	Annexure I (List of Trade Tools & Equipment)	55
	Annexure II (List of Trade experts)	71

During the two years duration a candidate is imparted training on subjects Professional Skill, Professional Knowledge, Engineering Drawing, Workshop Science & Calculation and Employability Skills related to job role. In addition to this a candidate is entrusted to make/do project work and Extra Curricular Activities to build up confidence. The practical skills are imparted in simple to complex manner & simultaneously theory subject is taught in the same fashion to apply cognitive knowledge while executing practical task.

The course broadly covers all aspect of Skills required to work in the field of Mechatronics.

<u>FIRST YEAR</u>: In this year, the practical part starts with basic fitting work to make job as per specification applying different types of basic Fitting and machining viz., Drilling, Turning, Milling and Grinding operations. The trainee will be able to Produce components by different operations and check accuracy using appropriate measuring instrument. Apply different fits for assembling of components as per required tolerance, observing principle of interchangeability and check for functionality. Produce components involving different operation on Lathe, Milling and Grinding machine observing standard procedure and check for accuracy. The candidates also learn about basic computer operation such as MS-Office and basic troubleshooting related to the computer. The welding and brazing are also covered during this year. The safety aspects cover components like OSH&E, PPE, Fire extinguisher, First Aid and in addition 5S of Kaizen is being taught.

The imparted training on basic Electrical and Electronics sub-systems and its measuring techniques using appropriate Measuring instruments, Operate and troubleshoot AC/DC machines and drives. Acquire the skill of reading and analyzing Electrical and Electronics drawings. Construct, analyze and troubleshoot Electrical and Electronic circuits. Assemble and Disassemble Electrical and Electronic components by Soldering and de-soldering techniques. Carry out Industrial panel wiring. Understand and troubleshoot Protective devices in Electrical system. Understand the Digital logic circuits and its applications. Acquire computer skills such as Software installation. Knowledge on basic programming of Microcontroller and its Interfacing techniques, troubleshooting of electrical & electronics system are also covered.

SECOND YEAR: Operates CNC turn centre and CNC milling machine to produce simple components. The trainee also gets knowledge of different sensors viz., inductive, capacitive, magnetic etc and carries out related practical on the same. The student understands the principles of hydraulics, the basic functions of hydraulic systems and the functions of valves (flow control, pressure control, directional control). Attain the skill of reading and analyzing

Hydraulic and Pneumatic drawings. Recognize circuit symbols and diagrams to ISO 1219, construct basic hydraulic circuits as per drawings, understand and follow safe practice. Acquire the knowledge on the functions of power packs, pumps, filters and reservoirs. Understand the units and measurement scales associated with compressed air system. Understand the functioning of standard pneumatic cylinders and valves, read pneumatic circuit diagrams and understand Pneumatic symbols. Construct simple pneumatic controls as per drawing. Read, understand and analyze Electro-Pneumatic circuit diagrams, understand fundamental terminology and symbols of Electro-Pneumatic control, understand the function and operation of a range of proximity sensors, read, interpret and construct motion diagrams. Construct multicylinder control circuit. Fault diagnostics procedure and Troubleshooting of Hydraulics and Pneumatics sub-systems. Executes programming on PLC.

The Trainee gets awareness on Robotics and its application, the trainee will be able to develop, test and troubleshoot circuits using simulator software for Electrical, Electronics, Hydraulic and Pneumatic systems. Able to fabricate and assemble while working model project on Mechatronics [Example: Project-"Pick and Place Mechatronics system" involving Fitting, Drilling, Turning, Milling, Grinding, Electrical wiring, programming, Hydraulic circuit assembly, Pneumatic circuit assembly, Drives, system assembly and Interfacing, functional testing, trouble shooting and repair. Safety measures in each stage.]

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under the aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

CTS courses are delivered nationwide through network of ITIs. The course 'Technician Mechatronics' is of two-year duration. It mainly consists of trade (skills and knowledge) and Core area (Workshop Calculation & Science, Engineering Drawing and Employability Skills). After passing out of the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Trainee broadly needs to demonstrate that they are able to:

- Read & interpret technical parameters/documentation, plan and organize work processes, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional knowledge, core skills & employability skills while performing the job of a Technician Mechatronics and machining work.
- Check the job/components as per drawing for functioning identify and rectify errors in job/components.
- Document the technical parameters related to the task undertaken.

2.2 PROGRESSION PATHWAYS:

- Can join industry as Technician and will progress further as Senior Technician, Supervisor and can rise up to the level of Manager.
- Can become Entrepreneur in the related field.
- Can take admission in diploma course in notified branches of Engineering by lateral entry.
- Can join Apprenticeship programme in different types of industries leading to a National Apprenticeship certificate (NAC).

- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming an instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

2.3 COURSE STRUCTURE:

Table below depicts the distribution of training hours across various course elements during a period of two-year is as follows:

S No.	Course Element	Notional Training Hours		
3 140.	Course Liement	1 st Year	2 nd Year	
1	Professional Skill (Trade Practical)	1000	1000	
2	Professional Knowledge (Trade Theory)	280	360	
3	Workshop Calculation & Science	80	80	
4	Engineering Drawing	80	80	
5	Employability Skills	160	80	
	Total	1600	1600	

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

- a) The **Continuous Assessment** (Internal) during the period of training will be done by **Formative Assessment Method** by testing for assessment criteria listed against learning outcomes. The training institute have to maintain individual *trainee portfolio* as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in.
- b) The final assessment will be in the form of summative assessment. The All India Trade Test for awarding NTC will be conducted by Controller of examinations, DGT as per the guidelines. The pattern and marking structure is being notified by DGT from time to time. The learning outcome and assessment criteria will be basis for setting question papers for final assessment. The examiner during final examination will also check individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects is 33%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60%-75% to be all	otted during assessment
For performance in this grade, the candidate	Demonstration of good skill in the use of
should produce work which demonstrates	hand tools, machine tools and workshop
attainment of an acceptable standard of	equipment.
craftsmanship with occasional guidance, and	• 60-70% accuracy achieved while

due	regard	for	safety	procedures	and
pract	ices				

- undertaking different work with those demanded by the component/job.
- A fairly good level of neatness and consistency in the finish.
- Occasional support in completing the project/job.

(b) Weightage in the range of 75%-90% to be allotted during assessment

For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with little guidance, and regard for safety procedures and practices

- Good skill levels in the use of hand tools, machine tools and workshop equipment.
- 70-80% accuracy achieved while undertaking different work with those demanded by the component/job.
- A good level of neatness and consistency in the finish.
- Little support in completing the project/job.

(c) Weightage in the range of more than 90% to be allotted during assessment

For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.

- High skill levels in the use of hand tools, machine tools and workshop equipment.
- Above 80% accuracy achieved while undertaking different work with those demanded by the component/job.
- A high level of neatness and consistency in the finish.
- Minimal or no support in completing the project.

Technician Mechatronics; are generalized trade-technician workers. Mechatronics technicians will usually assist design, development and engineering staff, as well as working closely with other trades persons to install, maintain, modify and repair Mechatronics systems, equipment and component parts.

Technician Mechatronics may

- Fit and assemble parts and sub-assemblies made from mechanical and electrical electronic and computer components
- Manufacture, install, modify, repair and fault-find hydraulic and pneumatic equipment and systems
- Inspect machinery and make repairs
- Erect machinery and equipment on site
- Examine detailed drawings or specifications to find out job, material and equipment requirements
- Set up and adjust machines and equipment
- Operate machines to produce parts and components
- Cut, thread, bend and install hydraulic and pneumatic pipes and lines
- Dismantle faulty tools and assemblies and repair or replace defective parts
- Set up and-or operate hand and machine tools and equipment.
- Check accuracy and quality of finished parts, tools or sub-assemblies.

Mechatronics technicians build automated systems for industry. Mechatronics involves mechanics, electronics, and pneumatics and computer technology. The computer technology element covers information technology applications, programmable machine control systems, and technology which enable communication between machines, equipment and people.

In addition Technician Mechatronics have the ability to visualize the job, good coordination, mechanical attitude, manual dexterity and perform work related mathematical calculations.

Plan and organize assigned work and detect and resolve issues during execution. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

- a) 7233.0100 Fitter, General
- b) 7233.0101 General Maintenance Fitter-Mechanical
- c) 7412.0101 Automation Specialist
- d) 7412.0201 Fitter-Electrical and Electronic Assembly
- e) 7411.0100 Electrician, General
- f) 7421.0300 Electronics Mechanic

