

GOVERNMENT OF INDIA MINISTRY OF SKILL DEVELOPMENT & ENTREPRENEURSHIP DIRECTORATE GENERAL OF TRAINING

COMPETENCY BASED CURRICULUM

TECHNICIAN MEDICAL ELECTRONICS

(Duration: Two Years)

CRAFTSMEN TRAINING SCHEME (CTS) NSQF LEVEL- 5

SECTOR – ELECTRONICS AND HARDWARE

TECHNICIAN MEDICAL ELECTRONICS

(Engineering Trade)

(Revised in 2019)

Version: 1.2

CRAFTSMEN TRAINING SCHEME (CTS)

NSQF LEVEL - 5

Developed By

Ministry of Skill Development and Entrepreneurship

Directorate General of Training

CENTRAL STAFF TRAINING AND RESEARCH INSTITUTE

EN-81, Sector-V, Salt Lake City, Kolkata – 700 091

www.cstaricalcutta.gov.in

S No.	Topics	Page No.
1.	Course Information	1
2.	Training System	2
3.	Job Role	6
4.	General Information	8
5.	Learning Outcome	11
6.	Assessment Criteria	13
7.	Trade Syllabus	22
	Annexure I (List of Trade Tools & Equipment)	52
	Annexure II (List of Trade experts)	57

During the two-year duration of Technician Medical Electronics trade a candidate is trained on professional skill, professional knowledge, Engineering Drawing, Workshop Calculation & Science and Employability skill related to job role. In addition to this a candidate is entrusted to undertake project work and extracurricular activities to build up confidence. The broad components covered under Professional Skill subject are as below: -

FIRST YEAR: In this year, the trainee learns about safety and environment, use of fire extinguishers, artificial respiratory resuscitation to begin with. He gets the idea of trade tools & its standardization, Familiarize with basics of electricity. Plan, estimate, assemble, install and test wiring system in hospital & CSSD department, Identify, install, test and operate different photo therapy equipments in Biomedical Sector. Skilling to test and service different batteries used in electronics applications and record the data to estimate the repair cost. Identify and test various electronics components using proper measuring instruments, verify characteristics and compare the data using standard parameter. Demonstrate soldering and de-soldering of various types of electrical components, Plan and carry out installation, fault detection and repairing of Hospital Electrical appliances. Execute testing; evaluate performance and maintenance of sphygmomanometers. Test and operate different types of Physiotherapy Equipment's technique and general care. Test various Medical gas plant operation using suitable care and safety. The candidate will be able to Construct, test and verify the input/output characteristics of various analog circuits. Assemble, test and troubleshoot various digital circuits. Demonstrate the significance of different parts in the organization in the human body (Basics of Human Anatomy and Physiology). Execute the operation of different Bio Medical sensors, identify, wire & test various sensors by selecting appropriate test instruments. Construct and test different circuits using ICs 741 operational amplifiers & ICs 555 linear integrated circuits and execute the result. Identify the working principles, Operation, general care of Clinical Lab Equipments.

SECOND YEAR: In this year, the trainee will be able to detect the faults and troubleshoot SMPS, UPS, and Inverter and Battery charger. They will also be skilled with various modulation techniques to acquaint with fibre optic communication techniques transmission and reception. Trainees will be able to Install, test and maintain a CCTV system and configure the system for surveillance function in Hospital department. Identify various functional blocks, I/O ports of a 8085 micro processor system and run the basic program. Trainees will be able to demonstrate the ICU department functions, equipments, calibration and basic human rating chart. They will also interpret the factors, tools and techniques affecting the medical terminology image quality. The trainee will demonstrate function of bio-medical department. Familiarize with the instruction set of 8051 micro controller kit and run the application. The trainees will demonstrate the operation and function of dental chair & dental x-ray. They will also be able operate different imaging equipments used in hospitals. The trainee will develop a bio-medical department in a hospital for supporting role of bio-medical engineer.

2.1 GENERAL

Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers range of vocational training courses catering to the need of different sectors of Labour market. The vocational training programmes are running under aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer programmes under DGT for propagating vocational training.

Technician Medical Electronics trade under CTS is one of the popular newly designed courses. The earlier course was Technician Medical Electronics. The course is of two years duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory & Practical) imparts professional skills and knowledge, while Core area (Workshop Calculation science, Engineering Drawing and Employability Skills) imparts requisite core skill & knowledge and life skills. After passing out the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Trainee needs to demonstrate broadly that they are able to:

- Read & interpret technical parameters/documentation, plan and organize work processes, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional knowledge, core skills & employability skills while performing the job and repair & maintenance work.
- Check the job with circuit diagrams/components as per drawing for functioning, diagnose and rectify faults in the electronics components/module.
- Document the technical parameters in tabulation sheet related to the task undertaken.

2.2 PROGRESSION PATHWAYS:

- Can join industry as Technician and will progress further as Senior Technician, Supervisor and can rise up to the level of Manager.
- Can become Entrepreneur in the related field.
- Can take admission in diploma course in notified branches of Engineering by lateral entry.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).
- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

2.3 COURSE STRUCTURE:

Table below depicts the distribution of training hours across various course elements during a period of two-years: -

S No.	Course Element	Notional Training Hours	
		1 st Year	2 nd Year
1	Professional Skill (Trade Practical)	1000	1000
2	Professional Knowledge (Trade Theory)	280	360
3	Workshop Calculation & Science	80	80
4	Engineering Drawing	80	80
5	Employability Skills	160	80
	Total	1600	1600

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

- a) The Continuous Assessment (Internal) during the period of training will be done by Formative Assessment Method by testing for assessment criteria listed against learning outcomes. The training institute has to maintain an individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in
- b) The final assessment will be in the form of summative assessment. The All India Trade Test for awarding NTC will be conducted by Controller of examinations, DGT as per the guidelines. The pattern and marking structure is being notified by DGT from time to time. The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The examiner during final examination will also check the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects is 33%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60%-75% to be al	lotted during assessment
For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices	 Demonstration of good skill in the use of hand tools, machine tools and workshop equipment. 60-70% accuracy achieved while undertaking different work with those demanded by the component/job. A fairly good level of neatness and consistency in the finish. Occasional support in completing the project/job.
(b) Weightage in the range of 75%-90% to be a	Illotted during assessment
For this grade, a candidate should produce work which demonstrates attainment of a	Good skill levels in the use of hand tools, machine tools and workshop

reasonable standard of craftsmanship, with little guidance, and regard for safety procedures and practices

- equipment.
- 70-80% accuracy achieved while undertaking different work with those demanded by the component/job.
- A good level of neatness and consistency in the finish.
- Little support in completing the project/job.

(c) Weightage in the range of more than 90% to be allotted during assessment

For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.

- High skill levels in the use of hand tools, machine tools and workshop equipment.
- Above 80% accuracy achieved while undertaking different work with those demanded by the component/job.
- A high level of neatness and consistency in the finish.
- Minimal or no support in completing the project.

Bio-Medical Equipment Technician; Electronics Technician; Biomedical Engineering Technician repairs, calibrates, and maintains medical equipment and instrumentation used in health-care delivery field: Inspects and installs medical and related technical equipment in medical and research facilities for use by physicians, nurses, scientists, or engineers involved in researching, monitoring, diagnosing, and treating physical ailments or dysfunctions. Services various equipment and apparatus, such as patient monitors, electrocardiographs, blood-gas analysers, x-ray units, defibrillators, electrosurgical units, anaesthesia apparatus, pacemakers, blood- pressure transducers, spirometers, sterilisers, diathermy equipment, inhouse television systems, patient-care computers, and other related technical paraphernalia. Repairs, calibrates, and maintains equipment, using hand tools, power tools, measuring devices, and knowledge of manufacturers' manuals, troubleshooting techniques, and preventive-maintenance schedules. Safety-tests medical equipment and health-care facility's structural environment to ensure patient and staff safety from electrical or mechanical hazards. Consults with medical or research staff to ascertain that equipment functions properly and safely, utilizing knowledge of electronics, medical terminology, human anatomy and physiology, chemistry, and physics.

Medical Equipment Technician; in the Healthcare Industry is also known as a Biomedical Equipment Technician (BMET), Service Technician, Biomedical Electronics Technician, and Biomedical Engineering Technician (BMET). Medical Equipment Technicians install, maintain and repair patient care equipment. They perform inspection, installation, and preventative maintenance of general clinical equipment, including appropriate documentation for all service activities and training the hospital staff.

