1. COURSE INFORMATION

During the two-year duration a candidate is trained on subjects viz. Professional Skill, Professional Knowledge, Workshop Science & Calculation and Employability skills related to job role. In addition to this a candidate is entrusted to make/do project work and Extra Curricular Activities to build up confidence. The practical skills are imparted in simple to complex manner & simultaneously Professional Knowledge (theory subject) is taught in the same fashion to apply cognitive knowledge while executing task. The practical part starts with simple geometrical drawing and finally ends with preparing topographical map, Cadastral/ mouza map, detailed road project, survey drawing using CAD, application of GIS techniques, Hydrographic survey, Transmission line site survey, railway line site survey, sanction plan of Residential / Public building, and detailed estimate. The broad components covered under Professional Skill subject are as below:-

FIRST YEAR: In the beginning of the course the trainees are acquainted with occupational safety & health, PPE, etc. Observation of all safety aspects is mandatory. The safety aspect covers components like OSH & E, PPE, Fire extinguisher, First Aid, etc. The practical part starts with basic drawing (consisting of lettering, numbering, geometrical figure, symbols & representations). Later the drawing skills imparted are drawing of different scales, projections, perform site survey and prepare a site plan using chain / tape, prismatic compass, perform AutoCAD drawing. Knowledge and application of Computer Aided Drawing has been introduced. Workspace creating drawing using toolbars, commands, and menus. Plotting drawing from CAD. Different site survey using Plane table(radiation, intersection, traversing, determination of height), Theodolite (measurement of angle, traversing, computation of area), Levelling instrument (different levelling – differential, reciprocal, etc.), tacheometer (determination of horizontal and vertical distance, constants, etc.), field book entry, plotting, mapping, calculation of area, preparing traverse drawing, simple building drawing using CAD are being taught in the practical.

SECOND YEAR: Making topographical map using Level instruments with contours (Interpolation of contour, preparation of section, computation of volume, setting of simple, compound, reverse, transition and vertical curve), performing survey using Total Station and preparation of map (measurement of angle, co-ordinates and heights, downloading survey data and plotting), making of site plan by Cadastral survey (preparation of site plan, calculation of plot area, etc.), performing road project survey (location survey and preparation of route map, profile/ longitudinal / cross sectional levelling and plotting) and survey drawing using CAD. Drawing of cartographic projection, setting and application of GIS & GPS techniques in various fields, collection and processing of data, performing hydrographic survey (determining hydrographic depth, measuring velocity of flow, determining cross sectional area of river, calculating the discharge of a river, etc.), performing transmission line site survey (making of alignment, conducting detailed survey, final location survey and making of tower foundation pit point), performing railway line site survey, drawing of building by CAD and preparation of estimation are being done as part of practical training.

2.1 GENERAL

Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers range of vocational training courses catering to the need of different sectors of the Labour market. The vocational training programmes are running under aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

Surveyor trade under CTS is one of the most popular courses delivered nationwide through network of ITIs. The course is of two years duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory & Practical) imparts professional skills and knowledge, while Core area (Workshop Calculation & science and Employability Skills) imparts requisite core skill, knowledge and life skills. After passing out of the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Trainee broadly needs to demonstrate that they are able to:

- Read & interpret technical parameters/documentation, plan work, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional knowledge, core skills & employability skills while performing the job.
- Check the survey drawing and data and rectify errors.
- Document the technical parameters related to the task undertaken. Process data recorded during field measurements and make relevant conclusions.

2.2 PROGRESSION PATHWAYS:

- Can join industry as Technician and will progress further as Senior Technician, Supervisor and can rise to the level of Manager.
- Can become Entrepreneur in the related field.
- Can take admission in diploma course in notified branches of Engineering by lateral entry.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).
- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

2.3 COURSE STRUCTURE:

Table below depicts the distribution of training hours across various course elements during a period of two years: -

S No.	Course Element	Notional Training Hours	
		1 st Year	2 nd Year
1	Professional Skill (Trade Practical)	1120	1120
2	Professional Knowledge (Trade Theory)	240	320
3	Workshop Calculation & Science	80	80
4	Employability Skills	160	80
	Total	1600	1600

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

a) The Continuous Assessment (Internal) during the period of training will be done by **Formative Assessment Method** by testing for assessment criteria listed against learning outcomes. The training institute has to maintain an individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in.

b) The final assessment will be in the form of summative assessment. The All India Trade Test for awarding NTC will be conducted Controller of examinations, DGT as per the guidelines. The pattern and marking structure are being notified by DGT from time to time. **The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The examiner during final examination will also check** the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one-year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects is 33%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60%-75% to be allotted during assessment	
For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices	<ul style="list-style-type: none"> • Demonstration of good skill in the use of hand tools, machine tools and workshop equipment. • 60-70% accuracy achieved while undertaking different work with those demanded by the component/job. • A fairly good level of neatness and consistency in the finish. • Occasional support in completing the project/job.
(b) Weightage in the range of 75%-90% to be allotted during assessment	
For this grade, a candidate should produce work which demonstrates attainment of a	<ul style="list-style-type: none"> • Good skill levels in the use of hand tools,

