1. COURSE INFORMATION

During the one-year duration of Solar Technician (Electrical) trade a candidate is trained on professional Skill, professional Knowledge and Employability Skill related to job role. In addition to this a candidate is entrusted to undertake project work and extracurricular activities to build up confidence. The broad components covered under Professional Skill subject are as below:-

During the course the trainee learns about safety and environment, use of fire extinguishers, artificial respiratory resuscitation to begin with. He gets the idea of trade tools & its standardization, identifies different types of conductors, cables & their skinning & joint making. Basic electrical laws and their application in different combinations of electrical circuit are practiced along with laws of magnetism. Performs testing by various Electrical Instruments like Wattmeter, Energy meter, etc. Performs basic Electric energy calculations and understand transmission and distribution of electrical power. The Trainee understands natural planetary movements and sunlight's path. Measures intensity of solar radiation, analyzes shadow effect on incident solar radiation, plots curve of radiation measured and draws a solar map with respect to time for a location. The Trainee learns about characteristics of Photovoltaic cells and modules, Batteries, Charge Controllers and constructs small Solar DC appliances. The Trainee learns to arrange and test solar batteries and their correct disposal. Learns connections and testing of Solar Panel, Charge Controller, Battery Bank and Inverter. Learns types of Inverters used in the Solar system and their application according to the requirements of the project. Prepares bill of material for small, medium and mega solar projects. Plan and prepares reports on building integrated solar mount. Installation and commissioning of Solar PV plant and hybrid plants. The Trainee learns various tests pertaining to PV Modules and their installation as per IEC standards. Understands manufacturing process of solar panels, prepare and commission marketable solar products viz., solar water pump, solar street light, solar fertilizer sprayer etc. The Trainee learns about electrical maintenance of Inverters/Cables/Junction boxes, inspection of mounting structure of solar modules and replacement of defective fixtures.

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under the aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

CTS courses are delivered nationwide through network of ITIs. The course 'Solar Technician (Electrical)' is of one-year duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory and Trade Practical) imparts professional skills and knowledge, while Core area (Workshop calculation & science, Engineering Drawing and Employability Skills) imparts requisite core skill, knowledge and life skills. After passing out of the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Trainee broadly needs to demonstrate that they are able to:

- Read and interpret technical parameters/ documentation, plan and organize work processes, identify necessary materials and tools.
- Perform tasks with due consideration to safety rules, accident prevention regulations and environmental protection stipulations.
- Apply professional knowledge & employability skills while performing the job and modification & maintenance work.
- Check the circuit/ equipment/ panel as per drawing for functioning, identify and rectify faults/ defects.
- Document the technical parameters related to the task undertaken.

2.2 PROGRESSION PATHWAYS

- Can join industry as Technician and will progress further as Senior Technician, Supervisor and can rise up to the level of Manager.
- Can become Entrepreneur in the related field.
- Can join Apprenticeship Programmes in different types of industries leading to a National Apprenticeship Certificate (NAC).
- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming an instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

2.3 COURSE STRUCTURE

Table below depicts the distribution of training hours across various course elements during a period of one-year:

S No.	Course Element	Notional Training Hours
1.	Professional Skill (Trade Practical)	1000
2.	Professional Knowledge (Trade Theory)	280
3.	Workshop Calculation & Science	80
4.	Engineering Drawing	80
5.	Employability Skills	160
	Total	1600

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

a) The **Continuous Assessment** (Internal) during the period of training will be done by **Formative Assessment Method** by testing for assessment criteria listed against learning outcomes. The training institute has to maintain an individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in.

b) The final assessment will be in the form of summative assessment. The All India Trade Test for awarding NTC will be conducted by Controller of examinations, DGT as per the guidelines. The pattern and marking structure is being notified by DGT from time to time. **The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The examiner during final examination will also check** the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% for all other subjects is 33%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60%-75% to be allotted during assessment	
For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices.	<ul style="list-style-type: none"> • Demonstration of good skill in the use of hand tools, machine tools and workshop equipment. • 60-70% accuracy achieved while undertaking different work with those demanded by the component/job. • A fairly good level of neatness and consistency in the finish. • Occasional support in completing the project/job.
(b) Weightage in the range of 75%-90% to be allotted during assessment	
For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with	<ul style="list-style-type: none"> • Good skill levels in the use of hand tools, machine tools and workshop equipment. • 70-80% accuracy achieved while

<p>little guidance, and regard for safety procedures and practices.</p>	<p>undertaking different work with those demanded by the component/job.</p> <ul style="list-style-type: none"> • A good level of neatness and consistency in the finish. • Little support in completing the project/job.
<p>(c) Weightage in the range of more than 90% to be allotted during assessment</p>	
<p>For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.</p>	<ul style="list-style-type: none"> • High skill levels in the use of hand tools, machine tools and workshop equipment. • Above 80% accuracy achieved while undertaking different work with those demanded by the component/job. • A high level of neatness and consistency in the finish. • Minimal or no support in completing the project.

Solar Panel Installation Technician; is also known as ‘Panel Installer’, the Solar Panel Installation Technician is responsible for installing solar panels at the customers’ premises. The individual at work checks the installation site, understands the layout requirement as per design, assesses precautionary measures to be taken, installs the solar panel as per customer’s requirement and ensures effective functioning of the system post installation.

Solar PV System Installation Engineer; is responsible for designing and installing the solar photovoltaic system at the customer’s premises to meeting their power requirement. The individual at work evaluates the installation site, designs the installation, plans and arranges for materials, and ensures smooth installation process. The individual also supervises the installation technicians’ work.

Solar PV System Maintenance Technician; is responsible for maintenance and effective functioning of the installed solar panels. The individual at work cleans the installed solar modules, checks the photovoltaic system for uninterrupted power output and identifies faults in the PV system.

Module Assembly Technician; is responsible for fixing frames and junction box in the solar module. The individual at work prepares the solar module for final assembly, frames the module and fixes the junction box with cables on the rear side of the module. The individual is also responsible for connecting the tabbing wire from the module to the junction box and soldering them.

