 hrs)</p> <p>202. Connect an ELCB and test</p>	<p>Necessity of fuse, fuse ratings, types of fuses, fuse bases. Single/ three phase MCBs, single phase ELCBs. Types of contactors, relays and working voltages. Contact currents, protection to contactors and high current</p>

		the leakage of an electrical motor control circuit. (8 hrs)	applications.
60	Construct different electrical control circuits and test for their proper functioning with due care and safety.	<p>Electrical control circuits</p> <p>203. Measure the coil winding resistance of the given motor. (6 hrs.)</p> <p>204. Prepare the setup of DOL starter and Control an induction motor. (7 hrs)</p> <p>205. Construct a direction control circuit to change direction of an induction motor. (6 hrs.)</p> <p>206. Connect an overload relay and test for its proper functioning. (6 hrs)</p>	<p>Fundamentals of single phase Induction motors, synchronous speed, slip, rotor frequency. Torque-speed characteristics, Starters used for Induction motors.</p>
61-62	Prepare, crimp, terminate and test various cables used in different electronics industries.	<p>Electronic Cables & Connectors</p> <p>207. Identify various types of cables viz. RF coaxial feeder, screened cable, ribbon cable, RCA connector cable, digital optical audio, video cable, RJ45, RJ11, Ethernet cable, fiber optic cable splicing, fiber optic cable mechanical splices, insulation, gauge, current capacity, flexibility etc. used in various electronics products, different input output sockets (15 hrs)</p> <p>208. Identify suitable connectors, solder/crimp /terminate & test the cable sets. (10 hrs)</p> <p>209. Check the continuity as per the marking on the connector for preparing the cable set. (10 hrs)</p> <p>210. Identify and select various connectors and cables inside the CPU cabinet of PC. (10 hrs)</p> <p>211. Identify the suitable connector and cable to</p>	<p>Cable signal diagram conventions Classification of electronic cables as per the application w.r.t. insulation, gauge, current capacity, flexibility etc. Different types of connector & their terminations to the cables. Male / Female type DB connectors. Ethernet 10 Base cross over cables and pin out assignments, UTP and STP, SCTP, TPC, coaxial, types of fibre optical Cables and Cable trays. Different types of connectors Servo 0.1" connectors, FTP, RCA,BNC,HDMI Audio/video connectors like XLR, RCA (phono), 6.3 mm PHONO, 3.5 / 2.5 mm PHONO, BANTAM, SPEAKON, DIN, mini DIN, RF connectors, USB, Fire wire, SATA Connectors, VGA, DVI connectors, MIDI and RJ45,RJ11 etc.</p>

		connect a computer with a network switch and prepare a cross over cable to connect two network computers. (5 hrs)	
63-65	Assemble and test a commercial AM/ FM receiver and evaluate performance.	<p>Communication electronics</p> <p>212. Modulate and Demodulate various signals using AM and FM on the trainer kit and observe waveforms (10hrs)</p> <p>213. Construct and test IC based AM Receiver (10hrs)</p> <p>214. Construct and test IC based FM transmitter (10hrs)</p> <p>215. Construct and test IC based AM transmitter and test the transmitter power. Calculate the modulation index. (10hrs)</p> <p>216. Dismantle the given FM receiver set and identify different stages (AM section, audio amplifier section etc) (10hrs)</p> <p>217. Modulate two signals using AM kit draw the way from and calculate percent (%) of modulation. (10hrs)</p> <p>218. Modulate and Demodulate a signal using PAM, PPM, PWM Techniques (15hrs)</p>	<p>Radio Wave Propagation – principle, fading.</p> <p>Need for Modulation, types of modulation and demodulation.</p> <p>Fundamentals of Antenna, various parameters, types of Antennas & application.</p> <p>Introduction to AM, FM & PM, SSB-SC & DSB-SC.</p> <p>Block diagram of AM and FM transmitter.</p> <p>FM Generation & Detection.</p> <p>Digital modulation and demodulation techniques, sampling, quantization & encoding.</p> <p>Concept of multiplexing and de multiplexing of AM/ FM/ PAM/ PPM /PWM signals.</p> <p><i>A simple block diagram approach to be adopted for explaining the above mod/demod. techniques.</i></p>
66-68	Test, service and troubleshoot the various components of different domestic/ industrial programmable systems.	<p>Microcontroller (8051)</p> <p>219. Identify various ICs & their functions on the given Microcontroller Kit. (5hrs)</p> <p>220. Identify the address range of RAM & ROM. (5hrs)</p> <p>221. Measure the crystal frequency, connect it to the controller. (5hrs)</p> <p>222. Identify the port pins of the controller & configure the ports for Input & Output operation. (7hrs)</p>	<p>Introduction Microprocessor & 8051 Microcontroller, architecture, pin details & the bus system.</p> <p>Function of different ICs used in the Microcontroller Kit.</p> <p>Differentiate microcontroller with microprocessor.</p> <p>Interfacing of memory to the microcontroller.</p> <p>Internal hardware resources of microcontroller.</p>

		<p>223. Use 8051 microcontroller, connect 8 LED to the port, blink the LED with a switch. (10hrs)</p> <p>224. Perform the initialization, load & turn on a LED with delay using Timer. (8hrs)</p> <p>225. Perform the use of a Timer as an Event counter to count external events. (10 hrs)</p> <p>226. Demonstrate entering of simple programs, execute & monitor the results. (10 hrs)</p> <p>227. Perform with 8051 microcontroller assembling language program, check the reading of an input port and sending the received bytes to the output port of the microcontroller, used switches and LCD for the input and output. (15hrs)</p>	<p>I/O port pin configuration. Different variants of 8051 & their resources.</p> <p>Register banks & their functioning. SFRs & their configuration for different applications.</p> <p>Comparative study of 8051 with 8052.</p> <p>Introduction to PIC Architecture.</p>
69-71	Execute the operation of different process sensors, identify, wire & test various sensors of different industrial processes by selecting appropriate test instruments.	<p>Sensors, Transducers and Applications</p> <p>228. Identify sensors used in process industries such as RTDs, Temperature ICs, Thermocouples, proximity switches (inductive, capacitive and photo electric), load cells, strain gauge. LVDT PT 100 (platinum resistance sensor), water level sensor, thermostat float switch, float valve by their appearance (15hrs)</p> <p>229. Measure temperature of a lit fire using a Thermocouple and record the readings referring to data chart. (15hrs)</p> <p>230. Measure temperature of a lit fire using RTD and record</p>	<p>Basics of passive and active transducers.</p> <p>Role, selection and characteristics.</p> <p>Sensor voltage and current formats.</p> <p>Thermistors/ Thermocouples - Basic principle, salient features, operating range, composition, advantages and disadvantages.</p> <p>Strain gauges/ Load cell – principle, gauge factor, types of strain gauges.</p> <p>Inductive/ capacitive transducers - Principle of operation, advantages and disadvantages.</p> <p>Principle of operation of LVDT,</p>