Medical Laboratory Technician; (MLT) is also referred to as Clinical Laboratory Science professionals, Medical Technologists and Medical Laboratory Scientists. The Medical Laboratory Technician performs complex tests for diagnosis, treatment, and prevention of disease. These professionals are responsible for supporting and assisting doctors and scientists in their day-today healthcare work in a variety of roles. They function as the main support to biomedical scientists in pathology laboratories. They are also sometimes responsible for imparting training and supervision to the staff.

Medical Electronics General; fits, assembles and repairs various kinds of Medical electronic equipment in Hospital or company at place of use. Hospital construction and maintains of bio-medical departments should Examines drawings and wiring diagrams centralize gas plant; checks parts for accuracy of fit and minor adjustments; assembles parts or mounts them on chassis or panels with aid of hand tools; installs and connects wiring, soldering joints equipment, diagnoses faults with aid of electrical and electronic testing equipment; dismantles equipment if required and replaces faulty parts or wiring.

Medical Electronics Fitter, other; include all other workers engaged in fitting, assembling, repairing and manufacture and service medical electronic equipment, machinery, appliances, etc.

Medical Electronics Mechanic; Medical Electronic Equipment Mechanic repairs medical equipment, such as all medical equipment example Radiology equipment's, ICU equipment's, control systems following blueprints and manufacturer's specifications and using hand tools and test instruments. Tests faulty equipment and applies knowledge of functional operation of medical electronic units and systems to diagnose cause of malfunction. Tests electronic components and circuits to locate defects, using instruments, adjusts mechanical parts, using hand tools and soldering iron. Aligns, adjusts and calibrates testing instruments. Maintains records of repairs, calibrations and test.

ECG Technician (ECG operation); tests programmer ECG lead selector switch with testing equipment to ensure that assembly in ECG leads, frequency, performance, etc. are in accordance with prescribed Standards Places assembled ECG leads in position and visually examines it to ensure that position of equipment, connections, Switches on and operates different knobs to check calibration, audibility and general performance of set by varying its tone and listening to various stations and frequencies. Tightens loose leads locates faults, replaces defective components and conducts necessary changes. Approves correctly assembled sets for further processing and rejects defective ones for rectification. May tests sets at different stages of assembly. May service, repair and overhaul ECG leads.

Patient Monitoring system, pulmonary Function Analyses, Blood gas analyzers, Cardiac Defibrillators Installs, X-ray machine technician Ultrasonic Imaging Systems Functioning. If the problem identified is in the Printed Circuit Board (PCB), the technician identifies the specific fault in the PCB and corrects it. Replaces the dysfunctional PCB with a new one, if the damage identified requires fixing at the service Centre.

Plan and organize assigned work and detect & resolve issues during execution. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

Reference NCO-2015:

- (i) 3211.0200 Bio-Medical Equipment Technician
- (ii) 3211.0501 Medical Equipment Technician
- (iii) 3212.0701 Medical Laboratory Technician

4. GENERAL INFORMATION

Name of the Trade	TECHNICIAN MEDICAL ELECTRONICS	
Trade Code	DGT/1070	
NCO – 2015	3211.0200, 3211.0501, 3212.0701	
NSQF Level	Level-5	
Duration of Craftsmen Training	Two Years (3200 Hours)	
Entry Qualification	Passed 10 th class examination with Science and Mathematics or its equivalent.	
Minimum Age	14 years as on first day of academic session.	
Eligibility for PwD	LD, LC, DW, AA, LV, DEAF, AUTISM, SLD	
Unit Strength (No. Of Student)	24(There is no separate provision of supernumerary seats)	
Space Norms	120 Sq. mtr (inclusive 10 sq. m dark room area)	
Power Norms 2 KW		
Instructors Qualification	for	
1. Technician Medical	B.Voc/Degree in Electronics/ BME/ Medical Electronics Engineering	
Electronics Trade	from AICTE/UGC recognized Engineering College/ university with one-	
	year experience in the relevant field.	
	OR	
	03 years Diploma in Electronics/ BME/ Medical Electronics from AICTE	
	recognized board of technical education or relevant Advanced Diploma	
	(Vocational) from DGT with two years' experience in the relevant field.	
	OR	
	NTC/NAC passed in the Trade of "Technician Medical Electronics" With	
	three years' experience in the relevant field.	
	Essential Qualification:	
	Relevant National Craft Instructor Certificate (NCIC) in any of the	
	variants under DGT.	
	NOTE: Out of two Instructors required for the unit of 2(1+1), one must have Degree/Diploma and other must have NTC/NAC qualifications. However both of them must possess NCIC in any of its variants.	
2. Workshop	B.Voc/Degree in Engineering from AICTE/UGC recognized Engineering	
Calculation & Science	College/ university with one-year experience in the relevant field.	
	OR	
	03 years Diploma in Engineering from AICTE recognized board of	

	technical education or relevant Advanced Diploma (Vocational) from
	DGT with two years' experience in the relevant field.
	OR
	NTC/ NAC in any one of the engineering trades with three years'
	experience.
	Essential Qualification:
	National Craft Instructor Certificate (NCIC) in relevant trade OR
	NCIC in RoDA or any of its variants under DGT.
3. Engineering Drawing	B.Voc/Degree in Engineering from AICTE/UGC recognized Engineering College/ university with one-year experience in the relevant field. OR
	03 years Diploma in Engineering from AICTE recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field. OR
	NTC/ NAC in any one of the Electrical, Electronics & IT Trade group (Gr-II) trades categorized under Engg. Drawing'/ D'man Mechanical / D'man Civil' with three years experience.
	Essential Qualification:
	National Craft Instructor Certificate (NCIC) in relevant trade OR
	NCIC in RoDA / D'man (Mech /civil) or any of its variants under DGT.
4. Employability Skill	MBA/ BBA / Any Graduate/ Diploma in any discipline with Two years' experience with short term ToT Course in Employability Skills from DGT institutes.
	(Must have studied English/ Communication Skills and Basic Computer at 12th / Diploma level and above) OR
	Existing Social Studies Instructors in ITIs with short term ToT Course in Employability Skills from DGT institutes.
5. Minimum Age for Instructor	21 Years
List of Tools and Equipment	As per Annexure – I
Distribution of training of	on Hourly basis: (Indicative only)

Year	Total Hrs. /week	Trade Practical	Trade Theory	Workshop Cal. & Sc.	Engg. Drawing	Employability Skills
1 st	40 Hours	25 Hours	7 Hours	2 Hours	2 Hours	4 Hours
2 nd	40 Hours	25 Hours	9 Hours	2 Hours	2 Hours	2 Hours

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOMES (TRADE SPECIFIC)

FIRST YEAR

- 1. Plan and execute soldering and de soldering of various electrical components like Lug's, tag's, clips, Eyelets & Plugs for electronic circuits following safety precautions.
- 2. Plan, estimate, assemble, install and test wiring system in hospital & CSSD department.
- 3. Identify, install, test and operate different photo therapy equipments in Biomedical Sector.
- 4. Perform measurements selecting proper analog/digital instruments.
- 5. Plan and carry out installation, fault detection and repairing of Hospital Electrical appliances.
- 6. Test and service different batteries used in electronics applications and record the data to estimate the repair cost.
- 7. Test various electronics components using proper measuring instruments and compare the data using standard parameter.
- 8. Identify, place, solder, desolder and test different SMD discrete components and IC packages with due care and following safety norms using proper tools/setup.
- 9. Assemble simple electronics power supply circuit and test for functioning.
- 10. Execute testing; evaluate performance and maintenance of sphygmomanometers.
- 11. Verify characteristics of electronics, power electronics and Special Semiconductors circuits.
- 12. Test various Medical gas plant operation using suitable care and safety.
- 13. Test and operate different types of Physiotherapy Equipment's technique and general care.
- 14. Assemble, test and troubleshoot various digital circuits.
- 15. Construct, test and verify the input/output characteristics of various analog circuits.
- 16. Demonstrate the significance of different parts in the organization in the human body (Basics of Human Anatomy and Physiology).
- 17. Execute the operation of different Bio Medical sensors, identify, wire & test various sensors by selecting appropriate test instruments.
- 18. Construct and test different circuits using ICs 741 operational amplifiers & ICs 555 linear integrated circuits and execute the result.
- 19. Identify the working principles, Operation, general care of Clinical Lab Equipments.