<p>reasonable standard of craftsmanship, with little guidance, and regard for safety procedures and practices</p>	<p>machine tools and workshop equipment.</p> <ul style="list-style-type: none"> • 70-80% accuracy achieved while undertaking different work with those demanded by the component/job. • A good level of neatness and consistency in the finish. • Little support in completing the project/job.
<p>(c) Weightage in the range of more than 90% to be allotted during assessment</p>	
<p>For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.</p>	<ul style="list-style-type: none"> • High skill levels in the use of hand tools, machine tools and workshop equipment. • Above 80% accuracy achieved while undertaking different work with those demanded by the component/job. • A high level of neatness and consistency in the finish. • Minimal or no support in completing the project.

3. JOB ROLE

Topographical Surveyor; surveys land to determine out line, contours and relative position of control points (landmarks) on tract of land, coast, harbor, etc. for preparing topographical and other maps and records. Establishes control points and pillars to do instrumentation work on ground to prepare maps. Provides identification marks on ground for photographs taken in aerial survey. Fixes position of control points on ground in relation to some permanent position and with reference to celestial bodies using theodolites and precise levels, tachometer, digital planimeter etc. Adjusts and sets theodolites, compasses, plane tables, leveling instruments, Total station, GPS, DGPS and other modern instruments for survey, observes and records measurements and angles from three determined points (triangulation), locations to scale on proper sketch. Corrects margin of error due to worn-out tapes which become incorrect, and readings on instruments which are affected by environmental factors.

Plan and organize assigned work and detect & resolve issues during execution in his own work area within defined limit. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

Reference NCO-2015: 2165.0200 - Topographical Surveyor

4. GENERAL INFORMATION

Name of the Trade	SURVEYOR
Trade Code	DGT/1018
NCO - 2015	2165.0200
NSQF Level	Level – 5
Duration of Craftsmen Training	Two years (3200 Hours)
Entry Qualification	Passed 10 th class examination with Science and Mathematics or its equivalent.
Minimum Age	14 years as on first day of academic session.
Eligibility for PwD	LD, CP, LC, DW, AA, LV, DEAF, AUTISM, SLD, MD
Unit Strength (No. Of Student)	24 (There is no separate provision of supernumerary seats)
Space Norms	64 Sq. M
Power Norms	3 KW
Instructors Qualification for	
1. Surveyor Trade	<p>B.Voc/Degree in Survey Engineering / Civil Engineering from AICTE/UGC recognized Engineering College/ university with one-year experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>03 years Diploma in Survey Engineering /Civil Engineering from AICTE /recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>NTC/NAC passed in the Trade of "Surveyor" With three years' experience in the relevant field.</p> <p><u>Essential Qualification:</u> Relevant National Craft Instructor Certificate (NCIC) in any of the variants under DGT.</p> <p><i>NOTE : Out of two Instructors required for the unit of 2 (1+1), one must have Degree/ Diploma and other must have NTC/NAC qualifications. However, both of them must possess NCIC in any of its variants.</i></p>
2. Workshop Calculation	B.Voc/Degree in Engineering from AICTE/UGC recognized

& Science	<p>Engineering College/ university with one-year experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>03 years Diploma in Engineering from AICTE / recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field.</p> <p style="text-align: center;">OR</p> <p>NTC/ NAC in any one of the engineering trades with three years' experience.</p> <p><u>Essential Qualification:</u> National Craft Instructor Certificate (NCIC) in relevant trade.</p> <p style="text-align: center;">OR</p> <p>NCIC in RoDA or any of its variants under DGT.</p>				
3. Employability Skill	<p>MBA/ BBA / Any Graduate/ Diploma in any discipline with Two years' experience with short term ToT Course in Employability Skills from DGT institutes.</p> <p>(Must have studied English/ Communication Skills and Basic Computer at 12th / Diploma level and above)</p> <p style="text-align: center;">OR</p> <p>Existing Social Studies Instructors in ITIs with short term ToT Course in Employability Skills from DGT institutes.</p>				
4. Minimum Age for Instructor	21 Years				
List of Tools and Equipment	As per Annexure – I				
Distribution of training on Hourly basis: (Indicative only)					
Year	Total Hrs. /week	Trade Practical	Trade Theory	Workshop Cal. & Sc.	Employability Skills
1 st	40 Hours	28 Hours	6 Hours	2 Hours	4 Hours
2 nd	40 Hours	28 Hours	8 Hours	2 Hours	2 Hours

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOMES (TRADE SPECIFIC)

FIRST YEAR:

1. Concept of drawing & sheet layout following safety precautions.
2. Draw lettering & numbering applying drawing instruments.
3. Draw plain geometrical figures, curves & conics.
4. Construct plain scale, diagonal scale, comparative scale, vernier scale.
5. Draw orthographic projections of different objects with proper dimensioning & lettering.
6. Draw conventional signs & symbols used in surveying.
7. Perform site survey using chain/ tape & prepare a site plan.
8. Perform the site survey using prismatic compass.
9. Perform Auto Cad drawing.
10. Perform the site survey using plane table.
11. Perform theodolite survey.
12. Perform traverse survey by theodolite & prepare a site map.
13. Determine of R.L & heights of different points by levelling instruments.
14. Performing tacheometric survey using tacheometer.
15. Perform AutoCAD drawing (single story building).