		<p>the readings referring to data chart (15 hrs.)</p> <p>231. Measure the DC voltage of a LVDT (15hrs)</p> <p>232. Detect different objectives using capacitive, inductive and photoelectric proximity sensors (15hrs)</p>	<p>advantages and disadvantages.</p> <p>Proximity sensors – applications, working principles of eddy current, capacitive and inductive proximity sensors</p>
72-73	<p>Plan and carry out the Selection of a project, assemble the project and evaluate performance for a domestic/commercial applications.</p>	<p>Analog IC Applications 233-237</p> <p>Make simple projects/Applications using ICs 741, 723, 555, 7106, 7107</p> <p>Sample projects:</p> <ul style="list-style-type: none"> • Laptop protector • Mobile cell phone charger • Battery monitor • Metal detector • Mains detector • Lead acid battery charger • Smoke detector • Solar charger • Emergency light • Water level controller • Door watcher <p>(Instructor will pick up any five of the projects for implementation) (50Hrs)</p>	<p>Discussion on the identified projects with respect to data of the concerned ICs.</p> <p>Components used in the project.</p>
74-75	<p>Plan and carry out the Selection of a project, assemble the project and evaluate performance for a domestic/commercial applications.</p>	<p>Digital IC Applications 238-242</p> <p>Make simple projects/Applications using various digital ICs (digital display, event counter, stepper motor driver etc)</p> <ul style="list-style-type: none"> • Duty cycle selector • Frequency Multiplier • Digital Mains Resumption Alarm • Digital Lucky Random number generator • Dancing LEDs • Count down timer • Clap switch 	<p>Discussion on the identified projects with respect to data of the concerned ICs.</p> <p>Components used in the project.</p>

		<ul style="list-style-type: none"> • Stepper motor control • Digital clock • Event counter • Remote jammer <p>(Instructor will pick up any five of the projects for implementation) (50 Hrs)</p>	
76-78	Revision		
79	Prepare fibre optic setup and execute transmission and reception.	<p>Fiber optic communication</p> <p>243. Identify the resources and their need on the given fiber optic trainer kit (3 hrs)</p> <p>244. Make optical fiber setup to transmit and receive analog and digital data (4 hrs)</p> <p>245. Set up the OFC trainer kit to study AM, FM, PWM modulation and demodulation. (6 hrs)</p> <p>246. Perform FM modulation and demodulation using OFC trainer kit using audio signal and voice link (4 hrs)</p> <p>247. Perform PWM modulation and demodulation using OFC trainer kit using audio signal and voice link (4 hrs)</p> <p>248. Perform PPM modulation and demodulation using OFC trainer kit using audio signal and voice link (4 hrs)</p>	<p>Introduction to optical fiber, optical connection and various types optical amplifier, its advantages, properties of optic fiber, testing, losses, types of fiber optic cables and specifications.</p> <p>Encoding of light.</p> <p>Fiber optic joints, splicing, testing and the related equipment/measuring tools.</p> <p>Precautions and safety aspects while handling optical cables.</p>
80-81	Plan and Interface the LCD, LED DPM panels to various circuits and evaluate performance.	<p>Digital panel Meter</p> <p>249. Identify LED Display module and its decoder/driver ICs (6 hrs)</p> <p>250. Display a word on a two line LED (8 hrs)</p>	<p>Different types of seven segment displays, decoders and driver ICs.</p> <p>Concept of multiplexing and its advantages.</p> <p>Block diagrams of 7106 and 7107</p>

		<p>251. Measure/current flowing through a resistor and display it on LED Module (10 hrs)</p> <p>252. Measure/current flowing through a sensor and display it on a LED module(DPM) (10 hrs)</p> <p>253. Identify LCD Display module and its decoder/driver ICs (8 hrs)</p> <p>254. Measure/current flowing through a resistor and display it. (8 hrs)</p>	<p>and their configuration for different measurements.</p> <p>Use of DPM with seven segment display.</p> <p>Principles of working of LCD.</p> <p>Different sizes of LCDs.</p> <p>Decoder/ driver ICs used with LCDs and their pin diagrams.</p> <p>Use of DPM with LCD to display different voltage & current signals.</p>
82-84	Detect the faults and troubleshoot SMPS, UPS and inverter.	<p>SMPS and Inverter</p> <p>255. Identify the components/devices and draw their corresponding symbols (4 hrs)</p> <p>256. Dismantle the given stabilizer and find major sections/ ICs components. (6 hrs)</p> <p>257. List the defect and symptom in the faulty SMPS. (5 hrs)</p> <p>258. Measure / Monitor major test points of computer SMPS. (8 hrs)</p> <p>259. Troubleshoot the fault in the given SMPS unit. Rectify the defect and verify the output with load. Record your procedure followed for trouble shooting the defects (10 hrs)</p> <p>260. Use SMPS used in TVs and PCs for Practice. (6 hrs)</p> <p>261. Install and test the SMPS in PC (6 hrs)</p> <p>262. Install and test an inverter. (6 hrs)</p> <p>263. Troubleshoot the fault in the given inverter unit.</p>	<p>Concept and block diagram of manual, automatic and servo voltage stabilizer, o/p voltage adjustment.</p> <p>Voltage cut-off systems, relays used in stabilizer.</p> <p>Block Diagram of different types of Switch mode power supplies and their working principles.</p> <p>Various types of chopper circuits.</p> <p>Inverter; principle of operation, block diagram, power rating, change over period.</p> <p>Installation of inverters, protection circuits used in inverters.</p> <p>Battery level, overload, over charging etc.</p> <p>Various faults and its rectification in inverter.</p> <p>Block diagram of DC-DC converters and their working principals.</p>