SECOND YEAR

- 20. Detect the faults and troubleshoot SMPS, UPS, and Inverter and Battery charger.
- 21. Prepare fibre optic setup and execute transmission and reception.
- 22. Install, test and maintain a CCTV system and configure the system for surveillance function in Hospital department.
- 23. Identify, test, service & program 8085 Micro-processor.
- 24. Demonstrate ICU Department functions, equipments etc., calibration and basic human rating chart.
- 25. Interpret the factors, tools and techniques affecting the medical terminology image quality.
- 26. Demonstrate the functions of bio-medical Department.
- 27. Identify, test, service and program Micro controller 8051.
- 28. Demonstrate various operations and functions of Dental Chair & Dental X-Ray.
- 29. Execute the operation of different of Imaging Equipments used in hospitals.
- 30. Recognize development of a Bio-medical Department in a hospital.

	LEARNING OUTCOMES	ASSESSMENT CRITERIA
		FIRST YEAR
1.	Plan and execute	Plan work in compliance with standard safety norms.
	soldering and de soldering	Identify different types of Electrical components and test.
	of various electrical	Identify various types of lug's and test the polarity.
	components like Lug's, tag's, clips, Eyelets & Plugs	Identify different types of tag's, clips, Eyelets & plug and test the polarity.
	for electronic circuits	Solder the given components.
	following safety	Avoid waste, ascertain unused materials and components for
	precautions.	disposal, store these in an environmentally appropriate manner
		and prepare for disposal.
2.	Plan, estimate, assemble,	Comply with safety & IE rules when performing the wiring.
	install and test wiring	Prepare and mount the energy meter board.
	system in hospital & CSSD	Draw and wire up the consumers main board with ICDP switch
	department.	and distribution fuse box.
		Draw and wire diagram of all CSSD equipment's
		Identify the types of fuses their ratings and applications.
		Identify the parts of a relay, MCB & ELCB and check its
		operation.
		Estimate the cost of material for wiring in PVC channel for an
		office room having 2 lamps, 1 Fan, one 6A socket outlet and
		wire up.
		Estimate the requirement for conduit wiring (3 phase) and wire up.
		Estimate the materials and wire up the lighting circuit for a
		godown.
		Estimate the materials and wire up a lighting circuit for a
		corridor in conduit.
		Test, locate the fault and repair Hospital wiring installation.
3.	Identify, install, test and	Install light fitting with reflectors for direct and indirect lighting.
	operate different photo	Assemble and connect single & twin tube fluorescent light.
	therapy equipments in	Connect, install and test the HPMV & HPSV lamp with
	Biomedical Sector.	accessories.
		Prepare and test a decorative serial lamp set for 240 V using 6V
		bulb and flasher.
		Install light fitting for show case window lighting.
		Plan work in compliance with standard safety norms related

		with electrical illumination system.
4.	Perform measurements	Identify the type of electrical instruments.
	selecting proper	Extend the range of MC voltmeter and ammeter.
	analog/digital	Measure the frequency by frequency meter.
	instruments.	Measure the power and energy in a single & three phase circuit
		using wattmeter and energy meter with CT and PT.
		Measure the value of resistance, voltage and current using
		digital multimeter.
		Measure the power factor in poly-phase circuit and verify the
		same with voltmeter, ammeter, watt-meter readings.
5.	Plan and carry out	Plan work in compliance with standard safety norms related
	installation, fault	with domestic appliances.
	detection and repairing of	Service and Repair of calling bell/ buzzer/ Alarm.
	Hospital Electrical	Service and repair an automatic iron.
	appliances.	Repair and service of oven having multi-range heat control.
		Replace the heating element in a kettle and test.
		Service and repair an induction heater.
		Service and repair a geyser.
		Service and repair a mixer.
		Service and repair of washing machine.
		Install a Suction machine .
		Service and repair of table fan.
		Service, repair and install a ceiling fan.
6.	Test and service different	Identify Tools and instruments for testing of batteries.
	batteries used in	Observe safety procedure during testing of batteries and work
	electronics applications	as per standard norms and company guidelines.
	and record the data to	Identify the primary and secondary cells.
	estimate the repair cost.	Measure and test the voltages of the given cells/ battery using
		analog / digital multimeter.
		Charging and discharging the battery.
		Maintain and estimate the repair cost of secondary battery.
		Use a hydro meter to measure the specific gravity of the
		secondary battery.
7.	Test various electronics	Ascertain and select tools and materials for the job and make
	components using proper	this available for use in a timely manner.
	measuring instruments	Plan work in compliance with standard safety norms.
	and compare the data	Identify the different types of resistors.
		Measure the resistor values using colour code and verify the

_		
	using standard parameter.	reading by measuring in multi meter.
		Identify the power rating using size.
		Measure the resistance, Voltage, Current through series and
		parallel connected networks using multi meter.
		Identify different inductors and measure the values using LCR
		meter.
		Identify the different capacitors and measure capacitance of
		various capacitors using LCR meter.
		Ascertain and select tools and materials for the job and make
		this available for use in.
8.	Identify, place, solder,	Identify the various crimping tools for various IC packages.
	desolder and test	Identify different types of soldering guns and choose the
	different SMD discrete	suitable tip for the application.
	components and IC	Demonstrate the soldering and de-soldering the different active
	packages with due care	and passive components, IC base on GPCBs using solder, flux,
	and following safety	pump and wick.
	norms using proper	Make the necessary setting on SMD soldering station to solder
	tools/setup.	and de-solder various IC's of different packages by following the
		safety norms.
		Identify SMD components, de-solder and solder the SMD
		components on the PCB.
		Check the cold continuity, identify loose/dry solder and broken
		track on printed wired assemblies and rectify the defects.
		Avoid waste, ascertain unused materials and components for
		safe disposal.
		Identify, solder and desolder the PGA components.
9.	Assemble simple	Practice soldering on components, lug and board with safety.
	electronics power supply	Identify the passive /active components by visual appearance,
	circuit and test for	Code number and test for their condition.
	functioning.	Identify the control and functional switches in CRO and
		measure the D.C. & A.C. voltage, frequency and time period.
		Construct and test a half & full wave rectifiers with and without
		filter circuits.
		Construct and test a bridge rectifier with and without filter
		circuits.
		Construct and test a Zener based voltage regulator circuit.
		1 2 201 112 1 11 11
10.	Execute testing; evaluate	Plan work in compliance with standard safety norms related
	performance and	with sphygmomanometers.
	maintenance of	Identify the types of sphygmomanometer and their
		, , , , , , , , , , , , , , , , , , , ,

	sphygmomanometers.	specifications.
		Identify terminals, verify the rubber cuff which is apply to the
		arms.
		Connect and test an instrument for measuring blood pressure.
		Identify the operation and blood pressure monitor.
		Connect to a column of mercury next to a graduate scale.
		Determine of systolic and diastolic blood pressure by increase
		and gradually reduce the pressure in the cuff.
		Perform and operate the BP machine/ sphygmomanometers.
		Construct and test of stethoscope.
		Construct and test of sternoscope.
11.	Vorify characteristics of	Plan work in compliance with standard safety norms
11.	Verify characteristics of	Plan work in compliance with standard safety norms.
	electronics, power	Construct and test the transistor based switching circuits.
	electronics and Special	Construct and test CB, CE & CC amplifier circuit.
	Semiconductors circuits.	Ascertain the performance of different oscillator circuits.
		Measure the resistance, voltage, current through electronic
		circuit using multimeter.
		Construct and test of JFET amplifiers, oscillators and multi
		vibrators.
		Construct and test a UJT as relaxation Oscillator.
		Construct and test lamp dimmer using TRIAC/DIAC.
		Construct and MOSFET, IGBT test circuit and apply for suitable
		operation with proper safety.
		Construct and test a circuit using photo diode and verify its
		characteristics.
12.	Test various Medical gas	Check Mechanical Ventilation, Refrigeration, Air conditioning.
	plant operation using	Test Air curtains, Laminar Flow Systems.
	suitable care and safety.	Apply safety and care of Refrigeration systems and Air
		conditioning systems.
		Maintain Medical Gas pipe lines, Gas generators etc.
13.	Test and operate different	Identify short wave Diathermy Principles.
	types of Physiotherapy	Check Micro Wave Diathermy Principles.
	Equipment's technique	Identify different types of Electrodes used in Physiotherapy
	and general care.	Equipments.
		Check Preparation Equipments, Patient Positioning and
		Application Techniques.
		Take General Care of Transducers / Sensors and Equipments.
14.	Assemble, test and	Illustrate to practice the digital trainer kit with safety.
	troubleshoot various	Identify various digital ICs, test IC using digital IC tester and
	troubleshoot various	including various digital ics, test ic using digital ic tester and