SECOND YEAR:

16. Make topography map using level instrument with contours.
17. Concept & set out of curves.
18. Perform survey work using modern survey instruments (Total station) for prepare a map.
19. Concept of cadastral survey & make a site plan.
20. Perform a road project survey.
21. Perform survey work to prepare a topographical map, cadastral map (mouza map), road Project (Survey camp in a suitable hilly/undulated area).
22. Perform AutoCAD drawing from field survey data.
23. Concept & draw cartographic projection.
24. Plan and prepare setting of GIS & GPS, techniques in various fields.
25. Perform Hydrographic survey(cross section & velocity determination) using hydrographic survey instruments.
26. Perform transmission line site survey & prepare a site plan

27. Perform railway line site survey line survey using modern survey instruments.
28. Draw a double storied building by AutoCAD & prepare a detail estimate of the building.

6. ASSESSMENT CRITERIA

LEARNING OUTCOMES	ASSESSMENT CRITERIA
FIRST YEAR	
1. Concept of drawing & sheet layout following safety precautions.	Ensure data & information received are sufficient for preparation of drawing.
	Prepare layout of drawing sheet.
	Prepare a title box.
	Set & fix drawing paper on the drawing board.
2. Draw lettering & numbering applying drawing instruments.	Draw, horizontal line, vertical line, parallel line using T-square, set-square.
	Draw different types of lettering.
	Draw numbers in different fonts.
	Draw different types of lines.
3. Draw plain geometrical figures, curves & conics.	Dimensioning a drawing. (various types)
	Draw geometrical figures from given data (different types). Construct ellipse and parabolic curves using the various conditions given.
4. Construct plain scale, diagonal scale, comparative scale, vernier scale.	Draw different types of scales.
	Find out R.F of the scale, calculate the length of the scale on drawing.
	Check the drawing to confirm their correctness.
5. Draw orthographic projections of different objects with proper dimensioning & lettering.	Develop view in orthographic projection by placing object between horizontal & vertical plane of axis.
	Generate side view of blocks in different inclination on V.P & H.P by auxiliary vertical plane.
	Construct an isometric scale to a given length.
	Draw the isometric projection of regular solids.
6. Draw conventional signs & symbols used in surveying.	Draw some conventional signs & symbols used in topographic maps.
7. Perform site survey using	Perform surveying measuring distance by chain/ tape and

chain/ tape & prepare a site plan.	other accessories.
	Errors in chaining and their corrections.
	Enter measured data in field book and plotting the same.
	Conduct chain surveying and prepare a site plan.
	Calculate area of a plot.
8. Perform the site survey using prismatic compass.	Measure bearings of a line and conduct the traverse survey using prismatic other accessories.
	Entry in field book and Compute the correct bearings.
	Plotting the traverse & adjust the closing error.
	Calculate the area of the traverse.
9. Perform Auto Cad drawing.	Draw some figures using Auto Cad.
10. Perform the site survey using the plane table.	Set up the plane table including – centring, levelling & orientation.
	Perform plane table survey on field by radiation method.
	Perform plane table survey by intersection, resection method.
	Perform a plane table survey by traversing method with all details.
11. Perform Theodolite survey.	Temporary adjustment of Theodolite. (set up, centring, levelling, focussing).
	Measure horizontal angle by various method & enter into field book.
	Measure vertical angle.
	Determine height of a tower/ post using Theodolite.
12. Perform traverse survey by Theodolite & prepare a site map.	Conduct reconnaissance survey prepare key plan.
	Mark the station point.
	Prepare reference sketch.
	Measure lengths & bearing.
	Measure horizontal angles (repetition method).
	Compute co-ordinates, check angles, calculate bearings, find consecutive co-ordinates & independent co-ordinates.
	Plot the traverse.
Calculate the area by co-ordinates methods.	