		<p>Rectify the defects and verify the output with load. (6 hrs)</p> <p>264. Construct and test IC Based DC-DC converter for different voltages (6 hrs)</p> <p>265. Construct and test a switching step down regulator using LM2576 (6 hrs)</p> <p>266. Construct and test a switching step up regulator using MC 34063 (6 hrs)</p>	
85-87	Detect the faults and troubleshoot SMPS, UPS and inverter.	<p>UPS</p> <p>267. Connect battery stack to the UPS. (4 hrs)</p> <p>268. Identify front panel control & indicators of UPS. (4 hrs)</p> <p>269. Connect Battery & load to UPS & test on battery mode. (6 hrs)</p> <p>270. Open top cover of a UPS; identify its isolator transformers, the UPS transformer and various circuit boards in UPS. (10 hrs)</p> <p>271. Identify the various test point and verify the voltages on these (7 hrs.)</p> <p>272. Identify various circuit boards in UPS and monitor voltages at various test points (7 hrs)</p> <p>273. Perform load test to measure backup time. (7 hrs)</p> <p>274. Perform all above experiment for three phase UPS (30 hrs)</p>	<p>Concept of Uninterrupted power supply.</p> <p>Difference between Inverters and UPS.</p> <p>Basic block diagram of UPS & operating principle.</p> <p>Types of UPS : Off line UPS, On line UPS, Line interactive UPS & their comparison</p> <p>UPS specifications. Load power factor & types of indications & protections</p> <p>UPS circuit description and working - controlling circuits, Micro controller circuits, power circuits, charging circuits, alarm circuits, Indicator circuits.</p> <p>Installation of single phase & three phase UPS.</p>
88-90	<ul style="list-style-type: none"> Install a solar panel, execute 	Solar Power (Renewable Energy System)	Need for renewable energy

	<p>testing and evaluate performance by connecting the panel to the inverter.</p>	<p>275. Install a solar panel to a roof. (25 hrs) 276. Wire a solar controller to a battery storage station. (5 hrs) 277. Install solar power 500 panel to directly 12 V DC appliances (15 hrs) 278. Connect storage batteries to a power inverter (5 hrs) 279. Connect and test solar panel to the Inverter and run the load. (5 hrs) 280. Install a solar power to charge a rechargeable 12 V DC battery and find out the charging time (15 hrs) 281. Install a Solar Inverter. (5 hrs)</p>	<p>sources, Solar energy as a renewable resource. Materials used for solar cells. Principles of conversion of solar light into electricity. Basics of photovoltaic's cell. Module, panel and Arrays. Factors that influence the output of a PV module. SPV systems and the key benefits. Difference between SPV and conventional power. Solar charge controller or regulator and its role. Safety precautions while working with solar systems.</p>
<p>91-92</p>	<ul style="list-style-type: none"> Dismantle, identify the various parts and interface of a cell phone to a PC. Estimate and troubleshoot. 	<p>Cell phones 282. Test LED/LCD TV after troubleshooting the defects (10 hrs)</p> <p>303. Identify various connectors and connect the cable operators external decoder (set top box) to the TV. (5 hrs.)</p>	<p>HDMI, USB, RGB etc.</p> <p>TV Remote Control –Types, parts and functions, IR Code transmitter and IR Code Receiver.</p> <p>Working principle, operation of remote control.</p> <p>Different adjustments, general faults in Remote Control.</p>
100-101	<p>Project work / Industrial visit</p> <p>Broad areas:</p> <p>a) Remote control for home appliances</p> <p>b) Solar power inverter</p> <p>c) Musical light chaser</p> <p>d) 7 segment LED display decoder drive circuit</p>		
102-103	Revision		
104	Examination		

Note: -

5. Some of the sample project works (indicative only) are given at the mid and end of each year.
6. Instructor may design their own projects and also inputs from local industry may be taken for designing such new projects.
7. The project should broadly cover maximum skills in the particular trade and must involve some problem solving skill. Emphasis should be on Teamwork: Knowing the power of synergy/ collaboration, work to be assigned in a group (Group of at least 4 trainees). The group should demonstrate Planning, Execution, Contribution and Application of Learning. They need to submit a Project report after completion.
8. If the instructor feels that for execution of specific project more time is required then he may plan accordingly in appropriate time during the execution of normal trade practical.

9.1 WORKSHOP CALCULATION SCIENCE & ENGINEERING DRAWING

S No.	Workshop Calculation and Science	Engineering Drawing
FIRST YEAR		
1.	Unit: Systems of unit- FPS, CGS, MKS/SI unit, unit of length, Mass and time, Conversion of units	Engineering Drawing: Introduction and its importance <ul style="list-style-type: none"> - Relationship to other technical drawing types - Conventions - Viewing of engineering drawing sheets. - Method of Folding of printed Drawing Sheet as per BIS SP:46-2003
2.	Fractions: Fractions, Decimal fraction, L.C.M., H.C.F., Multiplication and Division of Fractions and Decimals, conversion of Fraction to Decimal and vice versa. Simple problems using Scientific Calculator.	Drawing Instruments : their Standard and uses <ul style="list-style-type: none"> - Drawing board, T-Square, Drafter (Drafting M/c), Set Squares, Protractor, Drawing Instrument Box (Compass, Dividers, Scale, Diagonal Scales etc.), Pencils of different Grades, Drawing pins / Clips.
3.	Square Root: Square and Square Root, method of finding out square roots, Simple problem using calculator.	Lines : <ul style="list-style-type: none"> - Definition, types and applications in Drawing as per BIS SP:46-2003 - Classification of lines (Hidden, centre, construction, Extension, Dimension, Section) - Drawing lines of given length (Straight, curved) - Drawing of parallel lines, perpendicular line - Methods of Division of line segment
4.	Ratio & Proportion: Simple calculation on related problems.	Drawing of Geometrical Figures: Definition, nomenclature and practice of <ul style="list-style-type: none"> - Angle: Measurement and its types, method of bisecting. - Triangle -different types - Rectangle, Square, Rhombus, Parallelogram. - Circle and its elements.
5.	Percentage: Introduction, Simple	Lettering and Numbering as per BIS SP46-