4. GENERAL INFORMATION

Name of the Trade	TECHNICIAN MECHATRONICS
Trade Code	DGT/2001
NCO - 2015	7233.0100, 7233.0101, 7412.0101, 7412.0201, 7411.0100, 7421.0300
NSQF Level	Level – 5
Duration of Craftsmen Training	Two years (3200 Hours)
Entry Qualification	Passed 10 th class examination with Science and Mathematics or its equivalent.
Minimum Age	14 years as on first day of academic session.
Eligibility for PwD	LD, LC, DW, AA, LV, DEAF
Unit Strength (No. Of Student)	24 (There is no separate provision of supernumerary seats)
Space Norms	192 Sq.m.
Power Norms	8 KW
Instructors Qualification	on for
1. Technician Mechatronics Trade	B.Voc/Degree in Mechatronics / Mechanical/ Instrumentation / Electrical Engineering from AICTE/UGC recognized Engineering College/ university with one-year experience in the relevant field. OR O3 years Diploma in Mechanical/ Electrical/ Instrumentation/
	Mechatronics Engineering from AICTE recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field. OR
	NTC/NAC passed in the Trade of "Technician Mechatronics" With 3 years' experience in the relevant field.
	Essential Qualification: Relevant National Craft Instructor Certificate (NCIC) in any of the variants under DGT.
	NOTE:- Out of two Instructors required for the unit of 2(1+1), one must have Degree/Diploma and other must have NTC/NAC qualifications. However both of them must possess NCIC in any of its variants.

2. Workshop Calculation & Science	B.Voc/Degree in Engineering from AICTE/UGC recognized Engineering College/ university with one-year experience in the relevant field. OR O3 years Diploma in Engineering from AICTE recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field. OR NTC/ NAC in any one of the engineering trades with three years' experience. Essential Qualification: National Craft Instructor Certificate (NCIC) in relevant trade OR NCIC in RoDA or any of its variants under DGT
3. Engineering Drawing	B.Voc/Degree in Engineering from AICTE /UGC recognized Engineering College/ university with one-year experience in the relevant field. OR 03 years Diploma in Engineering from AICTE recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field. OR NTC/ NAC in any one of the Electrical, Electronics & IT Trade group (Gr-II) trades categorized under Engg. Drawing'/ D'man Mechanical / D'man Civil' with three years experience.
4. Employability Skill	Essential Qualification: National Craft Instructor Certificate (NCIC) in relevant trade OR NCIC in RoDA / D'man (Mech /civil) or any of its variants under DGT. MBA/ BBA / Any Graduate/ Diploma in any discipline with Two years' experience with short term ToT Course in Employability Skills from DGT institutes. (Must have studied English/ Communication Skills and Basic
	Computer at 12th / Diploma level and above) OR Existing Social Studies Instructors in ITIs with short term ToT Course in Employability Skills from DGT institutes.
5. Minimum Age for Instructor	21 Years
List of Tools and Equipment	As per Annexure – I

Distrik	Distribution of training on Hourly basis: (Indicative only)					
Year	Total Hrs /week	Trade Practical	Trade Theory	Workshop Cal. & Sc.	Engg. Drawing	Employability Skills
1 st	40 Hours	25 Hours	7 Hours	2 Hours	2 Hours	4 Hours
2 nd	40 Hours	25 Hours	9 Hours	2 Hours	2 Hours	2 Hours

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOMES (TRADE SPECIFIC)

FIRST YEAR:

- Plan and organize the work to make job as per specification applying different types of basic fitting operation and check for dimensional accuracy following safety precautions. [Basic fitting operation – Filing, Marking, Hack sawing, Drilling, Taping, chipping and Grinding etc. Accuracy: ± 0.1mm]
- 2. Perform different fit of components for assembling as per required tolerance observing principle of interchangeability and check for functionality. [Different Fit –Open & Square Fit; Required tolerance: ±0.05 mm]
- 3. Produce components involving different operations on Lathe, Milling and Grinding machines observing standard procedure and check for accuracy. (Different Operations facing, plain turning, step turning, parting, chamfering, shoulder turn, grooving, knurling, threading (external 'V' only), plain milling, step milling, grooving, slot milling, profile milling, surface grinding and cylindrical grinding (internal and external))
- 4. Perform different computer operation and troubleshoot. [Different computer operations: setting of computer & MS Office operation]
- 5. Perform joining of metals by welding and brazing observing standard procedure.
- 6. Construct different electrical sub-systems and measure parameters. [Different electrical sub-systems: AC/DC Motors, DC machine, DC motors, DC motor starter, Universal motor, Induction motor, AC drive, Servo drive, transformer.]
- 7. Construct different electronics sub system and test electronic devices and sub system. [Different sub system: Diodes, rectifier circuit, voltage regulator, transistor power electronic devices, op-amp circuit, LED circuit, SCR etc.]
- 8. Estimate and perform panel wiring using cables, connectors, Protective devices and test functionality.
- 9. Construct and verify different Digital Logic Circuits. [Different DLC:- Logic Gates, half & full adder, binary & outer, P/down counter.]
- 10. Install different software in computer system and test. [Different software: Office, Multimedia, Fluidism, PLC, etc.]
- 11. Write an assembly level programme and interface peripherals to 8051 Microcontroller to check functioning.