Reference NCO-2015:

- a) 7421.1401 – Solar Panel Installation Technician
- b) 7421.1402 – Solar Photo Voltaic System Installation Technician
- c) 7421.1403 – PV System Installation Engineer
- d) 8212.2301 – Module Assembly Technician

4. GENERAL INFORMATION

Name of the Trade	SOLAR TECHNICIAN (ELECTRICAL)
Trade Code	DGT/2003
NCO - 2015	7421.1401, 7421.1402, 7421.1403, 8212.2301
NSQF Level	Level 4
Duration of Craftsmen Training	One Year (1600 Hours)
Entry Qualification	Passed 10 th class examination with Science and Mathematics or its equivalent.
Minimum Age	14 years as on first day of academic session.
Eligibility for PwD	LD, LC, DW, AA, DEAF, LV, HH
Unit Strength (No. Of Student)	20 (There is no separate provision of supernumerary seats)
Space Norms	50 Sq. m
Power Norms	3 KW
Instructors Qualification for	
(i) Solar Technician (Electrical) Trade	<p>B.Voc/Degree in Electrical/ Electrical and Electronics Engineering from AICTE/UGC recognized Engineering College/ university with one-year experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>03 years Diploma in Electrical/ Electrical and Electronics Engineering from AICTE/ recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>NTC/NAC passed in the Trade of "Solar Technician (Electrical)" With three years experience in the relevant field.</p> <p>Essential Qualification: Relevant National Craft Instructor Certificate (NCIC) in any of the variants under DGT.</p> <p>NOTE: Out of two Instructors required for the unit of 2(1+1), one must have Degree/Diploma and other must have NTC/NAC qualifications. However both of them must possess NCIC in any of its variants.</p>

<p>(ii) Workshop Calculation & Science</p>	<p>B.Voc/Degree in Engineering from AICTE/UGC recognized Engineering College/ university with one-year experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>03 years Diploma in Engineering from AICTE/ recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>NTC/ NAC in any one of the engineering trades with three years' experience.</p> <p><u>Essential Qualification:</u> National Craft Instructor Certificate (NCIC) in relevant trade.</p> <p style="text-align: center;">OR</p> <p>NCIC in RoDA or any of its variants under DGT.</p>
<p>(iii) Engineering Drawing</p>	<p>B.Voc/Degree in Engineering from AICTE /UGC recognized Engineering College/ university with one-year experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>03 years Diploma in Engineering from AICTE/ recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>NTC/ NAC in any one of the Engineering trades with three years experience.</p> <p><u>Essential Qualification:</u> National Craft Instructor Certificate (NCIC) in relevant trade.</p> <p style="text-align: center;">OR</p> <p>NCIC in RoDA / D'man (Mech /civil) or any of its variants under DGT.</p>
<p>(iv) Employability Skill</p>	<p>MBA/ BBA / Any Graduate/ Diploma in any discipline with Two years' experience with short term ToT Course in Employability Skills from DGT institutes.</p> <p>(Must have studied English/ Communication Skills and Basic Computer at 12th / Diploma level and above)</p> <p style="text-align: center;">OR</p> <p>Existing Social Studies Instructors in ITIs with short term ToT Course in Employability Skills from DGT institutes.</p>

(v) Minimum Age for Instructor		21 Years			
List of Tools and Equipment		As per Annexure – I			
Distribution of training on Hourly basis: (Indicative only)					
Total Hrs /week	Trade Practical	Trade Theory	Engg. Drawing	Workshop Calc. & Science	Employability Skills
40 Hours	25 Hours	7 Hours	2 Hours	2 Hours	4 Hours

5. LEARNING OUTCOME

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOME (TRADE SPECIFIC)

1. Prepare profile with an appropriate accuracy as per drawing following safety precautions.
2. Prepare electrical wire joints, carry out soldering and crimping.
3. Construct and test various characteristics of electrical and magnetic circuits.
4. Assemble, install and test wiring system.
5. Use instruments for measurement of various electrical parameters.
6. Perform basic Electric energy calculations and understand transmission and distribution of electrical power.
7. Verify natural planetary movements and sunlight's path.
8. Demonstrate characteristics of Photovoltaic cells, Modules, Batteries and Charge controllers.
9. Construct and demonstrate Solar DC appliances.
10. Connect, test, under take maintenance and disposal of solar batteries.
11. Connect and test solar panel, Charge controller, Battery bank and Inverter.
12. Prepare bill of materials for small, medium and mega solar PV projects.
13. Perform various tests and measurement pertaining to PV Modules and their installation as per IEC standards.
14. Assist in Installation and commissioning of Solar PV plant and Hybrid plant.
15. Perform Operation & Maintenance of PV system with best practices.
16. Perform manufacturing of solar panel, prepare and commission marketable solar products.

6. ASSESSMENT CRITERIA

LEARNING OUTCOMES	ASSESSMENT CRITERIA
1. Prepare profile with an appropriate accuracy as per drawing following safety precautions.	Identify the trade tools; practice their uses with safety, care & maintenance.
	Identification of danger, warning, caution & safety signs.
	Preventive measures for electrical accidents and use of fire extinguishers.
	Practice on connecting of electrical accessories.
2. Prepare electrical wire joints, carry out soldering and crimping.	Practice on skinning, twisting and crimping.
	Identify various types of cables and measure conductor size using SWG and micrometer.
	Make joints on single strand conductors.
	Practice in crimping and soldering of joints / lugs.
3. Construct and test various characteristics of electrical and magnetic circuits.	Measure parameters in combinational DC circuits by applying Ohm's Law for different resistor values and voltage sources.
	Measure current and voltage in DC circuits to verify Kirchhoff's Law.
	Verify laws of series and parallel circuits with voltage source in different combinations.
	Measure current and voltage and analyse the effects of shorts and opens in series and parallel circuits.
	Measure power, energy for lagging and leading power factors in single phase circuits.
	Determine the relationship between Line and Phase values for star and delta connections.
	Measure the Power of three phase circuit for balanced and unbalanced loads.
4. Assemble, install and test wiring system.	Identification various conduits and different electrical accessories.
	Practice cutting, threading of different sizes & laying Installations.
	Prepare test boards / extension boards and mount accessories like lamp holders, various switches, sockets, fuses, relays, MCB, ELCB.
	Wire up PVC conduit wiring to control one lamp from two different places using two way switches.
	Practice control panel wiring using wiring accessories and mounting of control elements, e.g. meters, fuses, relays, switches, push buttons, MCB, ELCB etc.