	calculation. Changing percentage to decimal and fraction and vice-versa.	2003: <ul style="list-style-type: none"> - Single Stroke, Double Stroke, inclined, Upper case and Lower case.
6.	Material Science : properties -Physical & Mechanical, Types –Ferrous & Non-Ferrous, difference between Ferrous and Non-Ferrous metals, introduction of Iron, Cast Iron, Wrought Iron, Steel, difference between Iron and Steel, Alloy steel, carbon steel, stainless steel, Non-Ferrous metals, Non-Ferrous Alloys.	Dimensioning: <ul style="list-style-type: none"> - Definition, types and methods of dimensioning (functional, non-functional and auxiliary) - Types of arrowhead - Leader Line with text
7.	Mass, Weight and Density : Mass, Unit of Mass, Weight, difference between mass and weight, Density, unit of density, specific gravity of metals.	Free hand drawing of <ul style="list-style-type: none"> - Lines, polygons, ellipse, etc. - geometrical figures and blocks with dimension - Transferring measurement from the given object to the free hand sketches.
8.	Speed and Velocity : Rest and motion, speed, velocity, difference between speed and velocity, acceleration, retardation, equations of motions, simple related problems.	Sizes and Layout of Drawing Sheets <ul style="list-style-type: none"> - Basic principle of Sheet Size - Designation of sizes - Selection of sizes - Title Block, its position and content - Borders and Frames (Orientation marks and graduations) - Grid Reference - Item Reference on Drawing Sheet (Item List)
9.	Work, Power and Energy : work, unit of work, power, unit of power, Horse power of engines, mechanical efficiency, energy, use of energy, potential and kinetic energy, examples of potential energy and kinetic energy.	Method of presentation of Engineering Drawing <ul style="list-style-type: none"> - Pictorial View - Orthogonal View - Isometric view
10.	-----	Symbolic Representation (as per BIS SP:46-2003) of : <ul style="list-style-type: none"> - Fastener (Rivets, Bolts and Nuts) - Bars and profile sections - Weld, brazed and soldered joints. - Electrical and electronics element - Piping joints and fittings
11.	Algebra : Addition, Subtraction, Multiplication, Division, Algebraic	Construction of Scales and diagonal scale

	formula, Linear equations (with two variables).	
12.	<p>Mensuration : Area and perimeter of square, rectangle, parallelogram, triangle, circle, semi circle, Volume of solids – cube, cuboids, cylinder and Sphere. Surface area of solids – cube, cuboids, cylinder and Sphere.</p>	Practice of Lettering and Title Block
13.	<p>Trigonometry: Trigonometrical ratios, measurement of angles. Trigonometric tables</p>	<p>Dimensioning practice:</p> <ul style="list-style-type: none"> - Position of dimensioning (unidirectional, aligned, oblique as per BIS SP:46-2003) - Symbols preceding the value of dimension and dimensional tolerance. - Text of dimension of repeated features, equidistance elements, circumferential objects.
14.	<p>Heat & Temperature: Heat and temperature, their units, difference between heat and temperature, boiling point, melting point, scale of temperature, relation between different scale of temperature, Thermometer, pyrometer, transmission of heat, conduction, convection, radiation.</p>	<p>Construction of Geometrical Drawing Figures:</p> <ul style="list-style-type: none"> - Different Polygons and their values of included angles. Inscribed and Circumscribed polygons. - Conic Sections (Ellipse & Parabola)
15.	<p>Basic Electricity: Introduction, use of electricity, how electricity is produced, Types of current_ AC, DC, their comparison, voltage, resistance, their units. Conductor, insulator, Types of connections – series, parallel, electric power, Horse power, energy, unit of electrical energy.</p>	<p>Drawing of Solid figures (Cube, Cuboids, Cone, Prism, Pyramid, Frustum of Cone and Pyramid.) with dimensions.</p>
16.	<p>Levers and Simple Machines: levers and its types. Simple Machines, Effort and Load, Mechanical Advantage, Velocity Ratio, Efficiency of machine, Relationship between Efficiency, velocity ratio and</p>	<p>Free Hand sketch of hand tools and measuring tools used in respective trades.</p>

	Mechanical Advantage.	
17.	-	Projections: <ul style="list-style-type: none"> - Concept of axes plane and quadrant. - Orthographic projections - Method of first angle and third angle projections (definition and difference) - Symbol of 1st angle and 3rd angle projection as per IS specification.
18.	-	Drawing of Orthographic projection from isometric/3D view of blocks
19.	-	Orthographic Drawing of simple fastener (Rivet, Bolts, Nuts & Screw)
20.	-	Drawing details of two simple mating blocks and assembled view.