- 12. Troubleshoot and repair different Electrical, Electronic systems/ devices. [Different Electrical, Electronic systems/ devices:- Fuse, MCB, Power circuit, Control panel, Circuit Breaker, Stabilizer, AC/DC drives.]
- 13. Demonstrate function of different sensors. [Different sensors: Proximity Sensors, inductive sensor, capacitive sensor, magnetic sensor, Reflex Photoelectric Sensors, Temperature Sensors, etc.]

SECOND YEAR:

- 14. Set (both job and tool) CNC turn centre and milling machine to produce simple components as per drawing.
- 15. Construct simple pneumatic control system to measure various parameters using transducer, sensor and switches. [Various parameter: pressure, flow, level of oil, load displacement]
- 16. Check various components of pneumatics system and construct pneumatic circuit to check functionality.
- 17. Construct an electro-pneumatic circuit and check functionality of a process. [E.g.-process: Automatic braking system.]
- 18. Install an electro-pneumatic system and trouble shoot faults.
- 19. Construct simple hydraulic circuit and check functionality.
- 20. Demonstrate installation of accessories in hydraulic system and troubleshoot defects.
- 21. Construct hydraulic circuit; verify various processes to assess functioning of valves and auxiliaries. [Various processes: speed control, lub system, press control etc.]
- 22. Install hydraulic pump, motors and carryout maintenance of these components.
- 23. Construct different hydraulic system and operate to achieve desired functions. [Different hydraulic system:- Clamp control, injection control, reciprocating screw, oil filtration, hydraulic press control, accumulator control.]
- 24. Programme PLC and interface with other devices to check its Applications.
- 25. Explain robot anatomy and perform programming robot using teach box, software.
- 26. Simulate the electrical circuits on simulation software and detect fault as per diagnostic procedure for Electrical system design.
- 27. Simulate the electronic circuits on simulation software and detect fault as per diagnostic procedure for Electronics system design.
- 28. Simulate the Hydraulic and Pneumatic circuit on simulation software and detect fault as per diagnostic procedure for Hydraulics and Pneumatics system design.
- 29. Perform project work on Mechatronics (*Project-"Pick and Place Mechatronics system"* involving Fitting, Drilling, Turning, Milling, Grinding, Electrical wiring, programming,

Hydraulic circuit assembly, Pneumatic circuit assembly, Drives, system assembly and Interfacing, functional testing, trouble shooting and repair. Safety measures in each stage).

LEARNING OUTCOMES	ASSESSMENT CRITERIA
	FIRST YEAR
1. Plan and organize the work to make job as per specification applying different types of basic fitting operation and Check for dimensional accuracy following safety precautions. [Basic fitting operation — Filing, Marking, Hack sawing, Drilling, Taping, chipping and Grinding etc. Accuracy: ± 0.1mm]	Plan and Identify tools, instruments and equipment for marking and make this available timely. Select raw material and visual inspection for defects. Mark as per specification applying desired mathematical calculation and observing standard procedure. Identify Hand Tools for different fitting operations and make these available timely. Prepare the job for Hacksawing, chiselling, filing. Perform basic fitting operations viz., Hacksawing, filing and Chipping of close tolerance as per specification to make the job. Observe safety procedure during above operations as per standard norms and guidelines. Measure and Check all dimensions of the work pieces as per standard procedure in accordance with specifications and tolerances. Identify unused materials and components for storing in an
	appropriate environment and prepare for disposal.
2. Perform different fit of components for assembling as per required tolerance observing principle of interchangeability and check for functionality. [Different Fit –Open & Square Fit; Required tolerance: ±0.05 mm]	Recognize general concept of Limits, Fits and tolerances necessary for fitting applications and functional application of these parameters. Plan and Identify tools, instruments and equipment for workpiece and make this available timely. Set up workplace/ assembly location with due consideration to operational stipulation. Plan work in compliance with standard safety norms and collecting desired information. Demonstrate possible solutions and agree tasks within the team. Make components according to the specification for different fits using a range of practical skills including scraping and ensuring interchangeability of different parts. Measure the components using Vernier, Micrometer and Height