	digital circuits.	verify the truth table.
		Construct and verify the truth table of all gates using NOR and
		NAND gates.
		Construct an adder cum subtractor circuits and verify the truth
		table.
		Construct a decoder and encoder, multiplexer and de-
		multiplexer circuits and verify the truth table.
		Construct a multiplexer and de-multiplexer and verify the truth
		table.
		Construct and verify the truth table of various flip flop, counter
		and shift register circuits.
15.	Construct, test and verify	Ascertain and select tools and instruments for carrying out the
	the input/output	jobs.
	characteristics of various	Plan and work in compliance with standard safety norms.
	analog circuits.	Practice on soldering components on lug board with safety.
		Identify the passive /active components by visual appearance,
		code number and test for their condition.
		Construct and test the transistor based switching circuit.
		Construct and test CB, CE & CC amplifier circuit.
		Ascertain the performance of different oscillator circuits.
		Construct and test clipper, clamper and Schmitt trigger circuit.
16.	Demonstrate the	Explain the roles of the main components and features of a cell
	significance of different	to the cell's functions.
	parts in the organization	Analyze the benefits of cells combining together to form tissues
	in the human body (Basics	with specifications.
	of Human Anatomy and	Description the roles of organ and the interrelationships
	Physiology).	between body system.
	, 3,,	1, ., .,
17.	Execute the operation of	Ascertain and select tools, material for the job and make this
_,.	different Bio Medical	available for use in the timely manner.
	sensors, identify, wire &	Plan work in compliance with safety norms.
	test various sensors by	Demonstrate possible solution and agree task within the team.
	selecting appropriate test	Identify sensors used in process industries such as RTDs,
	instruments.	Temperature ICs, Thermocouples, proximity switches (inductive,
		capacitive and photo electric), load cells, strain gauge. LVDT by
		1
		their appearance.
		Measure temperature of a lit fire using a Thermocouple and
		record the readings referring to data chart.
		Measure temperature of a lit fire using RTD and record the
		readings referring to data chart.

		Massure the DC valtage of Conser & Transducers
		Measure the DC voltage of Sensor & Transducers
		Detect different objectives using capacitive, inductive and
		photoelectric proximity sensors.
18.	Construct and test	Demonstrate analog trainer kit with safety precautions.
	different circuits using ICs	Identify various ICs, differentiate by code No. and test for their
	741 operational amplifiers	condition.
	& ICs 555 linear integrated	Construct and test various OPAMP circuits.
	circuits and execute the	Construct and test R-2R ladder type digital to analog converter
	result.	circuit.
		Construct and test different configurations of 555 IC e.g. astable,
		monostable, bi-astable and VCO circuits.
19.	Identify the working	Identify Cell Counters Principles.
	principles, Operation,	Check Spectrophotometer Principles.
	general care of Clinical Lab	Identify Colorimeter Principles.
	Equipments.	Identify transducers in Analytical Instruments.
		Illustrate operation of Instruments.
		Take general Care of Equipments.
		SECOND YEAR
20.	Detect the faults and	Identify the tools and equipments to perform the job with due
20.	troubleshoot SMPS, UPS,	care and safety.
	and Inverter and Battery	Dismantle the given stabilizer and find major sections/ ICs
	charger.	components.
	51161.6511	Identify various input and output sockets / connectors of the
		given SMPS.
		Identify major sections/ ICs/components of SMPS.
		Identify and replace the faulty components and construct and
		test IC Based DC-DC converter for different voltages.
		<u> </u>
		Identify front panel control & indicators of UPS.
		Identify various circuit boards in UPS and monitor voltages at
		various test points.
		Test UPS under Fault condition & rectify fault.
		Identify the parts, trace the connection and test the DC
		regulated power supply with safety.
		Troubleshoot and service a DC regulated power supply
		Test battery charger for its operation.
21.	Prepare fibre optic setup	Plan and select appropriate tools to complete the job safely.
	and execute transmission	Identify the resources and their need on the given fiber optic
	and reception.	trainer kit.
		Make optical fibre setup to transmit and receive analog and

		digital data.
		Demonstrate and apply FM modulation and demodulation using
		OFC trainer kit using audio signal and voice link.
		Demonstrate PWM modulation and demodulation using OFC
		trainer kit using audio signal.
		Demonstrate PPM modulation and demodulation using OFC
		trainer kit using audio.
22.	Install, test and maintain a	Identify & use different tools and equipment used for
	CCTV system and	installation of CCTV, handle the tools with due care and safety.
	configure the system for	Identify the different CCTV components, Trace or follow the
	surveillance function in	CCTV setup for any commercial installation.
	Hospital department.	Identify the strategic locations for the installation of cameras.
		Plan and setup the procedure for switching the cameras to have
		different views.
		Identify the connectors and sockets used on DVRs, connect CCTV
		Cameras to DVR, Record and Replay.
		Dismantle DVR and identify major functional blocks and test for
		the healthiness.
		Make tools, machine tools, taste measure equipment and
		technical equipment ready for operational use, check and
		maintain such tools and equipment and initiate measures for the
		rectify of errors. Monitor, evaluate and check own work.
		Monitor, evaluate and theck own work.
23.	Identify test service 8	Interpret the procedure as per manual of Micro-processor 8085.
23.	Identify, test, service & program 8085 Micro-	
		Identity various ICs & their functions on the given Micro-
	processor.	processor 8085 Kit.
		Identify the address range of RAM & ROM.
		Write data into RAM & observe its volatility.
		Identify the port pins of the controller & configure the ports for
		Input & Output operation.
		Demonstrate entering of simple programs, execute & monitor
		the results.
24.	Demonstrate ICU	Prepare of kidney chart and eye chart.
	Department functions,	Execute planning setup for ear chart and brain chart.
	equipments etc.,	Calculate and analyze the internal heart chart rate.
	calibration and basic	Sketch blood circulating system.
	human rating chart.	Select and perform the techniques of skeletal system chart,
		respiratory system chart, nerve system chart and digestive
		system chart.

		Plan and prepare reproductive system chart.
		Illustrate the bio medical engineering instrument calibration.
		<u> </u>
25.	Interpret the factors, tools and techniques affecting	Interpret medical terminology quality, resolution, noise and speed.
	the medical terminology	Differentiate between the geometric factors affecting medical
	image quality.	terminology quality.
		Analyse the subject factors affecting medical terminology quality.
		Analyse the tools and technique available to create high quality film.
		Identify different types of equipments calibration procedure
		and error measuring as per manual.
		Conduct systematic troubleshooting.
26.	Demonstrate the functions of bio-medical Department.	Recognize various principles of air conditioning and Refrigeration, types of pumps and compressors, Principles of operation.
		Identify various elements of Intensive-Care Monitoring, Patient
		monitoring displays.
		Identify different Defibrillators, Pacemakers, EMG, EEG.
		Check various monitors: Video monitors etc., Recorders: Strip
		chart recorders, Galvanometric recorders, Ultraviolet recorders
		and other recorders.
		Operate ventilator identifying the physiology of respiratory system.
		Identify instrumentation for the mechanics of breathing, Inhalators, Ventilators, Respirators, Humidifiers, Aspirators, Electro Surgical diathermy.
		,
27.	Identify, test, service &	Differentiate Microprocessor and Micro controller.
	program Micro controller	Identify architecture of 8051 family of Micro controllers, pin
	8051.	diagram and various on chip resources.
		Check various types of memory with 8051 such as On-chip,
		external code memory, External RAM.
		Prepare register Banks and use Memory mapping of the bit
		addressable registers (bit memories).
		Plan and prepare Instruction set and apply various types of
		instructions.
		Identify and select special function registers (SFRs) and their
		configuration for various applications.