13. Determine RL and heights by levelling instruments of different points.	Set levelling instruments and temporary adjustment. (Dumpy/ Auto level).
	Determine reduced level and check it.
	Conduct reciprocal levelling.
	Fix up a benchmark.
14. Perform tachometric survey using tachometer.	Determine the stadia constant of a tacheometer.
	Determine horizontal distance by stadia tacheometer.
	Determine vertical distance by stadia tacheometer.
15. Perform AutoCAD drawing (single story building).	Draw a survey traverse using AutoCAD command.
	Draw a simple building using AutoCAD command.
SECOND YEAR	
16. Make topography map using level instrument with contours.	Fix horizontal & vertical control points.
	Prepare a contour map (by square method).
	Make cross section on contour map.
	Mark the gradient on contour map.
	Calculate the volume from contour map by prismoidal or trapezoidal formula.
17. Concept & set out of curves.	Draw and mark the parts of simple circular curve.
	Set out a simple circular curve by linear method from given data.
	Set out a simple circular curve by instrument method from given data.
	Set out a simple compound curve by instrument method from given data.
	Set out a simple reverse curve by instrument method from given data.
	Set out a simple transition curve from given data.
18. Perform survey work using modern survey instruments (Total Station) for prepare a map.	Set up the total station.
	Measure horizontal angle, vertical angle, height by Total Station.
	Stake out a point by using Total Station.
	Download & plot the survey map.

19. Concept of cadastral survey & make a site plan.	Prepare a cadastral map. (including inking & plot numbering).
	Calculate the plot area using digital planimeter.
	Prepare a site plan from existing cadastral map.
20. Perform a road project survey.	Prepare a longitudinal levelling and plot it.
	Prepare a cross section levelling and plot it.
	Determine formation level, depth of cutting and depth of filling on longitudinal section.
	Calculate the earth work volume.
21. Perform survey work to prepare a topographical map, cadastral map(mouza map), road Project (survey camp in a suitable hilly/undulated area).	Prepare a topographical map.(direct & indirect method).
	Prepare a cadastral map(mouza map).
	Prepare a detail road project.
22. Perform AutoCAD drawing from field survey data.	Prepare a traverse drawing by AutoCAD.
	Prepare a longitudinal & cross section drawing for a road project by AutoCAD.
23. Concept & draw cartographic projection.	Draw various type of cartographic projection.
	Construct UTM grid for map preparation.
	Use WGS -84.
24. Plan and prepare setting of GIS & GPS, techniques in various fields.	Setup GPS/DGPS.
	Collect field data using GPS/DGPS.
	Process GPS/DGPS data in software.
	Plot the map by survey software.
25. Perform Hydro graphic Survey using hydro graphic survey instruments.	Determine hydro graphic depth by (sounding method)/ eco sounder.
	Measure the velocity of flow.
	Determine the cross-sectional area of a river.
	Calculate the discharge of a river.
26. Perform transmission line site survey & prepare a site plan	Conduct reconnaissance survey for select good alignment.
	Conduct detail survey & prepare a profile drawing.

	Conduct final location survey & mark pit points.
27. Perform railway line site survey line survey using modern survey instruments.	Mark a tentative alignment.
	Conduct reconnaissance survey for select good alignment.
	Conduct detail survey & prepare a profile drawing.
	Conduct final location survey & mark alignment.
28. Draw a double storied building by AutoCAD & prepare a detail estimate of the building.	Draw a two storied residential building drawing using AutoCAD command.
	Prepare a detail estimate of the same building.

SYLLABUS FOR SURVEYOR TRADE			
FIRST YEAR			
Duration	Reference Learning Outcome	Professional Skills (Trade Practical) With Indicative Hours	Professional Knowledge (Trade Theory)
Professional Skill 56 Hrs.; Professional Knowledge 12 Hrs.	Concept of drawing & sheet layout following safety precautions.	<ol style="list-style-type: none"> 1. Demonstrate of tools & equipment used in the trade. (6 hrs.) 2. Occupational safety & Health. (6 hrs.) 3. Introduction of safety equipments and their uses. (10 hrs.) 4. Introduction of first aid, health, safety & environmental guidelines, legislations & regulations as applicable. (8 hrs.) 5. Personal Protective Equipment (PPE). (8 hrs.) 6. Hazard identification and avoidance, Safety signs for Danger. (4 hrs.) 7. Use of drawing instruments and equipments with care. (4 hrs.) 8. Method of fixing of drawing sheet on drawing board. (2 hrs.) 9. Layout of different size of drawing sheet and folding of sheets. (8 hrs.) 	<p>Importance of safety and general precautions related to the trade.</p> <p>All necessary guidance to be provided to the newcomers to become familiar with the working of ITI system.</p> <p>Importance of survey or trade</p> <p>Job after completion of training.</p> <p>Introduction of First aid.</p> <p>Job responsibility of the trade.</p> <ul style="list-style-type: none"> • Overview the subject to be taught. • List of the instrument equipments to be used during training • Layout of drawing sheet • Dimensions of drawing sheet. (12 Hrs.)
Professional Skill 84 Hrs.;	Draw lettering & numbering applying drawing	10. Lettering & numbering (Single & double stroke) (50hrs.)	Details layout of lettering, lines & dimensioning system. (18Hrs.)