Skill India

कौशल भारत - कुशल भारत

SECOND YEAR		
Sl. No.	Workshop Calculation and Science	Engineering Drawing
1.	Elasticity: Stress, strain, Modulus of elasticity, elastic limit, Hooks law, young's modulus.	CRO: - Block diagram of Cathode Ray Oscilloscope (CRO). Block diagram of Digital storage Oscilloscope (DSO). Front panel view of CRO & DSO.
2.	Material: Introduction, types and properties. Uses of Conducting, Semi-conducting and insulating materials.	Surface Mounting devices (SMD):- Front panel view of SMD station. IC package of SMD. Free hand drawing of Logic gates and circuits.
3.	Magnetism: Magnetic material, magnetic field, flux density, magnetic moment, m.m.f. Reluctance, permeability, susceptibility, electromagnet, solenoid and its practical applications.	Electrical Protective Devices:- Symbol of MCB (Miniature Circuit Breaker), ELCB (Earth Leakage Circuit Breaker), DOL starter, Relays.
4.	Pressure:- Pneumatic pressure, PSI, bar, atmospheric pressure, pressure gauge and absolute pressure, Heat treatment process.	Microcontroller:- Block diagram of 8051. Pin configuration of 8051.
5.	Indices: Laws of indices related problems. Quadratic Equation: Introduction, solution of simple Quadratic equation and related problems.	Modulation: - Block diagram of super Heterodyne Radio Receiver. Block diagram of AM and FM receiver. Sketches of analog and digital modulation waveforms
6.	Solution of simple A.C. circuit with R.L.C. Calculation of power factor etc.	Generator:- Front panel control for function Generator, IC tester, power supply, Remote control, In plane switching
7.	A.C Waveform Calculation: Calculation of r.m.s, average, instantaneous value, peak value. Peak to peak value, Frequency and wavelength calculation and their relationship	-----
8.	Series And Parallel Connection of Electrical and Electronic components: 1. Calculation Series and parallel connection of Resistors. 2. Calculation Series and parallel connection of Capacitors.	-----

	<p>3. Calculation Series and parallel connection of Inductors.</p> <p>4. Calculation Series and parallel connection of Batteries.</p> <p>Conversion of power flow to H.P.</p> <p>Calculation of KVA.</p>	
9.	<p>Power supply: Calculation of SMPS, regulation, Calculation of load and wattage for selection of UPS, calculate of back up time of Battery related to UPS and Load, calculate of voltage regulation , firing angle calculation of ripple factor, voltage regulation of DC voltage. Calculate the regulation of solar power.</p>	<p>Symbol of electronic component:-</p> <p>A. Thermocouple</p> <p>B. Strain Gauge</p> <p>C. LVDT(Linear variable differential transformer)</p> <p>D. Proximity Sensor</p> <p>E. Free hand sketches of computer ports</p>
10.	<p>Motor parameters & Calculation: Speed and frequency calculation of A.C motors, D.C motors.</p>	<p>DTH system:- Block diagram connections of Home system. Direct To Home (DTH).</p>
11.	<p>Modulation: AM/FM modulation index calculation, calculation of Bandwidth, Percentage of modulation in FM/AM.</p>	<p>Cell Phone:- Block diagram of cell phone receiver system.</p>
12.	<p>Number Systems: Introduction, Decimal, Binary, Octal, Hexadecimal, BCD code, ASCII code, Bit, Byte, KB, MB, GB, Conversion, Addition, Subtraction, Multiplication, Division, 1st and 2s complement method, 9s and 10s complement method.</p>	<p>Power supply: Block diagram of SMPS. Block diagram of UPS-ONLINE, OFFLINE, LINE INTERACTING.</p>
13.	<p>Boolean Algebra: Simplification of Boolean Algebra equations.</p>	<p>Project related Drawings:-</p> <p>A. Dancing LED's</p> <p>B. Smoke detector</p> <p>C. Mobile charger</p> <p>D. Metal detector</p>
14.	<p>Project costing: Project selection, cost of project, Simple estimation, simple problems on profit and loss , Balance sheet etc.</p>	<p>Solar power:- Solar power generation block diagram.</p>
15.	<p>Power transmission by shaft, belts and ropes.</p>	<p>Fibre optic communication:- Block diagram of fibre optic communication.</p>
16.	<p>Friction: Law of friction, co-efficient of friction, angle of friction, advantage and disadvantage of friction.</p>	<p>-----</p>
17.	<p>Force: Resolution and Composition of forces. Representation of forces by</p>	<p>-----</p>

	vectors, simple problems on lifting tackles like Jib wall, crane solution of problems with the aid of vectors, General condition of equilibrium for series of forces on a body.	
18.	Gravity: Centre of Gravity, simple experiments stable, unstable and neutral equilibrium.	-----

Skill India

कौशल भारत - कुशल भारत

9.2 EMPLOYABILITY SKILLS

Duration: 110 hrs.	
1. English Literacy	
Duration : 20 hrs Marks : 09	
Pronunciation	Accentuation (mode of pronunciation) on simple words, Diction (use of word and speech)
Functional Grammar	Transformation of sentences, voice change, change of tense, spellings.
Reading	Reading and understanding simple sentences about self, work and environment
Writing	Construction of simple sentences Writing simple English
Speaking/ Spoken English	Speaking with preparation on self, on family, on friends/ classmates, on known people, picture reading, gain confidence through role-playing and discussions on current happening job description, asking about someone's job, habitual actions. Cardinal (fundamental) numbers ordinal numbers. Taking messages, passing on messages and filling in message forms, greeting and introductions, office hospitality, resumes or curriculum vitae essential parts, letters of application reference to previous communication.
2. IT Literacy	
Duration : 20 hrs Marks : 09	
Basics of Computer	Introduction, computer and its applications, Hardware and peripherals, Switching on-Starting and shutting down computer.
Computer Operating System	Basics of Operating System, WINDOWS, User interface of Windows OS, Create, Copy, Move and delete Files and Folders, Use of External memory like pen drive, CD, DVD etc., Use of common applications.
Word Processing and Worksheet	Basic operating of Word Processing, Creating, opening and closing documents, Use of shortcuts, Creating and Editing Text, Formatting the text, Insertion & creation of tables. Printing document. Basics of Excel worksheet, understanding basic commands, creating simple worksheets, understanding sample worksheets, use of simple formulas and functions, Printing of simple excel sheets.
Computer Networking and Internet	Basic of computer Networks (using real life examples), Definitions of Local Area Network (LAN), Wide Area Network (WAN), Internet, Concept of Internet (Network of Networks), Meaning of World Wide Web (WWW), Web browser, Website, Web page and Search Engines. Accessing the Internet using web browser, Downloading and printing web pages, Opening an email account and use