	Prepare different types of earthing and measure earth resistance by earth tester / Megger.
5. Use instruments for measurement of various electrical parameters.	Use of various analog and digital measuring Instruments.
	Practice on measuring instruments in single and three phase circuits e.g. multi-meter, Wattmeter, Energy meter, Phase sequence meter and Frequency meter etc.
	Test single phase energy meter for its errors.
6. Perform basic Electric energy calculations and understand transmission and distribution of electrical power.	Measure power consumption for different loads with various times of use and calculate watt-hour.
	Find out power ratings from product label and prepare a load calculation chart.
	Perform OC and SC test to determine and efficiency of single phase transformer.
	Draw circuit diagram of substation and indicate various components.
7. Verify natural planetary movements and sunlight's path.	Plot sun chart and locate the sun at your location for a given time of the day.
	Measure intensity of solar radiation using Pyranometer and radiometers.
	Analyse shadow effect on incident solar radiation and find out contributors.
	Plot curve of radiation measured with respect to time for a location.
8. Demonstrate characteristics of Photovoltaic cells, Modules, Batteries and Charge controllers.	Connect solar panels in series & parallel and measure voltage and current.
	Charge & discharge a solar battery rated 12V, 100 Ah using Battery charger by CV and CC method and Tabulate the observations during charging & discharging cycle.
	Connect the charge controller (12V, 10A) with Solar battery (12V, 100Ah), Solar panel (75W) and DC load.
	Test the charge controller working with the above circuit.
9. Construct and demonstrate Solar DC appliances.	Construct a solar lantern using Solar PV panel (15W), Charge controller (6V, 5A), Output control circuit for variable illumination, Rechargeable battery (6V, 7Ah) and DC LED lamp (5W).
	Construct a Solar water pump using a DC pump (24 V), Solar Panel (250 W), Charge controller (24 V, 10 A).

10. Connect, test, undertake maintenance and disposal of solar batteries.	Prepare connecting wires for grouping of solar batteries.
	Check the condition of electrolyte in a solar battery using hydrometer and add distilled water to the required level in the solar battery.
	Connect two solar batteries (12V, 100Ah each) in series to a 24Volt DC pump and Test the Voltage and current in the circuit.
	Connect two solar batteries (12V, 100Ah each) in series to a 24 DC pump and Test the Voltage and current in the circuit.
11. Connect and test solar panel, Charge controller, Battery bank and Inverter.	Connect MC 4 connectors to a solar panel using crimping tool.
	Connect the PWM controller with solar panel & solar battery and note input /output current and battery voltage at different time intervals.
	Connect the MPPT controller with solar panel & solar battery and note input and output current and battery voltage, at different time intervals.
	Connect a Solar panel (10W), Solar charge controller (12V, 10A), Solar battery (12V, 100 Ah) and a normal inverter and convert to a solar inverter.
	Connect a 1 KW Solar PCU to 1 KW Solar panel installation using a suitable battery bank and test the performance.
12. Prepare Bill of materials for small, medium and mega solar PV projects.	Prepare bill of material for a 1/5/10/20/100 KW solar PV installation
	Estimate cost of a 1 KW solar PV installation and prepare a quotation.
13. Perform various tests and measurement pertaining to PV Modules and their installation as per IEC standards.	Measure Insulation resistance and Wet Leakage Current of PV Modules.
	Perform Bypass Diode test - Pmax at STC and Pmax at low irradiance.
	Measure Ground Continuity, Impulse Voltage, Reverse current and Partial Discharge.
14. Assist in Installation and commissioning of Solar PV plant and Hybrid plant.	Create a rough layout of the rooms showing existing Grid meter line, MCB, nearest shaded & dry place for a solar PCU and place for panels.
	Connect the array junction box to the above installation and draw wires up to PCU.
	Wire the above installation panels, battery etc. to a 1 KW Solar PCU

	Prepare a First inspection report on the solar plant installation.
	Prepare a list of Do's and Don'ts in the installation.
	Evaluate windiness of a place using an anemometer.
	Test with a blower and model windmill & record the observations.
15. Perform Operation & Maintenance of PV system with best practices.	Demonstrate Standard Operating Procedures of PV system.
	Demonstration of Solar Panel Maintenance:- Cleaning, DC Array Inspection, Precautions While Cleaning.
	Demonstration of Battery Maintenance- Checking of Electrolyte Level, Specific Gravity Using Hydrometer, Physical Damage, Terminal Voltage, Cleaning of Battery Terminals.
16. Perform manufacturing of solar panel, prepare and commission marketable solar products.	Assemble a solar panel using the cell string.
	Determine the I-V curve of finished solar PV panel and prepare a model certificate.
	Assemble, install and commission a solar water pump/street light/solar fertilizer spray.

SYLLABUS FOR SOLAR TECHNICIAN (ELECTRICAL) TRADE			
DURATION: ONE YEAR			
Duration	Reference Learning outcome	Professional Skills (Trade Practical) With Indicative Hours	Professional Knowledge (Trade Theory)
Professional Skill 75 Hrs; Professional Knowledge 21 Hrs	Prepare profile with an appropriate accuracy as per drawing following safety precautions	<ol style="list-style-type: none"> 1. Visit of various sections of the institutes and identification of danger, warning, caution & safety signs. (05 hrs) 2. Preventive measures for electrical accidents and use of fire extinguishers. (04hrs) 3. Practice elementary first aid and artificial respiration. (04hrs) 4. Disposal procedure of waste materials. (04hrs) 5. Use of personal protective equipments. (04hrs) 6. Familiarization with signs and symbols of electrical Accessories. (04hrs) 	<p>Scope of the trade. Safety rules and safety signs. Types and working of fire extinguishers. First aid safety practice. Hazard identification and prevention. Response to emergencies, e.g. power failure, system failure and fire etc. (07 hrs)</p>
		<ol style="list-style-type: none"> 7. Workshop practice on filing and hacksawing. (05hrs) 8. Practice sawing, planing, drilling and assembling for making a wooden switchboard. (05hrs) 9. Workshop practice on drilling, chipping, internal and external threading of different sizes. (10hrs) 10. Prepare an open box from metal sheet. (05hrs) 	<p>Concept of Standards and advantages of BIS/ISI. Trade tools specifications. Electrical symbols. Introduction to National Electrical Code-2011. (14 hrs)</p>

