During the two years duration, a candidate is trained on subjects- Professional Skill, Professional Knowledge, Engineering Drawing, Workshop Science & Calculation and Employability Skills related to job role. In addition to this, a candidate is entrusted to make/do project work and Extra Curricular Activities to build up confidence. The practical skills are imparted in simple to complex manner & simultaneously theory subject is taught in the same fashion to apply cognitive knowledge while executing task.

The course covers the detail aspect of mould making& testing. The broad components covered under Professional Skill subject are as below:

FIRST YEAR: The practical part starts with basic fitting covering components like filing, sawing, drilling, tapping, chipping, grinding and different fits. The accuracy proposed is of $\pm 0.05\text{mm}$ and angular accuracy of 1° . Different turning operations on lathe viz., plain, facing, boring, grooving, step turning, parting, chamfering, knurling and different thread cutting by setting the different parameter, are covered in the practical part.

Different milling operations (plain, stepped, angular, dovetail, T-slot, contour, gear) along with surface & cylindrical grinding to an accuracy of $\pm 0.02\text{mm}$ are covered. In addition, solid modeling of mould in CAD & Pro E taught setting and execution of welding is also a component in this year.

SECOND YEAR: Setting, operation and programming of CNC turn centre and CNC machining center to produce components are performed. 2D & 3D machining with CAM software is also performed. Manufacture drill jig and fixture is also part of the practical. EDM & wire EDM operation to produce components with an accuracy of $\pm 0.02\text{mm}$ is covered. Construction of blanking and piercing tool is done and testing of same is also performed.

Basic construction of Hydraulic & Pneumatic circuits and basic functioning of electrical circuit and sensors are covered. Construction of compound and progressive tools is done testing of same is executed. Simple repair and overhauling of different machines viz., drill, milling & lathe is covered. Making of 'V' bending tool and draw tool are carried out and testing is also undertaken.

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under the aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

Tool & Die Maker (Press Tools, Jigs & Fixtures):

Tool and Die Makers build, repair and modify custom made prototypes or special tools, Press Tools, Jigs, Fixtures and various types of mechanical devices. Press Tools are metal forms used for Sheet metal cutting and forming. Tool and Die Makers fabricate various parts, like pieces of a puzzle, which require perfect fitting. While this occupation is closely allied with the machinist trade and encompasses many of the same skills, Tool and Die Makers usually specialize in jobs spending more time in fitting and assembling precision components which are required for sheet metal cutting forms. A Tool and Die maker's work depends on precise measurements and accuracy, as such math skills are important. Also, they must be able to read and interpret information from design drawings and specifications to fabricate all types of Press Tools Jigs and Fixtures. Being mechanical minded is an additional skill.

Plan and organize assigned work; and detect and resolve issues during execution. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English, sensitive to environment, self-learning and productivity.

The trainee after completion of this course may be designated as Tool & Die Maker (Press Tools, Jigs & Fixtures) according to nature of work done.
