1. COURSE INFORMATION

During the one-year duration of Software Testing Assistant trade a candidate is trained on professional skill, professional knowledge and Employability skill related to job role. In addition to this a candidate is entrusted to undertake project work and extra-curricular activities to build up confidence. The broad components covered under Professional Skill subject are as below:-

The trainee learns to practice with Operating Systems (Windows, Linux) and with all the system applications. Practice with all the functions of Word Processing and Spreadsheet Software. Create customized database files using Microsoft Access. Configure network connection and browsing Internet. Design web pages using HTML programming and WYSIWYG web design tools. Implement Information Security, Security Threats, Security Vulnerabilities and Risk Management. Design and develop web pages using JavaScript programming. At the end of this year trainees can go on industrial visit or projects specified in the syllabus.

The trainee learns to Perform Software Testing using different techniques. Implement Quality Methods in Software Testing. Apply manual testing techniques in Software Testing. Perform automatic test execution using Windows automated software testing tool WinRunner. Perform automatic test execution using Windows automated software testing tool LoadRunner. Perform automatic test execution using Web automated software testing tool Selenium IDE. At the end of year the trainees can go on industrial visit or projects specified in the syllabus.

2.1 GENERAL

Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer programmes of DGT for strengthening vocational training.

'Software Testing Assistant' trade under CTS is one of the most popular course delivered nationwide through network of ITIs. The course is of one year duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory & Practical) imparts professional skills and knowledge, while Core area (Employability Skills) imparts requisite core skill, knowledge and life skills. After passing out the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Trainees need to demonstrate broadly that they are able to:

- Read and interpret technical parameters / documentation, plan and organize work processes, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations.
- Apply professional knowledge& employability skills while performing the job and modification& maintenance work.
- Check the system specification and application software as per requirement of the design of job.
- Document the technical parameter related to the task undertaken.

2.2 PROGRESSION PATHWAYS

- Can join industry as Technician and will progress further as Senior Technician, Supervisor and can rise up to the level of Manager.
- Can become Entrepreneur in the related field.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).
- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming an instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

2.3 COURSE STRUCTURE

Table below depicts the distribution of training hours across various course elements during a period of one year: -

S No.	Course Element	Notional Training Hours
1.	Professional Skill (Trade Practical)	1200
2.	Professional Knowledge (Trade Theory)	240
3.	Employability Skills	160
	Total	1600

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of the course and at the end of the training program as notified by the DGT from time to time. The employability skills will be tested in the first year itself.

- a) The Continuous Assessment (Internal) during the period of training will be done by **Formative Assessment Method** by testing for assessment criteria listed against learning outcomes. The training institute has to maintain an individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in
- b) The final assessment will be in the form of summative assessment. The All India Trade Test for awarding NTC will be conducted by Controller of examinations, DGT as per the guidelines. The pattern and marking structure is being notified by DGT from time to time. **The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The examiner during final examination will also check** the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects is 33%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence				
(a) Weightage in the range of 60%-75% to be all	otted during assessment				
For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices	 Demonstration of good skills and accuracy in the field of work/ assignments. A fairly good level of neatness and consistency to accomplish job activities. Occasional support in completing the task/ job. 				
(b) Weightage in the range of 75%-90% to be a	(b) Weightage in the range of 75%-90% to be allotted during assessment				
For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with little guidance, and regard for safety	 Good skill levels and accuracy in the field of work/ assignments. A good level of neatness and consistency to accomplish job activities. 				

procedures and practices

• Little support in completing the task/job.

(c) Weightage in the range of more than 90% to be allotted during assessment

For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.

- High skill levels and accuracy in the field of work/ assignments.
- A high level of neatness and consistency to accomplish job activities.
- Minimal or no support in completing the task/job.

Test Engineer-Software Products; are responsible for development and co-ordination of scheduled and unscheduled test plans and conducting software compatibility tests with programs, hardware, operating systems, or network environments. The job involves documenting, reporting and tracking software defects using manual testing software.

Test Engineer-IT Services; is responsible for development and co-ordination of scheduled and unscheduled test plans and conducting software compatibility tests with programs, hardware, operating systems, or network environments. The job involves documenting, reporting and tracking software defects using manual testing software.

- b) 2519.0302 Test Engineer-IT Services

Name of the Trade	SOFTWARE TESTING ASSISTANT	
Trade Code	DGT/1119	
NCO - 2015	2519.0402, 2519.0302	
NSQF Level	Level - 5	
Duration of Craftsmen Training	One Year (1600 Hours)	
Entry Qualification	Passed 12 th class examination with Science & Mathematics	
Minimum Age	14 years as on first day of academic session.	
Eligibility for PwD	LD, CP, LC, DW, LV, AA	
Unit Strength (No. Of Student)	24(There is no separate provision of supernumerary seats)	
Space Norms	70 Sq. m	
Power Norms	3.45 KW	
Instructors Qualification f	or	
1. Software Testing Assistant	B.Voc/Degree in Engineering in Computer Science/ IT, MCA from AICTE/UGC recognized University with one year experience in relevant field. OR	
	Diploma (Minimum 2 years) in Computer Science/ IT, BCA, NIELIT A Level from recognized Board of education or relevant Advanced Diploma (Vocational) from DGT with two years experiences in relevant field. OR NTC/ NAC passed in Software Testing Assistant trade with Three years experiences in relevant field. Essential Qualification: Relevant National Craft Instructor Certificate (NCIC) in any of the variants under DGT.	
	Out of two Instructors required for the unit of 2 (1+1), one	