<p>Professional Skill 25 Hrs; Professional Knowledge 07 Hrs</p>	<p>Prepare electrical wire joints, carry out soldering and crimping.</p>	<p>11. Practice on skinning, twisting and crimping. (06 hrs) 12. Identify various types of cables and measure conductor size using SWG and micrometer. (06hrs) 13. Make joints on single strand conductors. (06 hrs) 14. Practice in crimping and soldering of joints / lugs. (07hrs)</p>	<p>Fundamentals of electricity. Concept of current, voltage, power, resistors and capacitors. Generation of DC electricity. Electrical conductors and insulators. Differentiate between AC and DC current. Types of joints and techniques of soldering. (07 hrs)</p>
<p>Professional Skill 75 Hrs; Professional Knowledge 21 Hrs</p>	<p>Construct and test various characteristics of electrical and magnetic circuits.</p>	<p>15. Measure parameters in combinational DC circuits by applying Ohm's Law for different resistor values and voltage sources. (06hrs) 16. Measure current and voltage in DC circuits to verify Kirchhoff's Law. (06hrs) 17. Verify laws of series and parallel circuits with voltage source in different combinations. (06hrs) 18. Measure current and voltage and analyse the effects of shorts and opens in series and parallel circuits. (05 hrs) 19. Verify the characteristics of series parallel combination of resistors. (05 hrs) 20. Determine the poles and plot the field of a magnet bar. (05 hrs) 21. Identify various types of capacitors, charging /</p>	<p>Ohm's Law; Simple electrical circuits and problems. Kirchoff's Laws and applications. Series and parallel circuits. Open and short circuits in series and parallel networks. Series and parallel combinations of resistors. Magnetic terms, magnetic materials and properties of magnet. Electrostatics: Capacitor- Different types, functions, grouping and uses. Inductive and capacitive reactance and their effect on AC circuit. Comparison and Advantages of DC and AC systems. Sine wave, phase and phase difference. Related terms frequency, Instantaneous value, R.M.S. value Average value, Peak factor, form factor, power factor and Impedance etc. Active and Reactive power.</p>

		<p>discharging and testing. (05 hrs)</p> <p>22. Test AC circuit with resistive load like lamp, heater, etc. (05 hrs)</p> <p>23. Test AC circuit with inductive load like fan, pump, etc. (06hrs)</p> <p>24. Measure power, energy for lagging and leading power factors in single phase circuits. (05 hrs)</p> <p>25. Measure Current, voltage, power, energy and power factor in three phase circuits. (06hrs)</p> <p>26. Ascertain use of neutral by identifying wires of a 3-phase 4 wire system and find the phase sequence. (05 hrs)</p> <p>27. Determine the relationship between Line and Phase values for star and delta connections. (05 hrs)</p> <p>28. Measure the Power of three phase circuit for balanced and unbalanced loads. (05 hrs)</p> <p>30. Practice cutting, threading of different sizes & laying Installations. (05 hrs)</p> <p>31. Prepare test boards / extension boards and mount accessories like lamp holders, various</p>	<p>I.E. rules on electrical wiring.</p> <p>Types of domestic and industrial wirings.</p> <p>Study of wiring accessories e.g. switches, fuses, relays, MCB, ELCB, MCCB, switchgears etc.</p> <p>Grading of cables and current ratings.</p> <p>Principle of laying out of</p>

		<p>switches, sockets, fuses, relays, MCB, ELCB, MCCB etc. (05 hrs)</p> <p>32. Drawing layouts and practice in PVC Casing-capping, Conduit wiring with minimum to number of points as per IE rules. (08hrs)</p> <p>33. Wire up PVC conduit wiring to control one lamp from two different places using two way switch. (07hrs)</p> <p>34. Practice testing / fault detection of domestic and industrial wiring installation and repair. (05 hrs)</p> <p>35. Practice control panel wiring using wiring accessories and mounting of control elements, e.g. meters, fuses, relays, switches, push buttons, MCB, ELCB etc. (05 Hrs)</p> <p>36. Prepare different types of earthing and measure earth resistance by earth tester / megger. (05 hrs)</p> <p>37. Practice Installation of lightening arrestor. (05 hrs)</p>	<p>Domestic wiring. Voltage drop concept. PVC conduit and Casing-capping wiring system. Different types of wiring Power, control, Communication and entertainment wiring. Wiring circuits planning, permissible load in sub-circuit and main circuit. Importance of Earthing. Plate earthing and pipe earthing methods and IEE regulations. Earth resistance and earth leakage circuit breaker. Lightening arrestor. (14 hrs)</p>
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Use instruments for measurement of various electrical parameters.	<p>38. Identify and practice of various analog and digital measuring Instruments. (05 hrs)</p> <p>39. Practice on measuring instruments in single and three phase circuits e.g.</p>	<p>Classification of electrical instruments and essential forces required in indicating instruments. PMMC and Moving iron instruments. Range extension.</p>

		<p>multi-meter, Wattmeter, Energy meter, Phase sequence meter and Frequency meter etc. (15 hrs)</p> <p>40. Test single phase energy meter for its errors. (05 hrs)</p>	<p>Wattmeter, PF meter, Energy meter, Megger, Earth tester, Frequency meter, Phase sequence meter, Multimeter, Tong tester etc. Instrument transformers – CT and PT. (07 hrs)</p>
<p>Professional Skill 50 Hrs;</p> <p>Professional Knowledge 14 Hrs</p>	<p>Perform basic electric energy calculations and understand transmission and distribution of electrical power.</p>	<p>41. Measure power consumption for different loads with various times of use and calculate watt-hour. (8 Hrs)</p> <p>42. Find out power ratings from product label and prepare a load calculation chart. (08 hrs)</p> <p>43. Verify terminals, identify components and calculate the transformation ratio of single phase transformers. (04hrs)</p> <p>44. Perform OC and SC test to determine and efficiency of single phase transformer. (05 hrs)</p> <p>45. Visit to transmission / distribution substation. (16 hrs)</p> <p>46. Draw actual circuit diagram of substation visited and indicate various components. (09 hrs)</p>	<p>Calculation of total watt hour of all loads per day and daily average watt hour from twelve months electricity bill. Working principle of transformer. Electric power demand, supply and gap in city, state and national level. Conventional energy Generation by thermal (coal, gas diesel) and hydel power plant. (small and large) Advantages of high voltage transmission. Transmission network of India. Study of distribution of power and substation. Overhead v/s underground distribution system. (14 hrs)</p>
<p>Professional Skill 75 Hrs;</p> <p>Professional Knowledge 21 Hrs</p>	<p>Verify natural planetary movements and sunlight's path.</p>	<p>47. Plot sun chart and locate the sun at your location for a given time of the day. (06hrs)</p> <p>48. Find out relations between sunlight and earth motion</p>	<p>Non-renewable and Renewable energy concept. Advantages over non renewable energy; brief discussion main renewable energy resources viz. solar</p>