Professional Knowledge 18 Hrs.	instruments.	11. Types of lines and dimensioning. (34hrs.)	
Professional Skill 28Hrs.; Professional Knowledge 06Hrs.	Draw plain geometrical figures, curves & conics	12. Construction of plain geometrical figures, curves & conics. (28 hrs.)	Introduction of surveying, types of surveying, use, application principal. (06 Hrs.)
Professional Skill 56Hrs.; Professional Knowledge 12Hrs.	Construct plain scale, diagonal scale, comparative scale, vernier scale.	13. Drawing of: - 14. Construction of scales – plain, diagonal, vernier. (56 hrs.)	Knowledge of different types of scales, determine of R.F & uses of scales. (12Hrs.)
Professional Skill 84 Hrs.; Professional Knowledge 18Hrs.	Draw orthographic projections of different objects with proper dimensioning & lettering.	15. Drawing of three views in orthographic projection of point, line, plane, solid objects. (32hrs.) 16. Section of solids. (20 hrs.) 17. Isometric projection of geometrical solids. (32hrs.)	Different types of projection views orthographic, sectional, isometric view. (18Hrs.)
Professional Skill 28Hrs.; Professional Knowledge 06 Hrs.	Draw conventional signs & symbols used in surveying.	18. Drawing of conventional signs & symbols (10hrs.) 19. Free hand sketch of liner measurement instruments(18 hrs.)	Use & application of conventional signs & symbols. (06 Hrs.)
Professional Skill 84 Hrs.; Professional Knowledge 18Hrs.	Perform site survey using chain/ tape & prepare a site plan.	20. Practice of folding & unfolding of chain. (5 hrs.) 21. Equipment and instrument used to perform surveying & testing of chain. (5 hrs.) 22. Ranging (direct/ indirect) & distance measure with chain/ tape. (10 hrs.) 23. Offset taking & entering field book. (6 hrs.) 24. Overcoming obstacles in	Uses of Chain/ tape, testing of a chain & correction. Ranging (direct & indirect), Principle of chain survey, application. Terms used in chain survey, Offset, types of offsets, limit of offset, field book, types of field book, entry of field book method of chaining in slopping ground. Field procedure of chain survey

Angle. (07hrs.) 39. Perform permanent adjustment of Theodolite(07hrs.) 40. Measurement of horizontal angle by various methods. (12hrs.) 41. Setting out the angles. (10hrs.) 42. Measurement of vertical angle, deflection angle (15 hrs.) 43. Prolongation of line by various methods. (14hrs.) 44. Determination of height of inaccessible object by Theodolite. (12hrs.)</p>	<p>Introduction to Theodolite. Types of Theodolite, parts of Theodolite, Terms used in Theodolite survey. Temporary adjustment of Theodolite, Angle measurement process. Reading of angles, field book entry of measured angles. Permanent adjustment of Theodolite. (18hrs.)</p>
<p>Professional Skill 112Hrs.;</p>	<p>Perform traverse survey by Theodolite&prepare</p>	<p>45. Traversing (closed & open) using Theodolite & tape/chain (20 hrs.)</p>	<p>Traversing using theodolite (closed & open), traverse computation, determination of</p>

<p>Professional Knowledge 24Hrs.</p>	<p>a site map.</p>	<p>46. Measurement of horizontal angles & bearing of a line. (20 hrs.) 47. Computation of coordinates from the bearing, angle length. (20 hrs.) 48. Preparation of gales traverse table (20 hrs.) 49. Computation of area using co-ordinates (20 hrs.) 50. Determine omitted measurements (12 hrs.)</p>	<p>consecutive coordinates, independent co-ordinate, checking & balancing of traverse, preparation of gales traverse table, computation of area using co-ordinates, calculation of omitted measurement (24hrs.)</p>
<p>Professional Skill 140Hrs.; Professional Knowledge 30Hrs.</p>	<p>Determine of RL and heights of different points by levelling instruments.</p>	<p>51. Practice in setting up of dumpy level and performing temporary adjustments (15 hrs.) 52. Practice in staff reading(10hrs.) 53. Practice in simple levelling (15 hrs.) 54. Practice differential levelling (fly levelling) (15 hrs.) 55. Practice reciprocal levelling. (15hrs.) 56. Carryout levelling field book. (08hrs.) 57. Equate reduction of level (rise fall method, height of instrument method) comparison of method. (15hrs.) 58. Solve problems on reduction of level. (07hrs.) 59. Practice levelling with</p>	<p>Introduction to levelling. Types of levelling instrument. Technical terms used in levelling Temporary & permanent adjustment. Different types of levelling Entry of level book. (Reduced level calculation method) Curvature & refraction effect sensitivity of bubble tube. Common error and their elimination. Degree of accuracy. (30hrs.)</p>