Implement various Timer and counting functions, aspect serial communication. Utilize on-chip resources such as ADC etc. Identify and select assembly software and compilers for Micro-controllers, 8052 and differentiate with 8051. 28. Demonstrate various operations and functions of Dental Chair & Dental Switches, Interlocking circuits.	
Utilize on-chip resources such as ADC etc. Identify and select assembly software and compilers for Micro-controllers, 8052 and differentiate with 8051. 28. Demonstrate various operations and functions Identify different components of Dental X-ray machine. Identify and check Collimator, Bucky Grids, Relays, contains	8051
Identify and select assembly software and compilers for Micro-controllers, 8052 and differentiate with 8051. 28. Demonstrate various operations and functions Identify different components of Dental X-ray machine. Identify and check Collimator, Bucky Grids, Relays, contains	8051

Preventive measures for electrical accidents & steps to be taken in such accidents. (02 hrs) 6. Practice elementary on Artificial Respiration. (03 hrs) 7. Use of Fire extinguishers. (05 hrs) 8. Practice soldering on different electronics components Lug's, Tag's, Clips, Eyelets and Plugs. (03 hrs) 9. Practice De soldering using pump and wick. (02 hrs) 10. Identify and use Lug's,

		and the state of t	
		passive electronic components. (02 hrs) 12. Practice soldering on combinational circuits in different values of resistance. (02 hrs) 13. Identify resistors by their appearance and check physical defects. (03 hrs) 14. Practice De soldering the same circuit using pump and wick. (03 hrs) 15. Wire up the consumers main board with ICDP switch and distribution fuse box. (03 hrs) 16. Prepare and mount the energy meter board. (03	
		hrs)	
Professional	Plan, estimate,	17. Practice fixing of screws of	Basic terms such as electric
Skill 25 Hrs;	assemble, install and	different sizes on wooden	charges, Potential difference,
Professional Knowledge 07 Hrs	test wiring system in hospital & CSSD department.	board. (02 hrs) 18. Identify various conduits and different electrical accessories. (02 hrs) 19. Practice cutting, threading of different sizes and laying installations. (05 hrs) 20. Prepare test boards/extension boards and mount accessories like lamp holders, various switches indicator, sockets, fuse, MCB's etc. (09 hrs) 21. Test and check rating of different type of switches, sockets, fuse and MCB's. (07 hrs)	Voltage, Current, Resistance. Basics of AC & DC. Terms such as +ve cycle, -ve cycle, Frequency, Time period, RMS, Peak, P-P, instantaneous value. Insulators, conductors and semiconductor properties, Single phase and Three phase power, Terms like Line and Phase voltage/ currents. Working principle of PMMC type ammeter. Conversion of ammeter into voltmeter. Working principles and study of Block diagrams / Schematic diagrams of Analog Multimeter. Working principles and study of Block diagrams / Schematic diagrams of Digital
Professional	Identify, install, test	22. Install electrical line 110 V.	Multimeter. (07 hrs) Different type of electrical
	and operate different	(02 hrs)	cables and their specifications.
	1	, ,	

Skill 25 Hrs:	photo therapy	23. Install and test using light	Different types of Cables used
Skill 25 Hrs; Professional Knowledge 07 Hrs	photo therapy equipments in Biomedical Sector.	 23. Install and test using light fitting with reflector for direct and indirect lighting. (06 hrs) 24. Test and identify different groups wattage of lamps in series for specified voltage. (04 hrs) 25. Practice installation of various lamps e.g. fluorescent tube, Tub light/CFL etc. (05 hrs) 26. Identify different types of analog & digital multimeters parts, its function and operation. (04 hrs) 27. Practice on various analog and digital measuring instruments. (02 hrs) 28. Practice on measuring instruments in single and three phase circuits. (02 hrs) 	Different types of Cables used in the electronic industries. Different types of Cables used in the electronic industries. Ohm's law and its variables. Different types of UVB, Halogen, Tube lights, UV, Lights, IR lights, CFL Photo Therapy Working principles and study of Block diagrams / Schematic diagrams of Digital LCR meter. (07 hrs)
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Perform measurements selecting proper analog/digital instruments.	 29. Identify the phase, neutral & earth on power socket, use a tester to monitor AC power. (03 hrs) 30. Construct a test lamp and use it to check mains healthiness. (02 hrs) 31. Measure the voltage between phase and ground and rectify earthing. (02 hrs) 32. Refer table and find current carrying capacity of wires. (02 hrs) 33. Measure voltage and current using clamp meter. (01 hr) 34. Dismantle and identify the different parts of a relay. 	Types and Properties of magnets and their materials, preparation of artificial magnets, Significance of Electromagnetism, types of cores. Electromagnetic Relays, types, construction, specifications. (07 hrs)

		(02 hrs)	
		(03 hrs) 35. Connect a timer relay in a circuit and test for its working. (04 hrs) 36. Connect a contractor in a circuit and test for its working. (04 hrs) 37. Practice on electrical wiring diagram for 3 phase connection. (04 hrs)	
Professional	Plan, estimate,	38. Wire up the consumers	Overload Relay, Fuse ratings,
Skill 50 Hrs;	assemble, install and	main board with ICDP	types of Fuses, Fuse bases,
Professional	test wiring system in hospital & CSSD	switch and distribution house box. (06 hrs)	single/three phase MCB's, single phase ELCB's.
Knowledge 14 Hrs	department.	 39. Estimate the cost/bill of material for wiring of hostel/ residential building and workshop. (07 hrs) 40. Practice wiring of hostel and residential building as per IE rules. (05 hrs) 41. Practice on wiring of UPS and inverter diagram, test/fault detection of domestic and industrial wiring installation and repair. (07 hrs) 	Phase angle, phase relations, active and reactive power, power factor and its importance in the industry. Three phase Transformers and their Types of Contractors, contactor coils and working voltages (07 hrs)
		42. Wire up the OPD, general	contactor contact currents,
		ward and ICU main board	protection to contactor s and
		with ICDP switch and	high current applications
		distribution fuse box. (03	Resistor -definition, types of

		general ward as per IE	circuits. V & I in series parallel
		rules. (03 hrs)	circuits.
		46. Practice wiring diagram of	Principles of induction,

		ICU as per IE rules. (03 hrs) 47. Practice wiring diagram of minor OT as per IE rules. (03 hrs) 48. Install various light fitting with reflectors for direct and indirect lighting of OT. (03 hrs) 49. Practice test/fault detection of minor OT and OT wiring installation and repair. (04 hrs)	inductive Reactance, Self and Mutual induction. Behaviors of inductor at low and high frequencies. series and parallel combination, Q factor. (07 hrs)
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Identify, install, test and operate different photo therapy equipments in Biomedical Sector.	 50. Group different wattage of ultra violet lamp in series for specified voltage. (06 hrs) 51. Connect a contactor in ultra violet lamp and test for its working. (05 hrs) 52. Install light fitting for a spot lighting. (04 hrs) 53. Install light fitting for photo therapy. (05 hrs) 54. Practice testing/fault detection of UV lamp, spot lamp and photo therapy installation and repair. (05 hrs) 	Construction & its application Capacitance and Capacitive Reactance, Impedance Types of capacitors, construction, Specifications and applications. Dielectric constant. Significance of Series parallel connection of capacitors. Capacitor behavior with AC and DC. (07 hrs)
Professional Skill 100 Hrs; Professional Knowledge 28 Hrs	Plan and carry out installation, fault detection and repairing of Hospital Electrical appliances.	55. Dismantle and assemble electrical/electronic parts of various electronic appliances e.g. Iron box, Radiant warmer, Auto cutoff multi coil, nebulizer, AC & DC motor. (05 hrs) 56. Service and repair of electrical/electronic irons. (05 hrs) 57. Prepare and test of silicon pipe sealer. (05 hrs) 58. Measure and test of clinical sterilizer. (05 hrs) 59. Practice testing/fault	Concept of Time constant of a RC circuit. Concept of Resonance and its application in RC, RL & RLC series and parallel circuit. Wheatstone bridge circuits, Introduction, Balances, Hot plate and Magnetic Stirrer Centrifuges, Hot air oven, Incubator, Water bath, Nebulizer Construction & Testing of

detec	tio	n	of	ć	autocl	lave
(with	&	wit	thou	t	auto	cut
off m	ulti	coi	I). (O	7	hrs)	

- 60. Plan and prepare of incubator. (05 hrs)
- 61. Service and repair of radiant warmer. (05 hrs)
- 62. Prepare and mount for setup baby clinical incubator. (05 hrs)
- 63. Prepare and mount the proper nebulizer. (05 hrs)
- 64. Identify different terminals and parts of electrical wiring diagram for water pump with auto controller. (08 hrs)
- 65. Identify parts and terminals of different types of single phase AC motors. (05 hrs)
- 66. Install, connect and determine performance of single phase AC motors. (05 hrs)
- 67. Identify parts and terminals of different types of single phase DC motors. (05 hrs)
- 68. Install, connect and determine performance of single phase DC motors. (05 hrs)
- 69. Connect, set proper direction of rotation and run. (05 hrs)
- 70. Identify and test permanent magnet DC motor. (05 hrs)
- 71. Identify and test brush less DC motor. (05 hrs)
- 72. Service and repair of mixer and fan. (05 hrs)

Baby / clinical Incubator,
Radiant warmer

Construction & Testing of Baby / clinical Incubator,

Construction & Testing of Radiant warmer

Electrical motors: AC Motor (single phase induction motor) construction, sub assemblies, type of winding used, interpretation of name plate specifications

Conventional speed control methods. Types of AC motors and their applications.