		<p>by globe model. (05hrs)</p> <p>49. Observe and compare sunlight and angle of inclination during 12 hours of a day on different days. (16hrs)</p> <p>50. Locate magnetic poles (North and South) with the help of magnetic compass. (06hrs)</p> <p>51. Observe on Globe, which countries are in the Northern hemisphere and which on the Southern hemisphere. (06hrs)</p> <p>52. Prepare a list of places around India, their latitude and longitude. (06hrs)</p> <p>53. Measure intensity of solar radiation using Pyranometer and radiometers. (06hrs)</p> <p>54. Analyse shadow effect on incident solar radiation and find out contributors. (05hrs)</p> <p>55. Plot curve of radiation measured with respect to time for a location. (06hrs)</p> <p>56. Draw a solar map by collecting data of solar radiation in a location for one year. (06hrs)</p> <p>57. Compare the effects of direct radiation, diffused radiation and reflected radiation and prepare reports. 		<p>107. Connect a 1 KW Solar PCU to 1 KW Solar panel installation using a suitable battery bank and test the performance. (06hrs)</p> <p>108. Check of front panel features of a Solar PCU. (06hrs)</p> <p>109. Check of back panel features of a Solar PCU. (06hrs)</p> <p>110. Demonstrate Solar PV e-learning software. (05 hrs)</p>	<p>Overview of PV System Software. (21 hrs)</p>
<p>Professional Skill 50 Hrs; Professional Knowledge 14 Hrs</p>	<p>Prepare Bill of materials for small, medium and mega solar PV projects.</p>	<p>111. Prepare bill of material for a 1 KW solar PV installation. (08hrs)</p> <p>112. Prepare bill of material for a 5 KW solar PV installation. (08hrs)</p> <p>113. Prepare a Bill of materials for a 10 KW solar PV installation. (08hrs)</p> <p>114. Prepare a Bill of materials for a 20 KW solar PV installation. (08Hrs)</p> <p>115. Prepare a Bill of materials for a 100 KW solar PV installation. (09hrs)</p> <p>116. Estimate cost of a 1 KW solar PV installation and prepare a quotation. (09hrs)</p>	<p>Single Line Diagram (SLD) and identifying different component symbols in SLD. System sizing: Selection of components of the Solar Photovoltaic Electrical system. Load calculation and system sizing. Battery sizing. Solar panel sizing. Sizing small and medium solar PV projects and their SLDs. System types based on: Backup requirements, Grid availability, Budget and space. Various skill requirements during solar PV plant installation. Guidance for Solar Installation by MNRE (14 hrs)</p>
Professional	Perform various	117. Carry out visual	Performance standards IEC

<p>Skill 25 Hrs; Professional Knowledge 07 Hrs</p>	<p>tests and measurement pertaining to PV Modules and their installation as per IEC standards.</p>	<p>inspection of PV modules. (05 hrs) 118. Measure Insulation resistance and Wet Leakage Current of PV Modules. (04hrs) 119. Perform Bypass Diode test -Pmax at STC and Pmax at low irradiance. (05 hrs) 120. Measure Ground Continuity, Impulse Voltage, Reverse current and Partial Discharge. (04hrs) 121. Practice to undertake precautions against Module breakage. (04 hrs) 122. Demonstrate hot spot on modules through audio visual aids. (03 hrs)</p>	<p>62125/61646 (Diagnostic, Electrical, Performance, Thermal, Irradiance, Environmental, Mechanical) Safety Standards IEC 61730-1,2 (Electrical Hazards, Mechanical Hazards, Thermal Hazards, Fire Hazards) Hot spot on modules and method to detect them at site. (07 hrs)</p>
<p>Professional Skill 175 Hrs; Professional Knowledge 49 Hrs</p>	<p>Assist in Installation and commissioning of Solar PV plant and Hybrid plant.</p>	<p>123. Create a rough layout of the rooms showing existing Grid meter line, MCB, nearest shaded & dry place for a solar PCU and place for panels. (03hrs) 124. Prepare a layout of roof showing open areas and occupied areas and mark obstructions that can cause shadows. Take site photographs. (03hrs) 125. Mark locations for components of solar PV electrical system on site. (03hrs) 126. Perform shadow analysis</p>	<p>Site survey: Inspection of field, Selection of site, Shadow analysis. Types of roofs, Weather monitoring. Solar path finder and sun path diagram. Wind Load conditions on Solar PV Panels like Wind Speed, Height of Panel above roof and Relative Location of Panels on roof. Identifying challenges' in the placement of modules/PCU in the site. (Portrait/ landscape placement, number of tables etc.).</p>

		<p>in the rooftop of a 1 KW Solar PV plant. Use sun path diagram for the latitude and solar pathfinder. (05hrs)</p> <p>127. Install a roof top Solar panel mounting structure for 1 KW installation that uses Solar panels 250 W x 4 Nos. (06hrs)</p> <p>128. Mount Solar panels 250 W x 4 Nos. on the Mounting structure. (06hrs)</p> <p>129. Wire Solar panels 250 W x 4 Nos. (4Hrs)</p> <p>130. Connect the array junction box to the above installation and draw wires up to PCU. (04hrs)</p> <p>131. Perform different angle of inclination of Solar panel mounting for various cities considering their latitude. (06hrs)</p> <p>132. Perform Cable laying in the field. (04hrs)</p> <p>133. Perform finishing work on mounting structure. Perform concrete foundation making over mounting pole base. (03hrs)</p> <p>134. Perform setting of seasonal angles on mounting structure. (03hrs)</p>	<p>Roof area, shadow free area, structure, type & age of the building, usable area, O&M challenges, and integration issues</p> <p>Wire (cable) requirement/ estimation.</p> <p>Special tools and material handling equipment required during installation.</p> <p>Solar panel mounting structures.</p> <p>Solar plant foundation planning.</p> <p>Installation of solar panels.</p> <p>Solar panel facing direction.</p> <p>Changing the angle of inclination as per location and seasonal setting. MMS systems or using trackers.</p> <p>Solar plant, civil works: drilling, digging, finishing, Mixing concrete. (14 hrs)</p>
		<p>135. Wire a battery bank for 1 KW installation, using 4X 12V, 100 Ah Solar</p>	<p>Battery Bank wiring, load wiring and distribution panel.</p>