		(auto / digital level) (15hrs.) 60. Practice profile levelling or longitudinal & cross section levelling, plotting the profile. (15 hrs.) 61. Check levelling(10hrs.)	
Professional Skill 56Hrs.; Professional Knowledge 12Hrs.	Performing tachometric survey using tacheometer	62. Determination of horizontal and vertical distances by tachometric method. (30hrs.) 63. Determination of stadia constants of a tachometer. (26 hrs.)	Introduction of tachometry & terms use advantages and disadvantages. Tachometric constants & its determination. Determination of horizontal & vertical distances by various methods. (12hrs.)
Professional Skill 84 Hrs.; Professional Knowledge 18Hrs.	Perform AutoCAD drawing (single story building)	64. Prepare traverse drawing using Auto cad. (20 hrs.) 65. Prepare a simple building (30 hrs.) 66. Drawing using Auto cad. (34 hrs.)	Use AutoCAD command for drawings. (18hrs.)
<p>Project work/ Industrial Visit:</p> <p>Broad area:</p> <ul style="list-style-type: none"> a) Prepare a traverse map with theodolite, & other survey instruments b) Prepare a longitudinal section (more than 300 metre). c) Draw a single-story building using AutoCAD. 			

SYLLABUS FOR SURVEYOR TRADE			
SECOND YEAR			
Duration	Reference Learning Outcome	Professional Skills (Trade Practical) With Indicative Hours	Professional Knowledge (Trade Theory)
Professional Skill 112 Hrs.; Professional Knowledge 32 Hrs.	Make topography map using level instrument with contours.	67. Prepare contour (direct/ indirect method) (20hrs.) 68. Interpolation of contour. (15 hrs.) 69. Draw contour lines. (12 hrs.) 70. Locating contour gradients. (10hrs.) 71. Preparation of section from contour map. (15hrs.) 72. Computation of volume (prismoidal / trapezoidal) formula. (10hrs.) 73. Establishment of gradient by abney level. (10hrs.) 74. Make a topography map with contours. (indirect method) (20hrs.)	Contouring, contour interval selection of contour interval, characteristics of contour, uses of contour contouring by various method. Interpolation of contour by various methods, drawing of contours, computation of volume establishment of gradient by abney level. (32hrs.)
Professional Skill 112 Hrs.; Professional Knowledge 32 Hrs.	Concept & set out of curves.	75. Computation of elements of simple curve. (20 hrs.) 76. Set out of simple curve by linear method. (15 hrs.) 77. Set out of simple curve by instrument method. (17 hrs.) 78. Set out of compound curve by instrument method. (15hrs.) 79. Set out of reverse curve by instrument method. (15hrs.)	Curves, Purpose, Types of curves – simple, compound, reverse, transition, vertical. Elements of simple curve, computation of elements of simple curve. Various methods for setting out simple, compound, reverse, transition & vertical curve. (32 hrs.)

		80. Set out of transition curve by instrument method. (15hrs.) 81. Set out of vertical curve by instrument method. (15hrs.)	
Professional Skill 112 Hrs.; Professional Knowledge 32 Hrs.	Perform survey work using modern survey instruments (Total station) for prepare a map	82. Temporary adjustment of Total station. (20hrs.) 83. Measurement of angle & coordinates and heights. (27hrs.) 84. Traversing using Total station. (40hrs.) 85. Download survey data and Plotting. (25hrs.)	Familiarization with modern survey instruments. Parts of Total station, temporary adjustment of T.S, working procedure of T.S. (32 hrs.)
Professional Skill 28Hrs.; Professional Knowledge 08 Hrs.	Concept of cadastral survey & make a site plan	86. Prepare a site plan by the help of mouza map. (16 hrs.) 87. Calculate the plot area by digital planimeter. (12 hrs.)	Familiarisation with cadastral map, term used in cadastral survey, preliminary knowledge for prepare a site plan. Calculation of area by digital planimeter. (08hrs.)
Professional Skill 84Hrs.; Professional Knowledge 24Hrs.	Perform a road project survey.	88. Road project reconnaissance. (10hrs.) 89. Preliminary survey. (18 hrs.) 90. Final location survey including preparation of route map. (36 hrs.) 91. Profile or longitudinal & cross-sectional levelling & plotting. (20hrs.)	Types of surveys for location of a road. Points to be considered during reconnaissance survey. Classification of roads and terms used in road engineering, alignment of roads relative importance of length of road, height of embankment depth of cutting & filling, road gradients super elevation etc. (24hrs.)
Professional Skill 84 Hrs.; Professional Knowledge 24 Hrs.	Perform survey work for prepare a topographical map ,cadastral map(mouza map), road project (survey camp in a suitable hilly / undulated	92. Prepare topographical map (direct & indirect method). (28 hrs.) 93. Make a cadastral/ mouza map & calculate the plot area. (28 hrs.) 94. Prepare a detail road project more than	Details knowledge for preparation of topographical map. Details knowledge for preparation of cadastral map. Details knowledge for preparation of a road project. (24 hrs.)

