
Short blurb for website / Intro for Announcer

As we pursue our new ambition to make India a developed country, “Viksit Bharat,” by 2047, skill development will play a crucial role in helping young people join the workforce and contribute to nation building.

In an effort towards this, the Ministry of Skill Development and Entrepreneurship is launching an upgraded Employability Skills curriculum on Tuesday, September 6th 2022. This 120 hour curriculum covers 12 modules on career development, digital literacy, work readiness, self-employment, citizenship and other key 21st century skills that aids young people’s transition into the world of work.

The curriculum has multiple variants to enable it’s integration across short-term and long-term skilling programs offered by the Ministry. Alongside the student workbook, there are manuals that provide the trainers and facilitators with a robust pedagogy for effective teaching.

This upgraded curriculum has been developed by the [Ministry of Skill Development and Entrepreneurship](#), [National Skills Development Council](#) and [Quest Alliance](#), with support from the [National Instructional Media Institute](#) and the [Future Right Skills Network](#). [The Future Right Skills Network is a collaboration facilitated by Quest Alliance and funded by Accenture, Cisco and J.P. Morgan.](#)