Starting of split phase motor and three phases AC motors. DC Motor construction, sub assemblies, carbon brushes interpretation of name plate

Specifications, conventional speed control methods and applications. Types of DC motors and their applications. (28 hrs)

		73. Install, connect and determine performance of centrifuge. (05 hrs)	
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Test and service different batteries used in electronics applications and record the data to estimate the repair cost.	74. Identify the rated various types of cells output voltage and Ah capacity of given battery. (03 hrs) 75. Practice on grouping of cells for specified voltage and current under different conditions and care. (02 hrs) 76. Measure the specific gravity of the electrolyte using hydrometer. (03 hrs) 77. Practice on routine, care/maintenance and testing of batteries. (03 hrs) 78. Measure the resister value by colour code and verify the same by measuring with multimeter. (02 hrs) 79. Identify the different type of passive components with colour code SMD and DIP package. (02 hrs) 80. Identify the different type of active components of SMD and DIP package. (02 hrs) 81. Identify different types of transformers and test. (02 hrs) 82. Verify terminals, identify HT and LT side and calculate transformation ratio of single phase transformers. (02 hrs) 83. Determine voltage regulation of single phase transformer at different loads. (02 hrs)	Battery /Cells: construction, types of primary and secondary cells, materials used specification of cells and batteries. Charging process, efficiency, shelf life, Selection of cells / Batteries etc Use of Hydrometer. Types of electrolytes used in cells and batteries. propagation delay, power dissipation and noise immunity (07 hrs)

		84. Identify different types of auto transformers and test. (02 hrs)	
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Test various electronics components using proper measuring instruments and compare the data using standard parameter.	85. Identify resistors by their appearance and check physical defects. (03 hrs) 86. Identify the power rating of carbon resisters by their size. (03 hrs) 87. Practice on measurement of parameters in combinational circuit by applying Ohm's Law for different resistor values and voltage sources. (05 hrs) 88. Measurement of current and voltage in circuits to verify Kirchoff's law. (04 hrs) 89. Verify Laws of series and parallel circuits with voltage source in different combinations. (03 hrs) 90. Measure unknown resistance using Wheatstone bridge circuits. (03 hrs) 91. Identify and measure VI characteristics of LDR and	Working principle of a Transformer, Transformer construction, Types of cores used Specifications of a transformer. Step-up, Step down and isolation transformers with applications. Different type of losses in Transformers. (07 hrs)
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Identify, place, solder, desolder and test different SMD discrete components and IC packages with due care and following safety norms using proper tools/setup.	92. Practice soldering on different electronics components, IC bases and PCB's. (01 hrs) 93. Practice desoldering using pump and wick. (01 hrs) 94. Join the broken PCB track and test. (02 hrs) 95. Identification of 2,3,4 terminal SMD components. (01 hrs) 96. Desolder the SMD	PCB design making, Identification of 2/3/4 terminal SMD components. Soldering / de soldering of above components. Interpretation of diode specifications Forward current and Reverse voltage, Packing styles of diodes. Semiconductor component number coding for different

		components from the	electronic components such as
		given PCB. (03 hrs)	Diodes, Zeners, Transistors,
		97. Solder the SMD	FETs, MOSFETs, IGBTs. PN
		components in the same	Junction, Forward and Reverse
		PCB. (03 hrs)	biasing of diodes (07 hrs)
		98. Check for cold continuity	, ,
		of PCB. (03 hrs)	
		99. Identify various	
		connections and setup	
		required for SMD soldering	
		station. (03 hrs)	
		100. Identify different types of	
		Si & Ge diodes and their	
		specifications. (02 hrs)	
		101. Measure the voltage and	
		current through a diode	
		in a circuit and verify its	
		forward characteristics.	
		(03 hrs)	
		102. Measure the voltage	
		and current through a	
		Zener diode in a circuit	
		and verify its forward	
		characteristics. (03 hrs)	
Professional	Assemble simple	103. Identify the different	Diode Bridge Modules.
Skill 25 Hrs;	electronics power	controls on the CRO front	Rectifier configurations, their
	supply circuit and test	panel and observe the	efficiency, Filter components
Professional	for functioning.	function of each control.	and their role in reducing

		parameters. (04 hrs)	of Linear power supplies.
		105. Construct and test a half	Front panel controls and
		wave, full wave and	features of various power
		bridge rectifier circuit	supplies.
		with and without filter.	
		(03 hrs)	Different types of power
		106. Construct and test	switches and heat sinks used in
		voltage doubler's,	power supplies. Manual &
		tripler's and quadruple's.	automatic and servo voltage
		(04 hrs)	stabilizers-concept and block
		107. Construct and test a dual	diagram, o/p voltage

		1 (001)	and the second of the second
		power supply. (03 hrs) 108. Construct and test different regulated power supply and measure output voltage with load. (03 hrs) 109. Measure ripple voltage, ripple frequency and ripple factor of rectifiers for different load and filter capacitors. (05 hrs)	adjustment, voltage cutoff systems, study of different types of relays used in stabilizers, study of electronic circuit commonly used, buck and boost concept. (07 hrs)
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Execute testing; evaluate performance and maintenance of sphygmomanometers.	110. Identify terminals verify the rubber cuff which is apply to the arms. (04 hrs) 111. Construct and test sphygmomanometer for measuring blood pressure. (04 hrs) 112. Execute planning setup for blood pressure monitor examination. (05 hrs) 113. Determine the thermal effect of electric current. (03 hrs) 114. Measure and test of stethoscope. (04 hrs) 115. Construct and test of BP operator/ Sphygmomanometers. (05 hrs)	Sphygmomanometer: Names, Types (manual and digital), Operation, significance (07 hrs)
Professional Skill 75 Hrs; Professional Knowledge 21 Hrs	Verify characteristics of electronics, power electronics and Special Semiconductors circuits.	116. Identify different types of transistors and their specification. (04 hrs) 117. Measure the voltage and current of different types of transistors in a circuit and verify its characteristics and measure Alpha, Beta and Gama. (06 hrs) 118. Construct and test fixed	Transistor biasing circuits and stabilization techniques. Voltage amplifiers- voltage gain, loading effect. configuration of common emitter configuration of common base their definition characteristics and application Configuration of common collector transistor their

- bias, ammeter bias and voltage divider bias of a transistor amplifier circuit. (05 hrs)
- 119. Identify different types of photo diodes, tunnel diodes, variactor diodes and lascer diodes and their specifications. (04 hrs)
- 120. Measure the voltage and current through a photo diode in a circuit and verify its characteristics. (04 hrs)
- 121. Construct a circuit to switch a lamp load using photo diode. (03 hrs)
- 122. Measure the voltage and current through a tunnel diode in a circuit and verify its characteristics. (05 hrs)
- 123. Measure the voltage and current through a variactor diode in a circuit and verify its characteristics. (04 hrs)
- 124. Measure the voltage and current through a LASCR diode in a circuit and verify its characteristics. (04 hrs)
- 125. Identify different types of DIAC, TRIAC, SCR, SCS, SBS & SUS and their specification. (05 hrs)
- 126. Measure the voltage and current through DIAC & TRIAC in different circuits and verify its characteristics. (04 hrs)
- 127. Measure the voltage and

definition characteristics and application,

Construction, Working of a PNP and NPN Transistors. Purpose of E, B & C Terminals. Flow of currents into and out of terminals of PNP/ NPN Transistors and their relations

Significance of $\boldsymbol{\beta}$ of a Transistor. Methods of coupling.