	area)	1KM.(28 hrs.)	
Professional Skill 28Hrs.;	PerformAutoCAD drawing from field survey data.	95. Survey drawing practice usingAutoCAD commands (28 hrs.)	Use auto cad command survey software for survey drawing. (08 hrs.)
Professional Knowledge 08Hrs.			
Professional Skill 84 Hrs.;	Concept& draw cartographic projection.	96. Drawing of Simple conical projection, polyconic, lambert's & UTM (Universal Transverse Mecrcator). (34 hrs.) 97. Construction of UTM Grid. (30 hrs.) 98. Use datum defining system 1984 (WGS-84). (20 hrs.)	Importance of cartographic projection. Uses of various types of cartographic projection for mapping. (24hrs.)
Professional Knowledge 24 Hrs.			
Professional Skill 168Hrs.;	Plan and prepare setting of GIS & GPS, techniques in various fields.	99. Setting of GPS/DGPS. (20 hrs.) 100. Data collection (measurement of line & calculation of area) (30 hrs.) 101. Data collection in DGPS mode. (25 hrs.) 102. Processing of GPS data in software. (20 hrs.) 103. Plotting the contour lines with the help of Auto Civil/ Civil 3D Software/any other software. (73 hrs.)	Introduction of GIS& GPS. Elements of GPS/DGPS. Observation principles. Sources of error & handling of error in GPS. Various type of GPS application. Concept & use of survey software. (48hrs.)
Professional Knowledge 48Hrs.			
Professional Skill 84 Hrs.;	Perform the hydrographic survey (cross section & velocity determination) using the hydrographic survey	104. Determine hydro graphic depth by (sounding method)/ eco sounder. (28 hrs.) 105. Measure the velocity of flow. (24 hrs.) 106. Determine the cross-	Introduction to hydrographic survey, practice various method s of water depth measurement process, floe velocity measurement & determination of cross-sectional area of a river.
Professional Knowledge 24 Hrs.			

	instruments.	sectional area of a river. (20 hrs.) 107. Calculate the discharge of a river (12 hrs.)	Handling of eco sounder, current meter. (24hrs.)
Professional Skill 56 Hrs.; Professional Knowledge 16Hrs.	Perform transmission line site survey & prepare a site plan.	108. Justify constructing a new transmission line. (06hrs.) 109. Marking of tentative alignment on existing topographical map. (08hrs.) 110. Conduct reconnaissance /preliminary survey & select a good alignment. (12hrs.) 111. Conduct detailed survey, prepare a profile drawing using sag template. (12 hrs.) 112. Conduct final location survey. (12 hrs.) 113. Mark tower foundation pit point (as per type of tower) (06hrs.)	Basic terms used in transmission line survey, justification criteria for constructing new line, marking process of tentative alignment, selection process of a good alignment. Process of detail survey & final location survey. Use of sag template, Various type of tower, construction of tower foundation. (16hrs.)
Professional Skill 56 Hrs.; Professional Knowledge 16Hrs.	Perform the railway line site survey using modern survey instruments.	114. Justify to construct a new Railway line. (06 hrs.) 115. Marking of tentative alignment. (08 hrs.) 116. Conduct reconnaissance /preliminary survey & select a good alignment. (15 hrs.) 117. Conduct detailed survey, prepare of drawing including design of curves with setting out table. (15hrs.) 118. Conduct final location	Basic terms used in railway line project survey, justification criteria for constructing new line, marking process of tentative alignment, selection process of a good alignment. Process of detail survey & final location survey. (16hrs.)

		survey. (12hrs.)	
Professional Skill 112Hrs.;	Draw a double storied building by AutoCAD& prepare a detailed estimate of building.	119. Draw a double storied residential building plan, elevation, cross section, site plan, lay out plan, foundation details etc. (78 hrs.) 120. Prepare a detail estimate of this building. (34 hrs.)	Specification & uses of various types of building materials, types of foundation, knowledge of R.C.C. works, & other construction related items. Procedure of prepare a detail estimate. (32hrs.)
Professional Knowledge 32Hrs.			
Project work			
a) Prepare a two storied residential building plan & prepare a detail estimate.			

SYLLABUS FOR CORE SKILLS

1. Workshop Calculation & Science(Common for two year course) (80Hrs. + 80 Hrs.)
2. Employability Skills (Common for all CTS trades) (160Hrs. + 80 Hrs.)

Learning outcomes, assessment criteria, syllabus and Tool List of Core Skills subjects which is common for a group of trades, provided separately in www.bharatskills.gov.in

List of Tools and Equipment			
Surveyor (For batch of 24 candidates)			
S No.	Name of the Tools and Equipment	Specification	Quantity
A. TOOLS, EQUIPMENT & GENERAL OUTFIT			
1.	Abney level		1 No.
2.	Box sextant		1 Nos.
3.	Binocular		4 Nos.
4.	Chalk board/White board		1 No.
5.	Scientific calculator		2 Nos.
6.	Computing scales two hectares		4 Nos.
7.	Computing scales five hectares		4 Nos.
8.	Offset scale for cadastral survey		4 Nos
9.	Metal cross staff- box type		2 Nos.
10.	Metal cross staff- open type		2 Nos.
11.	Drawing Board	1250mmx900mm	25 Nos.
12.	Engineer's chain		2 Nos.
13.	Dumpy level		6 Nos.
14.	Auto level		6 Nos.
15.	Fire extinguisher		1 No.
16.	Gunter's chain		4 Nos.
17.	Height indicators		8 Nos.
18.	Instructor's chair		1 No.
19.	Instructor's table		1 No.
20.	Tracing board with lamp		2 Nos.
21.	Leveling staff –	4M	13Nos.
22.	Metric chain-	30 m & 20 m	5 each
23.	Magnifying glass		2 Nos.
24.	Magnet bar (for magnetizing through compass needles)		2 Nos.
25.	Pen knife		5 Nos.
26.	Prismatic compass		5 Nos.