		<p>batteries. (04 Hrs)</p> <p>136. Wire the above installation panels, battery etc. to a 1 KW Solar PCU. (04 hrs)</p> <p>137. Group and distribute the loads as per economical planning. (05hrs)</p> <p>138. Wire the AC mains connection to the Solar PCU (Do not switch 'ON'). (05 hrs)</p> <p>139. Prepare a Checklist for finding out errors during above installation. (05 hrs)</p> <p>140. Check as per the checklist and prepare a clearance certificate before commissioning. (05 hrs)</p> <p>141. Perform Procedural first switch ON, observe No load test results and record. (05hrs)</p> <p>142. Perform 'ON Load' test, progressively add load till full load and record observation. (06hrs)</p> <p>143. Perform Overload test and record observation. (06hrs)</p> <p>144. Prepare a First inspection report on the solar plant installation. (06hrs)</p> <p>145. Prepare a list of Do's and Don'ts in the installation. (06hrs)</p> <p>146. Prepare a report on Customer orientation.</p>	<p>Switching loads, economical planning of load distribution. Inverter wiring, Interface with the existing electrical system.</p> <p>Commissioning skills: Preparation of check off list. Safety precautions before initial starting. Observation of parameters pre and post operation. Operational test before connecting to Load. Progressive load connecting and on load testing. Overload testing.</p> <p>First inspection report generation. Customer orientation. Documentation and record. Do's and Don'ts in the installation.</p> <p>Types of installation for solar array mounts based roof types: Manual Mount: Raft/rack mounts Pillar or Pole mount Building integrated mount Ballast roof mounts RCC rooftop mount Tracking mounts: Manual track Automatic track Single axis and dual axis Safety at heights</p>

Project work / Industrial visit: - <ul style="list-style-type: none">• Solar applications viz. Solar traffic light, solar water pump etc.• Hybrid plant• Report on skills required in the Solar PV installation.• Report on existing National and state level energy policy.• Report for setting up a small business in the solar industry.			

SYLLABUS FOR CORE SKILLS	
1.	Workshop Calculation & Science (Common for one year course) (80 hrs)
2.	Engineering Drawing (80 hrs)
3.	Employability Skills (Common for all CTS trades) (160 hrs)

Learning outcomes, assessment criteria, syllabus and Tool List of Core Skills subjects which is common for a group of trades, provided separately in www.bharatskills.gov.in.

List of Tools & Equipments			
SOLAR TECHNICIAN (ELECTRICAL) (For batch of 20 candidates)			
S No.	Name of the Tools and Equipment	Specification	Quantity
A. TRAINEES TOOL KIT			
1.	Measuring Steel Tape	5 meter	21 (20+1) Nos.
2.	Combination Plier Insulated	200 mm	21 (20+1) Nos.
3.	Screw Driver Insulated	4mm X 150 mm, Diamond Head	21 (20+1) Nos.
4.	Screw Driver Insulated	6mm X 150 mm	21 (20+1) Nos.
5.	Electrician screw driver thin stem insulated handle	4mm X 100 mm	21 (20+1) Nos.
6.	Heavy Duty Screw Driver insulated	5mm X 200 mm	21 (20+1) Nos.
7.	Electrician Screw Driver thin stem insulated handle	4mm X 250 mm	21 (20+1) Nos.
8.	Punch Centre	9mm X 150 mm	21 (20+1) Nos.
9.	Knife Double Bladed Electrician	100 mm	21 (20+1) Nos.
10.	Neon Tester	500 V	21 (20+1) Nos.
11.	Steel Rule Graduated both in Metric and English Unit	300 mm with precision of 1/4th mm	21 (20+1) Nos.
12.	Hammer, cross peen with handle	250 grams	21 (20+1) Nos.
B. SHOP TOOLS & EQUIPMENT			
(i) List of Tools & Accessories			
13.	Electrical Symbol and Accessories Charts		04 nos.
14.	Pipe vice Cast Iron with hardened jaw open type	100 mm	2 Nos.
15.	Hand Vice	50 mm jaw	2 Nos.
16.	Table Vice	100 mm jaw	2 Nos.
17.	Hacksaw frame (with blade)	Adjustable 300 mm Fixed 150 mm	2 Nos. Each
18.	File flat	200 mm 2nd cut with handle	2 Nos.
19.	File half round	200 mm 2nd cut with handle	2 Nos.
20.	File round	200 mm 2nd cut with handle	2 Nos.
21.	Pliers long nose insulated	150 mm	4 Nos.
22.	Pliers flat nose insulated	200 mm	4 Nos.
23.	Pliers, round nose insulated	100 mm	4 Nos.
24.	D.E. metric Spanner Double Ended	6 - 32 mm	2 Set

25.	Gauge, wire imperial stainlees steel marked in SWG & mm	Wire Gauge - Metric	2 Nos.
26.	Portable Electric Drill Machine	0-12 mm capacity 750W, 240V with chuck and key	1 No.
27.	Crimping Tool	1.5 sq mm to 16 sq mm 16 sq mm to 95 sq mm	1 No. Each
28.	Pliers Side Cutting	150 mm	2 No.
29.	Wire stripper adjustable length		2 No.
30.	Hammer, ball peen With handle		2 No.
31.	Scriber (Knurled centre position)		2 No.
32.	Tool kit Box/bag portable		5 No.
33.	Allen Key		1 Set
34.	Scissors blade	150 mm	2 No.
35.	Electrical loads: set of Incandescent lamp, Tube light, CFL, LED light, Heater and Geyser	Electrical loads: set of Incandescent lamp, Tube light, CFL, LED light, Heater and Geyser	2 Set
36.	Torque wrench	8N-m to 15N-m	1 No.
37.	Pipe Cutter to cut pipes	upto 5 cm. dia	1 No.
38.	Pipe Cutter to cut pipes	above 5 cm dia	1 No.
39.	Try Square	150 mm blade	2 No.
40.	Multi Meter (analog)	0 to 1000 M Ohms, 2V to 500 V,100 microA to 10A DC and AC	1 No
41.	Load Bank (variable)	Up to 1.2 KW (Lamp / heater Type)	1 No.
42.	Wire Cutter and Stripper	150 mm	4 Nos.
43.	Earth Plate	60cm X 60cm X 3.15mm Copper Plate 60cm X 60cm X 6mm GI Plate	1 Each
44.	Earth Electrode	Primary Electrode 2100x28x3.25mm Secondary Cu Strip 20x5mm	1 No.
45.	Out Side Micrometer	0 - 25 mm least count 0.01mm	2 Nos.
46.	Tap set	Different size	02 Set Each
47.	Trolley for Transportation of Batteries		02 Nos.
48.	Die for Threading	Different sizes	02 Set
49.	Rooftop Mounting Structure	For 4 x 250 W solar panels mounting practice, with tilt adjustment	2 Set
50.	Electrical wiring and switch gear rack	Electrical control elements suitable for practice of control circuits using banana plugs and sockets	1 No.
51.	Protective relays and contactors rack	suitable for practice of control circuits using banana plugs and sockets	1 No.