CE ,CB,CC amplifier circuit and their characteristics Alpha ,beta, voltage gain

Construction of FET, differentiate it with BJT. Purpose of Gate Drain and source terminals and voltage/current relations between them. Amplification factor of FET. Need for Biasing of Transistor junctions

Interpretation of main parameters of a Transistor, $V_{BE,}$ $V_{CB}, V_{CE}, I_{C}, I_{B},$ Junction Temperature,

Impedance between various terminals

Interpret the main parameters of the FET. Suitability of FET amplifiers in measuring device applications

Working of power electronic components such as SCR, TRIAC, DIAC, UJT, MOSFET and IGBT junction capacitance, Frequency of operation, Discuss a Transistor application

		current through SCR & SCS in different circuit and verify its characteristics. (04 hrs) 128. Measure the voltage and current through SBS & SUS in different circuits and verify its characteristics. (04 hrs) 129. Identify Different types of UJT, PUT, FET, IGBT, GTO and MOSFET. (05 hrs) 130. Measure the voltage and current through UJT & PUT in different circuits and verify its characteristics. (04 hrs) 131. Measure the voltage and current through FET & IGBT in different circuits and verify its characteristics. (05 hrs) 132. Measure the voltage and current through GTO & MOSFET in different circuits and current through GTO & MOSFET in different circuits and verify its	as a switch. Discuss a Transistor application as an amplifier, Define input impedance and output impedance amplifier. configuration of common collector transistor their definition characteristics and application Classification of amplifiers according to frequency, mode of operation, Distinguish between voltage and power amplifier Types and effect of negative feedback in amplifiers Working of emitter follower circuit and its advantages different packages styles of transistors, in-circuit testing of transistor (21 hrs)
		characteristics. (05 hrs)	
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Test various Medical gas plant operation using suitable care and safety.	 133. Identify the different gas plant safety precaution while working. (04 hrs) 134. Measure & Test of Hospital Oxygen o₂ gas plant. (04 hrs) 	Introduction to safety precaution for different gas plants, Hospital Oxygen o ₂ gas plant, Hospital nitrous (n ₂ o) plant.
		135. Construct & Test of Hospital nitrous (n ₂ o) plant. (04 hrs)	Hospital Gas Plant Layout (03 hrs)
	Test and operate different types of Physiotherapy Equipment's technique and general care.	 136. Identify different types of diathermy and their system. (04 hrs) 137. Operate & Test of shot wave diathermy. (04 hrs) 138. Operate & Test of micro wave diathermy. (05 hrs) 	Electric stimulation of Nerve & Muscle, Faradic-type current, Interrupted, Direct current, Iontophoresis, TNS or TENS, IFT, Methods of heating the tissues, Diathermy, Infra-Red radiation, LASER, Ultrasonic.

			Therapy, Ultra-violet Radiation, Cold therapy, Mechanics (04 hrs)
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Assemble, test and troubleshoot various digital circuits.	 139. Familiarize digital IC's. (02 hrs) 140. Identify different Logic Gates (AND, OR, NAND, NOR, EX-OR, EX-NOR, NOT ICs) by the number printed on them. (05 hrs) 141. Verify the truth tables of all Logic Gate ICs by connecting switches and LEDs. (03 hrs) 142. Construct and verify the truth table of all the gates using NAND and NOR gates. (03 hrs) 143. Use digital IC tester to test the various digital ICs (TTL and CMOS). (05 hrs) 144. Verify the switching circuits of all logic circuit with the help of Boolean equation. (02 hrs) 145. Verify the Truth table for De-Morgans first law and second law and from the result draw the logic gates. (05 hrs) 	Difference between analog and digital signals, logic levels of TTL and CMOS Introduction to Digital Electronics, Number systems and codes Digital code: binary, octal, Excess 3 code, grey code, BCD code, ASCII code and code conversions, Logic Gates and their truth tables, Study of a Digital IC Tester: Specifications & Block diagram, Operation and circuit description of a Digital IC Tester, Logic families like TTL/CMOS and sub families and their comparison. Availability of logic gates in multiple numbers in a package with examples. Combinational logic circuits such as AND-OR Logic, AND-OR invert Logic s Universal property of NAND and NOR gates. Combinational logic circuits such as Half Adder, Full adder, Parallel Binary adders. IC 7482 as 2-bit and four bit full adders. Magnitude compactors. Half adder, full adder ICs and their applications for implementing

Project work/Industrial visit

Broad areas:

- a) Construct and test of four bit synchronous binary counter using IC 74163.
- b) Construct and test bidirectional shift resistor.
- c) Construct and test instrumentation amplifier.
- d) Construct and test R-2R ladder type digital to analog converters circuit.
- e) Construct and test a class B complementary push pull amplifier.

and coagulation). (10 hrs)

	SYLLABUS - TECHNICIAN MEDICAL ELECTRONICS				
		SECOND YEAR			
Duration	Reference Learning Outcome	Professional Skills (Trade Practical) With Indicative Hours	Professional Knowledge (Trade Theory)		
Professional Skill 50 Hrs; Professional Knowledge 18 Hrs	Identify, place, solder and desolder and test different SMD discrete components and IC,s package with due care and following safety norms using proper tools/setup.	216. Identify PGA packages.(10hrs) 217. De-solder the PGA components. (10 hrs) 218. Solder the PGA components. (10 hrs) 219. Identify lose /dry solders, broken tracks on printed wiring assemblies. (20 hrs)	assemblies. (18 hrs)		
Professional Skill 50 Hrs; Professional Knowledge 18 Hrs	Detect the faults and troubleshoot SMPS, UPS and Inverter and Battery charger.	 220. Identify various input and output sockets/connectors /indicators on the given UPS. (05 hrs) 221. Make individual connections between batteries of battery stack and test for healthiness of batteries on stack. (05 hrs) 222. Connect battery stack to the UPS. (05 hrs) 223. Make load test to measure backup time. (05 hrs) 224. Identify isolator transformer, inverting transformer and control transformers. (05 hrs) 225. Adjust charging current according to number of batteries. (05 hrs) 226. Identify various circuit boards and monitor voltages at vital test 	Block diagram and working principle of different types UPS. Specifications of a typical		

Professional Skill 50 Hrs; Professional Knowledge 18 Hrs	Prepare fibre optic setup and execute transmission and reception.	points. (05 hrs) 227. Identify the charging section and set the charging curren according to backup Perform a load test to UPS. (05 hrs) 228. Identify the semiconductor power modules and measure voltages. (05 hrs) 229. Maintain, Service and troubleshoot Battern charger and UPS. (05 hrs) 230. Cutting, cleaning and preparing of fibre cable for splicing. (10 hrs) 231. Splicing of OFC using splicing machine. Testing of OFC using OTDR. (15 hrs) 232. Measure propagation return and bending	LINE and ONLINE. Difference between Inverters and UPS. Selection of UPS — calculation of load power, Line interactive UPS, ON- Line UPS, their circuit description and working- controlling circuits, Micro controller circuits, power circuits, charging circuits, alarm circuits, Indicator circuits. (18 hrs) Intro to optical fiber as a transmission media, its advantages over other media. Working principle of transmitter and receiver in fiber optic communication. Application and advantages of fiber optic communication
Professional	Install, test and	losses etc. (10 hrs) 233. Measure optical signal power using optical power meter. (05 hrs) 234. Test the optical fibracable using Visual Faul locator. (05 hrs) 235. Make optical fibre setup to transmit and received analog. (05 hrs) 236. Identify different CCTV	testing, losses, types of fiber optic cables and specifications, Fiber optic Encoding of light, Fiber optic joints, splicing, testing and the related equipment s/measuring tools, precautions to be taken, laying of cables, safety aspects while handling optical cables. (18 hrs) Introduction of CCTV,
Skill 50 Hrs; Professional Knowledge 18 Hrs	maintain a CCTV system and configure the system for surveillance function in Hospital department.	components. (05 hrs) 237. Draw, trace or follow the CCTV setup of an commercial installation (05 hrs) 238. Identify the strategical locations for the installation of camera (05 hrs)	multiple frame split in digital TV, restore old memories, format new & old hard disk. (18 hrs)

		 239. Identify various indicators, cables, connectors and ports on the computer cabinet. (05 hrs) 240. Demonstrate various parts of the system unit and motherboard components. (05 hrs) 241. Identify various computer peripherals and connect it to the system. (05 hrs) 242. Install a Printer driver software and test for print outs (05 hrs) 243. Install antivirus software, scan the system and explore the options in the antivirus software. (05 hrs) 244. Install MS office software. (05 hrs) 245. Connect network connectivity for backup recovery. (05 hrs) 246. Prepare multiple frame split. 249. Identify LCD Display module and its decoder/driver ICs (05 hrs)

	Pre-Natal Diagnostic
	Techniques). (36 hrs)

Project Work/Industrial Visit

Broad areas:

- a. Draw and identify & test of pulse oxymeter, EMG, ECG different controls of related equipments.
- b. Identify various ICs and their functions on the given microcontroller kit.
- c. Write a programme to use on board ADC and converter the analog voltage signal into digital value and store it memory.
- d. List the defect and symptom in the faulty SMPS.
- e. Connect battery and load to UPS and test to measure backup time of battery.