27.	Planimeter	Digital	2 Nos.
28.	Plane table with stand, accessories & water proofing cover		8 Nos.
29.	Telescopic alidade		2 Nos.
30.	Indian pattern clinometers		2 Nos.
31.	Ranging rod	2 m	44 Nos.
32.	Offset rod		5 Nos.
33.	Optical square		5 Nos.
34.	Railway curves-	Set of 50 in a box	4 Nos.
35.	Steel almirah	Big	4 Nos.
36.	Stool		25 Nos.
37.	Survey plotting scale-	8 scales with offset scale in box	4 sets
38.	Stencil set		4 Nos.
39.	Fibre glass tape	30 m	12 Nos.
40.	Steel tape	30 m	12 Nos.
41.	Steel band	30 m	2 Nos
42.	Surveyor's umbrella		4 Nos.
43.	Theodolite transit		5 Nos.
44.	Computer	CPU: 32/64 Bit i3/i5/i7 or latest processor, Speed: 3 GHz or Higher. RAM:-4 GB DDR-III or Higher, Wi-Fi Enabled. Network Card: Integrated Gigabit Ethernet, with USB Mouse, USB Keyboard and Monitor (Min. 17 Inch.) Licensed Operating System and Antivirus compatible with trade related software.	5 sets
45.	software		As required
46.	Total station		2 Nos.
47.	DGPS-latest version		2 Nos.
48.	Hand GPS-latest version		2 Nos.

49.	A3 size Printer-	Colour	1 No.
50.	Computer table		5 Nos.
51.	Computer chair		5 Nos.
52.	Printer table		1 No.
53.	UPS		As required

Note:

1. *Internet facility is desired to be provided in the classroom.*

The DGT sincerely acknowledges contributions of the Industries, State Directorates, Trade Experts, Domain Experts, trainers of ITIs, NSTIs, faculties from universities and all others who contributed in revising the curriculum.

Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

List of Expert members contributed/ participated for finalizing the course curriculum of Surveyor trade held at CSTARI, Kolkata on 9th November'2017.			
S No.	Name & Designation Shri/Mr./Ms.	Organization	Remarks
1.	B.V.S. Sesha Chari, Director	CSTARI, Kolkata	Chairman
2.	Bhupinder Singh, Ph.D., Associate Professor	Indian Institute of Technology, Roorkee	Expert
3.	S.K. Bhattachariya, Proprietor	ESBEE Associates, Kolkata	Member
4.	B. Maity, Chief Executive	Pioneer Surveyors Newtown, Kolkata-700156	Member
5.	Ram Ch. Bid, Asst. Engineer	CPWD/KCD-V, Nizam Palace, Kolkata	Member
6.	Utpal Banerjee, Operation Manager	Wazir Advisor Pvt. Ltd., Kolkata	Member
7.	Prodyut Kr. Ghosh, Survey Co- Ordinator	ESBEE Associates, Kolkata	Member
8.	SubrataGuha, Junior Engineer	CPWD/KCD-V, Nizam Palace, Kolkata	Member
9.	Angad Yadav, Principal	Archana Institute of Technical Education and Research, Prantik Township,Bolpur	Member
10.	NarendraNathSaha, Instructor	S.P.B. Technical Institute, Uchalan, Burdwan	Member
11.	Sk. HabibulRahaman, Sr. GIS Engineer	Archana Institute of Technical Education and Research, Prantik Township,Bolpur	Member
12.	Rinku Das, Instructor	ITI Howrah Homes	Member
13.	Harun Ali Seikh, Instructor	S.P.B. Technical Institute, Uchalan, Burdwan	Member
14.	Amrita Gopal Gantait, Instructor	Govt. I.T.I. Tollygunge, West Bengal	Member

15.	L.K. Mukherjee, DDT	CSTARI, Kolkata	Member
16.	NirmalyaNath, ADT	CSTARI, Kolkata	Member
17.	P.K. Ghosh, SR. D/Man	CSTARI, Kolkata	Member
18.	B.K. Nigam, Trg.Officer	CSTARI, Kolkata	Member
19.	A. Pandey, Trg.Officer	CSTARI, Kolkata	Member
20.	R. N. Manna, Trg.Officer	CSTARI, Kolkata	Co Ordinator Member