		gauge.
		Assemble components applying a range of skills to ensure proper fit.
		Check functionality of components.
		Check functionality of components.
3.	Produce components involving different	Ascertain basic working principles and safety aspects of machines.
	9	Understand functional application of different levers, stoppers,
	operations on Lathe,	adjustment etc.
	Milling and Grinding	Identify different lubrication points and lubricants, their usage for
	machines observing	application in machines as per machine manual.
	standard procedure and	Identify different work and tool holding devices and collect
	check for accuracy.	information for functional application of each device.
	(Different Operations –	Mount the work and tool holding devices with required alignment
	facing, plain turning, step	and check for its functional usage to perform machining operations.
	turning, parting,	Solve problem by applying basic methods, tools, materials and
	chamfering, shoulder turn,	information during setting.
	grooving, knurling,	Observe safety procedure during mounting as per standard norms.
	threading (external 'V'	Produce components observing standard procedure.
	only), plain milling, step	Check accuracy/ correctness of job using appropriate
	milling, grooving, slot	equipment/gauge.
	milling, profile milling,	Identify unused materials and components for storing in an
	surface grinding and	appropriate environment and prepare for disposal.
	cylindrical grinding	
	(internal and external))	
4.	Perform different	Collect relevant information to operate and trouble shoot computer.
	computer operation and	Set the computer and carryout basic computer related operation
	trouble shoot. [Different	using MS Office.
	computer operations:	Conduct basic trouble shooting of PC.
	setting of computer & MS	
	Office operation]	
6.	Perform joining of metals	Plan and select the type & size of electrode, welding current, nozzle
	by welding and brazing	size, working pressure type of flame, filler rod and flux as per
	observing standard	requirement as per process requirement.
	procedure.	Prepare edge as per requirement.
		Prepare, set SMAW machine/Gas welding plant and tack the pieces
		as per drawing.

		Set up the tacked pieces in specific position.
		Deposit the weld maintaining appropriate arc length, electrode
		angle, welding speed, weaving technique / Braze the joint adapting
		proper brazing technique and safety aspects.
		Clean the welded joint thoroughly.
		Carry out visual inspection for appropriate weld joint & check by
		gauges.
7	7. Construct different	Plan and identify tools, instruments and equipment for the work and
	electrical sub-systems and	make it available timely.
	measure parameters.	Set up workplace/ assembly location with due consideration to
	[Different electrical sub-	operational stipulation.
	systems: - AC/DC Motors,	Plan work in compliance with standard safety norms and collecting
	DC machine, DC motors,	desired information.
	DC motor starter,	Demonstrate possible solutions and agree tasks within the team.
	Universal motor, Induction	Troubleshoot & test different electrical sub system.
	motor, AC drive, Servo	
	drive, transformer.]	
8.	Construct different	Plan and identify tools, instruments and equipment for the work and
	electronics sub system and	make it available timely.
	test electronic devices and	Set up workplace/ assembly location with due consideration to
	sub system. [Different sub	operational stipulation.
	system: - Diodes, rectifier	Plan work in compliance with standard safety norms and collecting
	circuit, voltage regulator,	desired information.
	transistor power electronic	Demonstrate possible solutions and agree tasks within the team.
	devices, op-amp circuit,	Construct different electronics subsystem test electronics devices
	LED circuit, SCR etc.]	and subsystems.
9.	Estimate and perform panel	Plan and estimate material requirement for panel wiring.
	wiring using cables,	Identify tools equipment for the work and make it available timely.
	connectors, Protective	Set up workplace/ assembly location with due consideration to
	devices and test	operational stipulation.
	functionality.	Plan work in compliance with standard safety norms and collecting
		desired information.
		Perform panel wirings.
		1

10. Construct and verify	Plan and identify tools, instruments and equipment for the work and
different Digital Logic	make it available timely.
Circuits. [Different DLC:-	Construct and verify digital logic circuits.
Logic Gates, half & full	a construction of the cons
adder, binary & outer, P/	
down counter.]	
11. Install different software in	Identify different components/ parts of PC.
computer system and test.	Collect relevant information for installing software.
[Different software: Office,	Check operation of computers.
Multimedia, Fluidism, PLC,	Install software in the computer and check its functioning.
etc.]	
12. Write an assembly level	Write Basic Assembly language Programming.
programme and interface	Interface peripherals to 8051 Microcontroller.
peripherals to 8051	Check the functioning as per programme.
Microcontroller to check	
functioning.	
13. Troubleshoot and repair	Plan and identify tools, instruments and equipment for the work and
different Electrical,	make it available timely.
Electronic systems/	Plan work in compliance with standard safety norms and collecting
devices. [Different	desired information.
Electrical, Electronic	Demonstrate possible solutions and agree tasks within the team.
systems/ devices:- Fuse,	Trouble shoot and repair electrical & electronics system/ devices
MCB, Power circuit, Control	observing safety procedure.
panel, Circuit Breaker,	Check the functionality of the system.
Stabilizer, AC/DC drives.]	
14. Demonstrate function of	Demonstrate the Behaviour of Proximity Sensors and ultra sonic
different sensors.	sensors and logic operation of sensors.
[Different sensors:	Limits and level control using sensors.