52.	MCCB	100Amps, Triple pole	1 No.
53.	ELCB and RCCB	25Amps, double pole and 25Amps, double pole, IΔn 30 mA	1 Each
54.	Fuses	HRC Glass Rewire Type	4 Each
55.	Cables: Twisted Pair Nonmetallic Sheathed Cable Underground Feeder Cable Ribbon Cable Metallic Sheathed Cable Multi-Conductor Cable Coaxial Cable Direct-Buried Cable	1 mtr each	1 Each
56.	Solar cable (Red)	5 square mm	As required
57.	Solar cable (Black)	5 square mm	As required
58.	Three core wire	(230 V, 15 A)	As required
59.	Battery cable	7.5 sqmm	As required
60.	Resin cored Solder		As required
61.	Solder wax		As required
62.	MC – 4 connector		As required
63.	pins	5 mm	As required
64.	lugs	7.5 mm	As required
65.	Hacksaw blades	200 mm, 300 mm	As required
66.	Bolts, nuts, anchor bolts, washers, screws, other pins, lugs etc		As required
67.	Civil work utensils	spade, mixing spoon, leveling plates	1 Set
68.	Plumbing tools		1 Set
69.	Plumbing raw materials		As required
70.	Civil work raw materials		As required
(ii) List of Equipment			
71.	Multimeter	Digital 0 to 1000 M Ohms, 2V to 700 V, 100 microA to 10A DC and AC	02 Nos.
72.	Megger	Analog - 500 V	01 Nos.
73.	Hydrometer		04 Nos.
74.	Solar Insulation meter		02 Nos.

75.	Pyranometer		01 No.
76.	Pyrheliometer		01 No.
77.	Lux meter	Lux meter LCD read out 0.05 to 7000 Lumens with battery.	02 Nos.
78.	Magnetic Flux Meter	0-500 tesla	02 Nos.
79.	Tong Tester / Clamp Meter	0 - 100 A (Digital Type)	01 Nos.
80.	Soldering Iron	25 Watt, 65 Watt and 120 Watt, 230 Volt	02 Nos. Each
81.	Temperature controlled Soldering Iron	50 Watt, 230 Volt	02 Nos.
82.	Thermometer Digital	0° C - 150° C	01 No.
83.	Sun Shine recorder		02 No.
84.	Weather monitoring station	To monitor and record Sunshine, wind velocity, temperature, rainfall etc with software.	01 No.
85.	Solar cell based sunlight radiation meter	For Solar power measurement up to 2000 w/square meter	02 No.
86.	Magnetic compass		04 No.
87.	Cut models of photo voltaic cell assembly		02 Nos.
88.	Cut model of Lead acid battery		01 No.
89.	Lead Acid battery	12V, 40Ah, 75Ah	01 Each
90.	Lead Acid battery	12V, 100 Ah	04 Nos.
91.	Solar simulator for solar cell characteristic study	To study IV curve of a solar cell of minimum 2 watt under variable illumination, temperature and suitable load	01 No.
92.	IV Curve tester		01 No.
93.	Sun path finder		01 No.
94.	Solar energy trainer with grouping of solar cells	To group (series or parallel) at least six solar cells each with minimum 2 W with suitable loads	01 No.
95.	Solar tracker demonstrator kit	To study manual and automatic control of 10 W solar panel in East-west and North-south & back	01 No.
96.	Solar PV e-learning software using animations for training		01 License
97.	Halogen lamp with stand for illumination of solar panels in lab	AC mains operated to provide 0 to 1000 watts per meter square	02 Set
98.	Motorized Bench Grinder	AC mains operated	01 No.

99.	Battery Charger	0 - 6 - 9 - 12 - 24 - 48 V, 30amp	01 No.
100.	Solar photovoltaic module	75 W mono crystalline module 75 W amorphous silicon module 250 W thin film module 5W, 10W, 40W poly crystalline module	01 Each
101.	Solar panels	250 Wp	04 Nos.
102.	Solar Charge controller with Dusk to Dawn automatic switching	12V, 10A	05 Nos.
103.	Solar charge controller with manual switch (Day lighting)	12 V 10 A	05 Nos.
104.	Array junction box	for connecting 250W x 4 Nos. solar panel with DC fuse, DC MCB, and surge suppressor protection	02 Nos.
105.	Solar lantern	LED type	01 No.
106.	Solar lantern	CFL type	01 No.
107.	Solar lantern assembly sets		01 No.
108.	Home light system	12 V DC with FM receiver, LED bulb and mobile charger as loads	01 No.
109.	Solar cell kit		01 No.
110.	Clinometer	for Angle measurement	01 No.
111.	Spirit level	For floor level check	01 No.
112.	Anemometer	for wind speed measurement	01 No.
113.	DC table fan	12 V	01 No.
114.	A.C. Voltmeter M.I	0 –500V AC	02 Nos.
115.	Volt meter	0 - 30V	02 Nos.
116.	Volt meter	0 - 100V	02 Nos.
117.	Ammeter MC	0 - 1A	02 Nos.
118.	Ammeter MC	0 - 5A	02 Nos.
119.	Ammeter MCcentre zero	0 - 20A	02 Nos.
120.	Ammeter MCcentre zero	0-50A	02 Nos.
121.	Power Factor Meter		01 No.
122.	Rheostat	0 -1 Ohm, 5 Amp 0 -10 Ohm, 5 Amp 0- 25 Ohm, 1 Amp 0- 300 Ohm, 1 Amp	01 No. each
123.	A.C. Energy Meter	Single Phase, 10 A, 240 V induction	01 No.