	of email. Social media sites and its implication. Information Security and antivirus tools, Do's and Don'ts in Information Security, Awareness of IT - ACT, types of cyber crimes.
3. Communication Skills	
	Duration : 15 hrs Marks : 07
Introduction to Communication Skills	Communication and its importance Principles of Effective communication Types of communication - verbal, non verbal, written, email, talking on phone. Non-verbal communication-characteristics, components-Para-language Body language Barriers to communication and dealing with barriers. Handling nervousness/ discomfort.
Listening Skills	Listening-hearing and listening, effective listening, barriers to effective listening, guidelines for effective listening. Triple- A Listening - Attitude, Attention & Adjustment. Active Listening Skills.
Motivational Training	Characteristics essential to achieving success. The power of positive attitude. Self awareness Importance of commitment Ethics and values Ways to motivate oneself. Personal goal setting and employability planning.
Facing Interviews	Manners, etiquettes, dress code for an interview. Do's & Don'ts for an interview.
Behavioral Skills	Problem solving, confidence building, attitude.
4. Entrepreneurship Skills	
	Duration : 15 hrs Marks : 06
Concept of Entrepreneurship	Entrepreneur - Entrepreneurship - Enterprises:Conceptual issue Entrepreneurship vs. management, Entrepreneurial motivation. Performance & Record, Role & Function of entrepreneurs in relation to the enterprise & relation to the economy, Source of business ideas, Entrepreneurial opportunities, andthe process of setting up a business.
Project Preparation & Marketing Analysis	Qualities of a good Entrepreneur, SWOT and Risk Analysis. Concept & application of PLC, Sales & distribution management. Differencebetween small scale &large scale business, Market survey, Method of marketing, Publicity and advertisement, Marketing mix.

Institution's Support	Preparation of project. Role of various schemes and Institutes for self-employment i.e. DIC, SIDA, SISI, NSIC, SIDO, Idea for financing/ non-financing support agencies to familiarize with the Policies/Programmes & procedure & the available scheme.
Investment Procurement	Project formation, feasibility, Legal formalities i.e., Shop Act, Estimation & costing, Investment procedure - Loan procurement - Banking processes.
5. Productivity	
Duration : 10 Hrs. Marks : 05	
Benefits	Personal/ Workman - Incentive, Production linked Bonus, Improvement in living standard.
Affecting Factors	Skills, Working Aids, Automation, Environment, Motivation- How it improves or slows down productivity.
Comparison with Developed Countries	Comparative productivity in developed countries (viz. Germany, Japan and Australia) in selected industries e.g. Manufacturing, Steel, Mining, Construction etc. Living standards of those countries, wages.
Personal Finance Management	Banking processes, Handling ATM, KYC registration, Safe cash handling, Personal risk and insurance.
6. Occupational Safety, Health and Environment Education	
Duration : 15 hrs Marks : 06	
Safety & Health	Introduction to occupational safety and health importance of safety and health at workplace.
Occupational Hazards	Basic Hazards, Chemical Hazards, Vibroacoustic Hazards, Mechanical Hazards, Electrical Hazards, Thermal Hazards. Occupational health, Occupational hygiene, Occupational Diseases/ Disorders & its prevention.
Accident & Safety	Basic principles for protective equipment. Accident prevention techniques - control of accidents and safety measures.
First-Aid	Care of injured & sick at the workplaces, First-Aid & Transportation of sick person.
Basic Provisions	Idea of basic provision legislation of India. Safety, health, welfare under legislative of India.
Ecosystem	Introduction to Environment. Relationship between society and environment, Ecosystem and factors causing imbalance.

Pollution	Pollution and pollutants including liquid, gaseous, solid and hazardous waste.
Energy Conservation	Conservation of energy, re-use and recycle.
Global Warming	Global warming, climate change and Ozone layer depletion.
Ground Water	Hydrological cycle, Ground and surface water, Conservation and Harvesting of water.
Environment	Right attitude towards environment, Maintenance of in-house environment.
7. Labour Welfare Legislation	
Duration : 05 hrs Marks : 03	
Welfare Acts	Benefits guaranteed under various acts- Factories Act, Apprenticeship Act, Employees State Insurance Act (ESI), Payment Wages Act, Employees Provident Fund Act, The Workmen's Compensation Act.
8. Quality Tools	
Duration : 10 hrs. Marks : 05	
Quality Consciousness	Meaning of quality, Quality characteristic.
Quality Circles	Definition, Advantage of small group activity, Objectives of quality circle, Roles and function of quality circles in organization, Operation of quality circle. Approaches to starting quality circles, Steps for continuation quality circles.
Quality Management System	Idea of ISO 9000 and BIS systems and its importance in maintaining qualities.
House Keeping	Purpose of House-keeping, Practice of good housekeeping.
Quality Tools	Basic quality tools with a few examples.

कौशल भारत - कुशल भारत

List of Tools & Equipment			
ELECTRONICS MECHANIC (for batch of 24 candidates)			
S No.	Name of the Tools and Equipment	Specification	Quantity
A. TRAINEES TOOL KIT (For each additional unit trainees tool kit Sl. 1-12 is required additionally)			
1.	Connecting screwdriver	10 X 100 mm	*12 Nos.
2.	Neon tester 500 V.	500 V	*8 Nos.
3.	Screw driver set	Set of 7	*12 Nos.
4.	Insulated combination pliers	150 mm	*8 Nos.
5.	Insulated side cutting pliers	150mm	*10 Nos.
6.	Long nose pliers	150mm	*8 Nos.
7.	Soldering iron	25 Watt, 240 Volt	*12 Nos.
8.	Electrician knife	100 mm	*8 Nos.
9.	Tweezers	150 mm	*12 Nos.
10.	Digital Multimeter	(3 3/4 digit) ,4000 Counts	*12 Nos.
11.	Soldering Iron Changeable bits	15 Watt, 240 Volt	*8 Nos.
12.	De- soldering pump electrical heated, manual operators	230 V, 40 W	*12 Nos.
B. SHOP TOOLS, INSTRUMENTS – For 2 (1+1) units no additional items are required			
Lists of Tools:			
13.	Steel rule graduated both in Metric and English Unit	300 mm,	4 Nos.
14.	Precision set of screw drivers	T5, T6, T7	2 Nos.
15.	Tweezers – Bend tip		2 Nos.
16.	Steel measuring tape	3 meter	4 Nos.
17.	Tools makers vice	100mm (clamp)	1 Nos.
18.	Tools maker vice	50mm (clamp)	1 Nos.
19.	Crimping tool (pliers)	7 in 1	2 Nos.
20.	Magneto spanner set	8 Spanners	2 Nos.
21.	File flat bastard	200 mm	2 Nos.
22.	File flat second cut	200 mm	2 Nos.
23.	File flat smooth	200 mm	2Nos.