must have Degree/ Diploma and other must have NTC/ NA				st have NTC/ NAC
		qualifications. However, both of them must possess NCIC in		
		any of its variants.		
2. Employability Skill		MBA/ BBA / Any Graduate/ Diploma in any discipline with Two years' experience with short term ToT Course in Employability Skills from DGT institutes.		
		(Must have studied English/ Communication Skills and Basic Computer at 12th / Diploma level and above) OR		
		Existing Social Studies Instructors in ITIs with short term ToT Course in Employability Skills from DGT institutes.		
3. Minimum Age for		21 Years		
Instructor				
List of Tools & Equipment		As per Annexure-I		
Distribution of training or		n Hourly basis: (Indicative	only)	
Total Hrs /week		Trade Practical	Trade Theory	Employability Skills
40 Hours		30 Hours	6 Hours	4 Hours

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOMES (TRADE SPECIFIC)

- 1. Work with Operating Systems (Windows, Linux) and with all the system applications following safety precautions.
- 2. Explore all the functions of Word Processing and Spreadsheet Software.
- 3. Plan and create customized database files using Microsoft Access.
- 4. Configure network connection for browsing Internet.
- 5. Design web pages using HTML programming and WYSIWYG web design tools.
- 6. Implement Information Security, Security Threats, Security Vulnerabilities and Risk Management.
- 7. Design and develop web pages using JavaScript programming.
- 8. Perform Software Testing using different techniques.
- 9. Implement Quality Methods in Software Testing.
- 10. Apply manual testing techniques in Software Testing.
- 11. Perform automatic test execution using Windows automated software testing tool WinRunner.
- 12. Perform automatic test execution using Windows automated software testing tool LoadRunner.
- 13. Perform automatic test execution using Web automated software testing tool Selenium IDE.

Testing.		White Box Testing.			
		Black Box Testing.			
		Performance Testing.			
11.	Perform automatic test	Exploring the WinRunner Window.			
	execution using	Spying on GUI map mode.			
	Windows automated	Using the Rapid Test script wizard.			
	software testing tool	Recording a context sensitive test.			
	WinRunner.	Recording in analogy mode.			
		Changing the synchronization setting.			
		Running the synchronized test.			
		Adding bitmap checkpoints to a test script.			
		Running the test on a new version.			
		Using the function generator to insert functions.			
		Debugging the test script.			
		Converting your test to a data driven test.			

		Adjusting the script with regular information.
		Reading text from an application.
		Teaching fonts to win runner.
		Programming a batch test.
		Analysing the batch test results.
		Editing object descriptions in the GUI map adding GUI objects to the
		GUI map.
		Updating the GUI map with the run wizard.
12.	Perform automatic test	The LoadRunner controller at a glance.
	execution using	Configuring a scenario.
	Windows automated	Configuring a host.
	software testing tool	Managing scenarios using test director.
	LoadRunner.	Runtime and transaction online monitors.
		Web performance monitors.
		Exporting analysis data.
		Analysing scenario performance.
13.	Perform automatic test	Installing the IDE.
	execution using Web	Menu Bar, Toolbar, Case Pane.
	automated software	Building Test Cases.
	testing tool Selenium	Editing, Insert Command, Table View.
	IDE.	Table View, Source View, Opening and Saving a Test Case.
		Selenium Commands - "Selenese".
		Commonly used Selenium Commands.
		Verify text present, verify element present.
		Location by Identifier, Location by Id.
		Location by DOM, Location by CSS.
		Globbing Patterns, Regular Expression Patterns, Exact Patterns.
		The wait for Commands in AJAX applications.
		JavaScript Usages with Script Parameters
		Alert, Popups and Multiple Windows.
		Stepping Through a Test case.
		Executing Selenium-IDE Tests on Different Browsers.

Creating Data-Driven Tests	
106. How do you create data-	
driven tests? (02 hrs)	
107. Converting your test to a	
data driven test. (02 hrs)	
108. Adding data to the data	
table. (02 hrs)	
109. Adjusting the script with	
regular information. (02	
hrs)	

110 Punning the test and	
110. Running the test and	
analysing result. (02 hrs)	
111. Data driven testing tips.	
(02 hrs)	
Reading Text	
112. How do you read text from	
an application? (02 hrs)	
113. Reading text from an	
application. (02 hrs)	
114. Teaching fonts to win	
runner. (02 hrs)	
115. Verifying text. (02 hrs)	
116. Running the test on a new	
version. (02 hrs)	
117. Text checkpoint tips. (02	
hrs)	
Creating Batch Tests	
118. What is a batch test? (03	
hrs)	
119. Programming a batch test.	
(06 hrs)	
120. Running the batch test on	
version IB. (03 hrs)	
121. Analysing the batch test	
results. (03 hrs)	
122. Batch test tips. (03 hrs)	
Maintaining Your Test Scripts	
123. What happens when the	
user interface changes?	
(03 hrs)	
124. Editing object descriptions	
in the GUI map adding GUI	
objects to the GUI map.	
(06 hrs)	
125. Updating the GUI map	
with the run wizard. (03	
hrs)	
,	

Professional Skill 150 Hrs;	Perform automatic test execution	LoadRunner (Windows Automated Testing Tool)	Tools to Automate Testing • Selecting tools.
Professional Skill 150 Hrs; Professional Knowledge 30 Hrs		Automated Testing Tool) 126. Load test planning. (06 hrs) 127. The LoadRunner controller at a glance. (06 hrs) 128. Creating a scenario.