		type	
124.	A.C. Energy Meter	Three Phase, 15 A, 440 V induction type	01 No.
125.	Kilo Wattmeter Analog	0-1.5-3KW, pressure coil rating-240v/440v, current rating-5A/10A Analog, portable type Housed in bakelite case	02 Nos.
126.	Digital Wattmeter	230 V, 1 KW, 50 Hz	02 Nos.
127.	Phase Sequence Indicator	3 Phase, 415 V	02 Nos.
128.	Frequency Meter	45 to 55 Hz	02 Nos.
129.	DC LED Lamp	3W, 5W, 10W	50 Each
130.	DC Pump	24 V	02 Nos.
131.	PWM Controller		04 Nos.
132.	MPPT Charge Controller		04 Nos.
133.	Inverter with Battery	1 KVA with 12 V Battery Input- 12 volt DC, Output- 220 volt AC	01 No.
134.	Solar PCU	Off grid 1 KW MPPT Sine wave Solar Power Conditioning Unit	04 Nos.
135.	Solar Grid tied inverter Demonstrator kit	300W KW	01 No.
136.	Solar Street Light	12V, 75Ah battery, 75 Wp solar panel, 12V, 10A dusk to dawn charge controller, 60 W LED lights and 9 m height pole all dismountable	01 Nos.
137.	Solar, wind and hybrid power plant	1 KW cumulative	01 No.
138.	Solar Traffic Light	12V, 75Ah battery, 75 Wp solar panel, 12V, 10A dusk to dawn charge controller, 15 W LED lights with suitable colors and 9 m height pole all dismountable	01 No.
139.	Used water treatment solar plant demonstrator kit	1 liter capacity	01 No.
140.	solar DC pump	1 HP	01 No.
141.	Demonstration kit for wind generation (Wind turbine with blower)	300 W	01 No.
142.	Rechargeable battery	12 V 100 Ah	As required
143.	Rechargeable battery	12 V 7 Ah	As required
144.	Rechargeable battery	6 V 5 Ah	As required

145.	LED lights	12 V DC	As required
146.	LED lights	6 V DC	As required
C. SAFETY AND PROTECTIVE EQUIPMENT			
147.	Rubber gloves		10 Pair
148.	Cotton gloves		05 Pair
149.	Gum boots		02 Pair
150.	Safety Goggles		04 Nos.
151.	Safety Helmet		04 Nos.
152.	First Aid kit		02 Nos.
153.	Fire Extinguisher CO ₂	2 KG	02 Nos.
154.	Fire Buckets	Standard size	02 Nos.
D. SHOP FLOOR FURNITURE AND MATERIALS			
155.	Working Bench	2.5 m x 1.20 m x 0.75 m	04 Nos.
156.	Wiring Board	3 meters x 1 meter with 0.5 meter projection on the top	01 No.
157.	Instructor's table		01 No.
158.	Instructor's chair		02 Nos.
159.	Trainee Chair		01 for Each Trainee
160.	Trainee table for two trainee		10 Nos.
161.	Metal Rack	100cm x 150cm x 45cm	04 Nos.
162.	Lockers with drawers		01 for Each Trainee
163.	Almirah	2.5 m x 1.20 m x 0.5 m	01 No.
164.	Black board/white board	(Minimum 4X6 feet)	01 No.
<p>Note: -</p> <ol style="list-style-type: none"> <i>All the tools and equipment are to be procured as per BIS specification.</i> <i>Internet facility is desired to be provided in the class room.</i> 			

The DGT sincerely acknowledges contributions of the Industries, State Directorates, Trade Experts, Domain Experts, trainers of ITIs, NSTIs, faculties from universities and all others who contributed in revising the curriculum.

Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

List of Expert members contributed/ participated for finalizing the course curriculum of Solar Technician (Electrical) trade held on 27.10.2017 at Apex Hi-Tech Institute, Bangalore.			
S No.	Name & Designation Sh/Mr/Ms	Organization	Remarks
1.	B. S. Arun Kumar, Head Renewable	Tata Projects Ltd., Bangalore	Chairman
2.	Dr. Chandan Banerjee, DDG (Scientist F)	National Institute of Solar Energy, Gurgaon	Expert
3.	Dr. A.K. Saxena, AGM	Bharat Heavy Electricals Ltd. Gurgaon	Expert
4.	Rajinder Kaura CMD	Bergen Group of Companies, Gurgaon	Expert
5.	Gp. Capt. Yogesh Sharma (Retd), Director	Bergen Institute on Research for development of skills, Gurgaon	Expert
6.	Drishan Purohit , Energy Specialist	International Finance Corporation World Bank Group, New Delhi	Expert
7.	Anurag Mishra, Head Solar	Emergent Ventures India, Gurgaon	Expert
8.	Sandeep Mittal, Vice President Operations & New Projects	JBM group, Gurgaon	Expert
9.	A. K. Chaubey, Head HR (NR & WMC)	L & T Constructions, New Delhi	Expert
10.	Vibhor	Bergen Institute on Research for development of skills, Gurgaon	Expert
11.	S. James, Managing Director	Solax Energy LLP, Bangalore	Member
12.	S. Dhananjay, Director	Renegy Power Systems Pvt. Ltd., Bangalore	Member
13.	Geetha, CEO	Temco Renewable Energy Solutions, Bangalore	Member
14.	Rama Siva, Founder	Anthro Power, Bangalore	Member
15.	Priyank R. Harsurkar, Deputy Manager	BEL, Bangalore	Member
16.	Ramesh Bandiwaddar, Deputy Manager	BEL, Bangalore	Member
17.	Dr. C. S. Mala, HOD	TCE BMS Institute of Technology, Bangalore	Member

18.	Shanthi G., Deputy Director	MGIRED, Bangalore	Member
19.	S. R. C. Sathyanarayan, CEO	Sri Ranga Consultants	Member
20.	N. Sridhar	KASSIA	Member
DGT & Training Institute			
21.	Satya Shankar BP, Director (AT)	DGT HQ, New Delhi	Member
22.	B Ashfaq Ahmed, Director	Apex Hi-Tech Institute, Bangalore	Member
23.	Sanjay Kumar, Director (C&P)	DGT HQ, New Delhi	Coordinator/ Member
24.	B.V.S. Sessa Chari, Director	CSTARI, Kolkata	Member
25.	B. N. Sridhar, DDT	FTI, Bangalore	Member
26.	C. Ramasubramanian, DDT	Apex Hi-Tech Institute, Bangalore	Member
27.	L.K. Mukherjee, DDT	CSTARI, Kolkata	Member
28.	N. Nath, ADT	CSTARI, Kolkata	Member
29.	B. K. Nigam, Training Officer	CSTARI, Kolkata	Coordinator
30.	Anurag Vats, Training Officer	CSTARI, Kolkata	Coordinator
31.	Malathi R., Training Officer	RVTI, Bangalore	Member
32.	Palani, Training Officer	ATI, Hyderabad	Member
33.	M.P. Rajan, VI	ATI, Calicut	Member
34.	Anupama, JTO	ITI, Peenya	Member
35.	Uma Shankar Bhargava, JTO	ITI, Hosur Road	Member
36.	LingarajGowda, JTO	ITI, Hosur Road	Member
37.	Venkatesh Reddy, JTO	BTC, Bangalore	Member