Proximity Sensors, inductive sensor, capacitive sensor, magnetic sensor, Reflex Photoelectric Sensors, Temperature Sensors, etc.]	Interfacing of sensors with electrical actuators.
	SECOND YEAR
15. Set (both job and tool) CNC turn centre and	Operation of CNC machine in different Modes [JOG, MPG, MDI, EDIT, AUTO].
milling machine to produce simple	Operation of CNC machine using G codes and M codes, Measure offset –Work and Tool Offset for Turning and Milling.
components as per	Tool Path simulation for Turning and Milling.
drawing	Working on tool handling and work handling:-Methods of mounting Tool and work –use of cutting tool as per material and tool cutter compensation.
	Program Preparation and Practice on Plain, step and taper turning, Face Milling and Step Milling.
	Check for dimensional accuracy of job using appropriate gauges and measuring instruments.
15. Construct simple pneumatic control system to measure various parameters using transducer, sensor and switches. [Various parameter: pressure, flow, level of oil, load displacement]	Plan and identify tools, instruments and equipment for the work and make it available timely. Set up workplace/ assembly location with due consideration to operational stipulation. Plan work in compliance with standard safety norms and collecting desired information. Construct pneumatic control system as per design/ application requirement. Measure various parameters as per the set up. Record data as per standard format/ designed chart.
16. Check various components of pneumatics system and construct pneumatic circuit to check functionality.	Identify various components of pneumatic system and check their functionality. Plan and identify tools, instruments and equipment for the work and make it available timely. Set up workplace/ assembly location with due consideration to operational stipulation.

	Plan work in compliance with standard safety norms and collecting desired information. Construct pneumatic circuits and check their functionality.
17. Construct an electro- pneumatic circuit and	Plan and identify tools, instruments and equipment for the work and make it available timely.
check functionality of a process. [E.gprocess:	Set up workplace/ assembly location with due consideration to operational stipulation.
Automatic braking system.]	Plan work in compliance with standard safety norms and collecting desired information.
	Construct electro-pneumatic circuit as per design/ application requirement.
	Check the functioning of processes as per desired requirement.
18. Install an electro- pneumatic system and	Plan and identify tools, instruments and equipment for the work and make it available timely.
trouble shoot faults.	Set up workplace/ assembly location with due consideration to operational stipulation.
	Plan work in compliance with standard safety norms and collecting desired information.
	Construct and Install electro-pneumatic system as per design/application requirement.
	Check the functioning of system as per desired requirement.
	Troubleshoot the faults during functioning.
19. Construct simple hydraulic circuit and check	Plan and identify tools, instruments and equipment for the work and make it available timely.
functionality.	Set up workplace/ assembly location with due consideration to operational stipulation.
	Plan work in compliance with standard safety norms and collecting desired information.
	Construct simple hydraulic circuit as per design/ application requirement.
	Check the functionality of the circuit.
20. Demonstrate installation	Plan and identify tools, instruments and equipment for the work and
of accessories in hydraulic	make it available timely.

	system and troubleshoot	Set up workplace/ assembly location with due consideration to		
	defects.	operational stipulation.		
		Plan work in compliance with standard safety norms and collecting		
		desired information.		
		Demonstrate the possible solution and agree tasks within the team.		
		Install accessories in hydraulic system as per design/ application		
		requirement.		
		Check the functioning of system as per desired requirement.		
		Troubleshoot the faults during functioning.		
21.	Construct hydraulic	Plan and identify tools, instruments and equipment for the work and		
	circuits; verify various	make it available timely.		
	processes to assess	Set up workplace/ assembly location with due consideration to		
	functioning of valves and	operational stipulation.		
	auxiliaries. [Various	Plan work in compliance with standard safety norms and collecting		
	processes:- speed control,	desired information.		
	flow control, lub system,	Construct hydraulic circuit as per design/ application requirement.		
	press control etc.]	Verify processes to ascertain functioning of valves and auxiliaries.		
22.	Install hydraulic pump,	Plan and identify tools, instruments and equipment for the work and		
	motors and carryout	make it available timely.		
	maintenance of these	Set up workplace/ assembly location with due consideration to		
	components.	operational stipulation.		
		Plan work in compliance with standard safety norms and collecting		
		desired information.		
		Install hydraulic pump & motors as per design/ application		
		requirement.		
		Check the functioning of system as per desired requirement.		
		Carryout maintenance of these components during non-functioning.		
23.	Construct different	Plan and identify tools, instruments and equipment for the work and		
	hydraulic system and	make it available timely.		
	operate to achieve	Set up workplace/ assembly location with due consideration to		
	desired functions.	operational stipulation.		
	[Different hydraulic	Plan work in compliance with standard safety norms and collecting		
	[Different hydraulic system: - Clamp control, injection control,	Plan work in compliance with standard safety norms and collecting desired information.		