24.	Plier - Flat Nose	150 mm	4 Nos.
25.	Round Nose pliers	100 mm	4 Nos.
26.	Scriber straight	150 mm	2 Nos.
27.	Hammer ball pen	500 grams	1 No.
28.	Allen key set (Hexagonal -set of 9)	1 - 12 mm, set of 24 Keys	1 No.
29.	Tubular box spanner	Set - 6 - 32 mm	1 set.
30.	Magnifying lenses	75 mm	2 Nos.
31.	Continuity tester		6 Nos.
32.	Hacksaw frame adjustable	300 mm	2 Nos.
33.	Chisel - Cold - Flat	10 mm X 150 mm	1 No.
34.	Scissors	200mm	1 No.
35.	Handsaw 450mm	Hand Saw - 450 mm	1 No.
36.	Hand Drill Machine Electric with Hammer Action	13 mm	2 Nos.
37.	First aid kit		1 No.
38.	Bench Vice	Bench Vice - 125 mm	1 No. each
		Bench Vice - 100 mm	
		Bench Vice - 50 mm	
List of Equipments			
39.	Dual DC regulated power supply	30-0-30 V, 2 Amps	4 Nos.
40.	DC Regulated Variable Programmable DC Power Supply	0-30V/3A	2 Nos.
41.	LCR meter (Digital) Handheld		1 No.
42.	CRO Dual Trace	20 MHz (component testing facilities)	2 Nos.
43.	Signal Generator with Digital Display for Frequency Amplitude	10 Hz to 100 KHz, 50/600 Ohms (output impedance)	2 Nos.
44.	Battery Charger	0 - 6 - 9 - 12 - 24 - 48 V, 30 Amp	1 No.
45.	Analog multimeter		4 Nos.
46.	Clamp meter	0 - 10 A	2 Nos.
47.	Function generator (DDS Technology (Sine, Square, Triangle, Ramp, Pulse, Serial Data, TTL and Modulation.))	1 mHz -10 MHz Function-Pulse – Modulation Generator with Built in 40MHz Frequency Counter	2 Nos.
48.	Dimmer starter	3 Amps	2 Nos.

49.	Autotransformer	15 Amps	2 Nos.
50.	Analog Component Trainer	Breadboard for Circuit design with necessary DC /AC power supply: Sine, Square, Triangle Modulating Signal Generator and Simulation Software	4 Nos.
51.	Milli Ammeter (AC)	0 – 200 mA	2 Nos.
52.	Milli Ammeter (DC)	0 – 500 mA	2 Nos.
53.	Op Amp trainer		2 Nos.
54.	Digital IC Trainer	Breadboard for Circuit design with necessary DC Power Supply, Graphical LCD, Clock Frequency 4 different steps, Data Switches: 8 Nos, LED Display: 8 Nos. (TTL), Seven Segment Display, Teaching Simulation Software	4 Nos.
55.	Digital IC Tester		1 No.
56.	Digital and Analog Bread Board Trainer	DC/AC Power Supply, Sine/ Square/ TTL Generator Data Switches, LED indication, LED Display: 8 in Nos Simulation/Teaching Content through software	6 Nos.
57.	Rheostats various values and ratings		2 Nos. each
58.	POWER ELECTRONICS TRAINER with at least 6 no's of application board MOSFET Characteristics SCR Characteristics SCR Lamp Flasher SCR Alarm Circuit Series Inverter Single Phase PWM Inverter		4 No.
59.	Computers in the assembled		4 Nos.

	form (including cabinet, motherboards, HDD, DVD, SMPS, Monitor, KB, Mouse, LAN card, Blu-Ray drive and player), MS Office education version.		
60.	Laptops latest configuration		1 No.
61.	Laser jet Printer		1 No.
62.	INTERNET BROADBAND CONNECTION		1 No.
63.	Electronic circuit simulation software with 6 user licenses	Circuit Design and Simulation Software with PCB Design with Gerber and G Code Generation, 3D View of PCB, Breadboard View, Fault Creation and Simulation.	1 No.
64.	Different types of electronic and electrical cables, connectors, sockets, terminations.		As required
65.	Different types of Analog electronic components, digital ICs, power electronic components, general purpose PCBs, bread board, MCB, ELCB		As required
66.	DSO (colour)	4 Channel , 50MHz Real Time Sampling 1G Samples/Sec, 12 Mpts Memory with PC Interface USB, LAN and math function includes +, -, FFT, differential, integral, abs, log etc.	1 No.
67.	Soldering & De soldering Station		1 No.
68.	SMD Soldering & De soldering Station with necessary accessories		2 Nos.
69.	DOL starter		1 No.
70.	AC Motor Trainer Kit ¼ HP motor		1 No.