SYLLABUS FOR CORE SKILLS

- 1. Workshop Calculation & Science (Common for two year course) (80Hrs + 80 Hrs)
- 2. Engineering Drawing (Common for Group-II (Electrical, Electronics & IT Trade Group)) (80Hrs + 80 Hrs)
- 3. Employability Skills (Common for all CTS trades) (160Hrs + 80 Hrs)

Learning outcomes, assessment criteria, syllabus and Tool List of Core Skills subjects which is common for a group of trades, provided separately inwww.bharatskills.gov.in

LIST OF TOOLS & EQUIPMENT TECHNICIAN MEDICAL ELECTRONICS (For batch of 24 Candidates) S No. Name of the Tools and Equipment **Specification** Quantity A. TRAINEES TOOL KIT (For each additional unit trainees tool kit Sl. 1-12 is required additionally) 1. Connecting screwdriver 100 mm 25 nos. 2. 500 V. 25 nos. Neon tester 3. Screw driver set set of 5 25 nos. 4. Insulated combination pliers 150 mm 25 nos. 5. Insulated side cutting pliers 150 mm 25 nos. 6. Long nose pliers 150 mm 25 nos. 7. Soldering iron 25 W. 240 V. 25 nos. 8. Electrician knife 25 nos. 9. **Tweezers** 100mm 25 nos. 10. **Digital Multimeter** 25 nos. 11. Soldering Iron Change able bits 15 W 25 nos. 12. 25 nos. De-soldering pump B. SHOP TOOLS, INSTRUMENTS - For 2 (1+1) units no additional items are required 13. Fire extinguisher 1 no. 14. First aid kit 1 no. 15. **Artificial Respiration Chart** 2 nos. 16. Rubber mat -180x45x2.5 cm 3 nos. 17. Rubber gloves pair 1 set 18. Steel ruler 30 cm 12 nos. Scriber 19. 15 to 20 cm 4 nos. 4 nos. 20. Center Punch 10 cm 21. 110 cm with handle 4 nos. Hammer cross pane 22. Hammer ball pane 220 cm with handle 4 nos. 23. Spanners double ended (metric 6mm to 19mm by 1.6mm 4 sets system) 24. Spanners single ended 6mm to 25mm by 1.0m 2 sets 25. Box spanner set of (4-15) mm 1 set 26. Mallet 8 oz 2 nos. 27. Saw tenon 25 cm 2 nos. 15cm set of 6mmto 25mm 28. Chisel wood 2 sets 29. Chisel cold flat 10mm 2 nos. Ratchet brace drill 30. 10mm 2 nos. 31. Electric drill 10mm 2 nos.

32.	Hacksaw	20-25cm (adjustable)	4 nos.
33.	Junior saw	20cm	2 nos.
34.	File flat	20cm 2 nd cut	4 nos.
35.	File flat	15 cm bastard	4 nos.
36.	File half round	20cm bastard	4 nos.
37.	File round	20cm 2 nd cut	4 nos.
38.	Instrument files (needle)	set of 12	2 nos.
39.	Vice bench	10cm jaw	2 nos.
40.	Vice bench	5cm jaw	2 nos.
41.	Taps set	3mm to 10mm (set of 9)	2 nos.
42.	Dies set	3mm to 10mm	2 nos.
43.	Grinder bench electric		1 no.
44.	Soldering iron	25 Watt	12 nos.
45.	Soldering iron	10 Watt	12 nos.
46.	Temperature controlled soldering station	15 Watt	2 nos.
47.	De-soldering pump		2 nos.
48.	Wire gauge set		2 nos.
49.	Feeler gauge		2 nos.
50.	Permanent bar magnet	15 cm	2 nos.
51.	Solenoid with core		2 nos.
52.	Electric bells		4 nos.
53.	Battery eliminator		8 nos.
54.	Batter storage lead acid		2 nos.
55.	Hydrometer		2 nos.
56.	Rheostats asserted values and ratings		12 nos.
57.	Variable resistors/Potentiometer		12 nos.
58.	Fractional H.P. AC meters		2 nos.
59.	Fractional H.P. DC meters		2 nos.
60.	Constant voltage transformer/Auto		4 nos.
61.	Auto Coil winding m/c. (manual)		1 nos.
62.	D.C./A.C. Ammeter	0-1mA	4 nos.
63.	D.C./A.C. Ammeter	0-5mA	4 nos.
64.	D.C./A.C. Ammeter	0-50mA	2 nos.
65.	D.C./A.C. Ammeter	0-100mA	2 nos.
66.	D.C./A.C. Ammeter	0-500mA	2 nos.
67.	Digital multi-meter		12 nos.
68.	Thermo-couple meter R.F.	0-100mA	1 no.
69.	Thermo-couple meter R.F.	0-500mA	1 no.
70.	D.C/A.C. Voltmeter	0-5V	4 nos.
71.	D.C/A.C. Voltmeter	0-10V	4 nos.
72.	D.C/A.C. Voltmeter	0-50V	4 nos.

73.	D.C/A.C. Voltmeter	0-500V	2 nos.
74.	D.C/A.C. Voltmeter	0-5KV	2 nos.
75.	Watt meter	5/250V	2 nos.
76.	Insulation Tester	3/230V	2 nos.
	Service Oscillator		
77.			4 nos.
78.	Signal tracer		4 nos.
79.	A.F. Oscillator		4 nos.
80.	Micro Wave Diatherrmy		1 no.
81.	Ultra sonic diathermy		1 no.
82.	ECG Recorder		2 nos.
83.	Bed side monitor		2 nos.
84.	Defibrillator		1 no.
85.	Pace maker		2 nos.
86.	60mA Mobile x-ray equipment		1 no.
87.	Dental x-ray equipment		1 no.
88.	Dental Chair		1 no.
89.	Portable Ultra sonic scanner	(MOU) any hospital / Industries	1 no.
90.	Surgical diathermy		1 no.
91.	Pulse Oximeter		1 no.
92.	Operation Theater lighting system		2 nos.
93.	Refrigerator		1 no.
94.	Baby incubator		1 no.
95.	Conductivity meter		2 nos.
96.	Ventilators		1 no.
97.	Simple sterilization equipment		4 nos.
98.	U-V/ IR lamps		4 each
99.	C.R.O (20 MHz)		5 nos.
100.	Digital storage oscilloscope (20MHz)		1 no.
101.	Function Generator		5 nos.
102.	Power supply 0-30V/D.C.		2 nos.
103.	Power supply 0-300V/D.C		2 nos.
104.	Strain gauge with load cell		2 nos.
105.	Allen Key set		2 nos.
106.	SWG		2 nos.
107.	Linear IC trainer		5 nos.
108.	Personnel computer with latest	CPU: 32/64 Bit i3/i5/i7 or	4 nos.
	configuration	latest processor, Speed:	
		3 GHz or Higher. RAM:-4

158.	Refrigeration and Air conditioning Tutor		1 no.
159.	Air conditioners		As Required
160.	Earth leakage tester		1 no.
161.	Blood cell counter		1 no.
162.	DARK ROOM ACCESSORIES: a) Film viewer	(18" x 15")	1 no.
	b) Cassettes	(12" x 15", 10" x 12"and	1 each
	c) Safe light	10" x 8")	1 no.
	d) Set of tanks for 18 liters capacity	10 70 /	1 set
	Stainless Steel (Master tank, Developer tank,	(12' x 15", 10" x 12" and 10" x 8")	1500
	separator tank and Fixer tank.)	10 70 /	1 each
	e) Hangers		1 Dozen
	f) Stainless steel clips g) Lead Apron	4' x 6' with lead glass	1 no.
	g) Lead Apron h) Lead protection screen	window	1 no.
163.	Consumables	William I	
105.	a. Electrical fuses - Assorted/		
	different types		
	b. Thermal paper roll for ECG		
	recorder.		
	c. Conductivity gel for ECG		As required
	isposable skin surface		
	electrodes.		
	d. Chemicals for pathology lab		
	e. Medicated cotton.		
Note: -			

Note: -

- 1. Internet facility is desired to be provided in the class room.
- 2. All the tools and equipment are to be procured as per BIS specification.

The DGT sincerely acknowledges contributions of the Industries, State Directorates, Trade Experts, Domain Experts, trainers of ITIs, NSTIs, faculties from universities and all others who contributed in revising the curriculum.

Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

	ed immensely in this curriculum.				
	List of Expert Members participated/ contributed for finalizing the course curriculum of Technician Medical Electronics held at MCEBTI-ITI Bangalore from on 09 th & 10 th February' 2018