	reciprocating screw, oil	Construct hydraulic system as per design/ application requirement.
	filtration, hydraulic press	Operate to verify functioning of hydraulic system.
	control, accumulator	
	control.]	
24.	Programme PLC and	Programme a PLC as per application requirement.
	interface with other	Interface PLC with other devices observing standard procedure and
	devices to check its	safety.
	Applications.	Check the functionality of device as per programme.
25.	Explain robot anatomy	Explain anatomy of robot.
	and perform	Collect relevant information to programme robot via teach box,
	programming robot using	software.
	teach box, software.	Programme robot via teach box, software.
		Test functionality.
26.	Simulate the electrical	Develop electrical circuit as per desired application.
	circuits on simulation	Assemble and test Electrical Circuit on simulation software.
	software and detect fault	Detect fault observing diagnostic procedure and rectify using
	as per diagnostic	simulation software.
	procedure for Electrical	Rectify by resetting errors using simulation software.
	system design.	
27.	Simulate the electronic	Develop electronic circuit as per desired application.
	circuits on simulation	Assemble and test Electronic Circuit on simulation software.
	software and detect fault	Detect fault observing diagnostic procedure and rectify using
	as per diagnostic	simulation software.
	procedure for Electronics	Rectify by resetting errors using simulation software.
	system design.	
28.	•	Develop Hydraulic and Pneumatic circuit as per desired application.
	and Pneumatic circuit on	Assemble and test Hydraulic and Pneumatic circuit on simulation
	simulation software and	software.
	detect fault as per	Detect fault observing diagnostic procedure and rectify using
	diagnostic procedure for	simulation software.
	Hydraulics and	Rectify by resetting errors using simulation software.
	Pneumatics system	

	design.	
29.	Perform project work on	Manufacture and assemble Mechanical sub system.
	Mechatronics (<i>Project</i> -	Prepare Pneumatic circuit and interface.
	"Pick and Place	Prepare Electrical/Electronic circuit and interface.
	Mechatronics system"	Develop and download PLC program.
	involving Fitting, Drilling,	Integrate, Test and Repair for functionality.
	Turning, Milling, Grinding,	
	Electrical wiring,	
	programming, Hydraulic	
	circuit assembly,	
	Pneumatic circuit	
	assembly, Drives, system	
	assembly and Interfacing,	
	functional testing, trouble	
	shooting and repair.	
	Safety measures in each	
	stage)	

SYLLABUS FOR TECHNICIAN MECHATRONICS TRADE			
		FIRST YEAR	
Duration	Reference Learning Outcome	Professional Skills (Trade Practical) With Indicative Hrs	Professional Knowledge (Trade Theory)
Professional Skill 150 Hrs; Professional Knowledge 42 Hrs	Plan and organize the work to make job as per specification applying different types of basic fitting operation and Check for dimensional accuracy following safety precautions. [Basic fitting operation – Filing, Marking, Hack sawing, Drilling, Taping, chipping and Grinding etc. Accuracy: ± 0.1mm]	 Introduction of trade skill and work application. (02 hrs) Safety attitude development of the trainee by educating them to use Personal Protective Equipment (PPE). (05 hrs) First Aid Method and basic training.(02 hrs) Safe disposal of waste materials like cotton waste, metal chips/burrs etc. (02 hrs) Hazard identification and avoidance. (02 hrs) Identification of safety signs for Danger, Warning, caution & personal safety message.(01 hr.) 	All necessary guidance to be provided to the new comers to become familiar with the working of Industrial Training Institute system including stores procedures. Safe working practices Soft Skills, its importance and Job area after completion of training. Importance of safety and general precautions observed in the industry/shop floor. Introduction of First aid. Operation of electrical mains and electrical safety. Introduction of PPEs. Response to emergencies e.g.; power failure, fire, and system failure. Importance of housekeeping & good shop floor practices. Introduction to 5S concept & its application. Occupational Safety & Health: Health, Safety and Environment guidelines, legislations & regulations as applicable.
		while working in fitting jobs. (02 hrs)	(14 hrs)