	Single Phase Contactors Relays MCB DOL Starter		
71.	Frequency modulator and Demodulator trainer kit	FM Modulator Type : Reactance Modulator, Varactor Modulator, VCO Based Modulator FM Demodulator type All 5 demodulation techniques Detailed teaching and learning contents through software.	2 Nos.
72.	PAM, PPM,PWM trainer kit		2 Nos.
73.	AM/FM Commercial radio receivers		2 Nos.
74.	Microcontroller kits (8051) along with programming software (Assembly level Programming)	Core 8051, ready to run programmer for AT89C51/52 & 55, programming modes Key Pad and PC circuits. Detailed learning content through simulation Software.	4 Nos.
75.	Application kits for Microcontrollers 6 different applications	1. Input Interface : 4x4 Matrix Keypad, ASCII Key PAD, Four Input Switch 2. Display Module 16X2 LCD, Seven Segment, LED Bar Graph 3. ADC/DAC Module with most popular DC/DAC0808 4. PC Interface: RS232 & USB 5. Motor Drive: DC, Servo, Stepper 6. DAQ: Data Acquisition to sense different sensors signals	1 set
76.	Sensor Trainer Kit Containing following Sensors 1. Thermocouple 2. RTD 3. Load Cell/ Strain Gauge 4. LVDT 5. Smoke Detector Sensors 6. Speed Sensor	Graphical touch LCD with inbuilt processor for viewing the output waveforms, In built DAQ, and standard processing circuits like Inverting , Non – Inverting , Power, Current , Instrumentation Differential Amplifier, F/V,V/F,V/I,I/V Converter,	2 Nos.

	7. Limit Switch 8. Photo sensors 9. Optocoupler 10. Proximity Sensor	Sensors :RTD,NTC Thermistor,LM35 Thermocouple, Gas(Smoke) Sensor, Load cell, LVDT Sensor, Speed Sensor	
77.	Various analog and digital ICs useful for doing project works mentioned in the digital and analog IC applications modules		As required
78.	Different types of electronic and electrical cables, connectors, sockets, terminations.		As required
79.	Fiber optic communication trainer	Full Duplex Analog & Digital Trans-receiver with 660nm & 950nm, Noise Generator with variable gain, Four Seven Segment Display BER Counter, Eye Pattern.	2 Nos.
80.	Seven segment DPM trainer		6 Nos.
81.	LCD based DPM		6 Nos.
82.	SMPS of different make		4 Nos.
83.	UPS trainer	PWM switching technology, Test points to measures the voltages of different sections Overall functioning of UPS Trainer, AVR transformer, UPS with load condition	1No.
84.	UPS 3 KVA with backup time minimum 30 minutes		1 No.
85.	Mobile phone Trainer	2G /3G/4G Dual SIM GSM Handset. Frequency measurement and band verification. Real time Mobile Operation	1 No.
86.	Smart phones of different make (android/Windows)		4 Nos.
87.	Cell phone power source with charger chords for different cell		As required

	phones		
88.	LCD TV (Trainer kit)	21-inch full HD LCD Color Television should support PAL/ NTSC video formats Complete block diagram of a LCD TV system, Study board indicating various sections of LCD TV along with the test points and switch faults	1 No.
89.	LCD TV (21")		2 Nos.
90.	LED TV (Trainer kit)	20-inch full HD LED Color Television, PAL/ NTSC video formats, complete block diagram of a LED TV system ,Study board indicating various sections of LED TV along with the test points and switch faults Trouble shooting in different sections.	1 No.
91.	LED TV (21")		2 Nos.
92.	Home theatre system		1No.
93.	Solar Training Kit/ Simulator	With built in meters for DCV, DCA, AC multifunction Meter (for ACI, ACV, Power, Frequency), Protection Circuits, BS-10 terminals for making the connection, Single/ Dual axis tracking system Charge Controller : PWM based MPPT, Charging Stage : Bulk, Absorptions and Float	1 No.
94.	LED lighting system	Measurement of Power, Voltage, Current, Power Factor and Light output performance of different lighting products like LED, CFL at variable input voltages 0 to 245V variable AC	2 sets
C. Shop Floor Furniture and Materials - For 2 (1+1) units no additional items are required.			
95.	Instructor's table		1 No.

96.	Instructor's chair		2 Nos.
97.	Metal Rack	100cm x 150cm x 45cm	4 Nos.
98.	Lockers with 16 drawers standard size		2 Nos.
99.	Steel Almirah	2.5 m x 1.20 m x 0.5 m	2 Nos.
100.	Black board/white board		1 No.
101.	Fire Extinguisher		2 Nos.
102.	Fire Buckets		2 Nos.

Note: -

1. All the tools and equipment are to be procured as per BIS specification.
2. Quantity marked with * has been increased as per the batch size.
3. Internet facility is desired to be provided in the class room.

Skill India

कौशल भारत - कुशल भारत

Tools & Equipment for Employability Skills		
S No.	Name of the Equipment	Quantity
1	Computer (PC) with latest configurations and Internet connection with standard operating system and standard word processor and worksheet software	*12 nos.
2	UPS - 500Va	*12 nos.
3	Scanner cum Printer	1 no.
4	Computer Tables	*12 nos.
5	Computer Chairs	*24 nos.
6	LCD Projector	1 no.
7	White Board 1200mm x 900mm	1 no.

Note: Above Tools & Equipment not required, if Computer LAB is available in the institute.

Skill India

कौशल भारत - कुशल भारत

FORMAT FOR INTERNAL ASSESSMENT

Name & Address of the Assessor:			Year of Enrollment:											
Name & Address of ITI (Govt./Pvt.):			Date of Assessment:											
Name & Address of the Industry:			Assessment location: Industry / ITI											
Trade Name:		Examination:		Duration of the Trade/course:										
Learning Outcome:														
S No.	Maximum Marks (Total 100 Marks)		15	5	10	5	10	10	5	10	15	15	Total Internal Assessment Marks	Result (Y/N)
	Candidate Name	Father's/Mother's Name	Safety Consciousness	Workplace Hygiene & Economical use of materials	Attendance/ Punctuality	Ability to follow Manuals/ Written instructions	Application of Knowledge	Skills to Handle Tools/ Equipment/ Instruments/ Devices	Economical use of Materials	Working Strategy	Quality in Workmanship/ Performance	VIVA