10. Importance of trade	
training, List of tools &	
Machinery used in the	
trade.(01 hr.)	
11. Safe use of tools and	
equipments used in the	
trade. (01 hr.)	
12. Practice memory training	
and games. (15 hrs)	
13. Workshop on Motivation.	
(by experts). (05 hrs)	
14. 5S training. (03 hrs)	
15. Identification of tools	Bench work – Metal working
&equipments as per desired	hand tools and devices –Work
specifications for filing and	bench – vices – files – hacksaw –
marking, visual inspection	hammer – chisels – spanners –
of raw material for rusting,	screw drivers – scrapers.
scaling, corrosion etc.(03	
hrs)	
16. Familiarization of bench	Linear measurements- its units,
vice. (01 hr)	steel rule dividers, callipers –
17. Filing- File top of the "U"	types and uses, Punch – types
channel, check and measure	and uses.
with steel rule.(10 hrs)	Description, use and care of
18. Mark with scriber and steel	marking table.
rule (01 hr.)	Vernier caliper – its parts,
19. Familiarization of Vernier	principles, reading, uses and
Height Gauge. (08 hrs)	care.(07 hrs)
20. Measuring practice with	
steel rule,Vernier Height	
Gauge.(02 hrs)	
21. File, mark straight and	Outside micrometer – its parts,
parallel lines with scriber	principles, reading, uses and
and steel rule/Vernier	care, vernier height gauge.
Height Gauge as per	Marking tools – scriber,
drawing. (03 hrs)	Dividers, Dot punch, Centre
22. Dot punching and letter and	punch.
number punching. (02 hrs)	Marking out – Coordinates

23. File "U" channel to size andby using straight edge, try-square and vernier calliper measure and check-Accuracy +/-0.1mm. (10 hrs) (Note down all dimensions and submit to instructor for verification) 24. Sawing different types of metals of different sectionsround piece and Angle Iron. (05 hrs)	system, Rectangular – Polar – Rules for marking Bevel protractor, combination set- their components, uses and cares. Pedestal grinder, star wheel dresser, safety precautions, care and maintenance. (07 hrs)
25. Prepare mushroom head on round bar by hammering. (05 hrs)	
26. Make "S" bend by Hammering on flat piece. (06 hrs) 27. Demonstrate grinding of centre punch, dot punch, flat chisel and scriber. (08 hrs) 28. Drill grinding practice. (05 hrs) 29. Drill Centring Practice.(06hrs)	Marking media, marking blue, Prussian blue, chalk and their special application, description. Surface plate and auxiliary marking equipment, 'V' block, angle plates, parallel block, description, types, uses, accuracy, care and maintenance. Bevel protractor, combination set- their components, uses and cares. Drill, Tap, Die-types & application. Determination of tap drill size. Reamer- material, types (Hand and machine reamer), parts and their uses, determining hole size
	for reaming, Reaming procedure.

			Drilling machines-types &their
			application, construction of
			Pillar & Radial drilling machine.
			Countersunk, counter bore and
			spot facing-tools and
			nomenclature.
			Cutting Speed, feed, depth of
			cut and Drilling time
			calculations. (07 hrs)
		30. Demonstrate on measuring	Measuring Instruments –
		instruments.	purpose –Function- types –
		(08 hrs)	Calculation of Least count of :-
		31. Job setting and tool setting	Vernier Caliper, Micro meter,
		on drilling machine. (04 hrs)	height gauge, Vernier bevel
		32. Chain drilling practice. (08	protector and Sine bar.
		hrs)	Drill and Drilling
		33. Die passing practice. (05	
		hrs)	1) Drill- Purpose— Function-
			types and tool Geometry,
			Nomenclature, Control Angle
			and Tool Life.
			2) Reamers -Purpose –types.
			3) Hand Tap and Die- Purpose–
			types.
			4) Drilling Machine -
			Constructional features-working
			principle-Purpose- functions,
			Types - Accessories and uses.
			(07 hrs)
Professional	Perform different fit	34. Make Male & Female	Introduction about metals,
Skill 50 Hrs;	of components for	'Open' fitting with accuracy	difference between Metal and
Professional	assembling as per	±0.05 mm. (23 hrs)	Non Metal, properties of metal,
Knowledge	required tolerance	35. Make Male & Female	Classification of metals and its
14 Hrs	observing principle of	'Square' fitting with	applications, pig – iron, cast
171113	interchangeability	accuracy ±0.05 mm. (22 hrs)	iron, wrought iron, steel-plain
	and check for	36. Perform scraping practice.	carbon steel(Low carbon steel,
	functionality.	(05 hrs)	medium and high carbon steels,
	[Different Fit –Open		high speed steel, stainless steel,

	& Square Fit; Required tolerance: ±0.05 mm]		carbides, etc) Limit and Fits – Limit, Fits -Types and Tolerances and allowances with IS 919 Interpretation of ISO system of limits and fits. (14 hrs)
Professional	Produce components	37. Identify different parts of	Lathe Machine - Constructional
Skill 200 Hrs;	involving different	lathe and demonstrate the	features, Specification -working
Professional Knowledge 56 Hrs	operations on Lathe, Milling and Grinding machines observing standard procedure and check for accuracy. (Different Operations —facing, plain turning, step turning, parting, chamfering, shoulder	operation of the machine. (04 hrs) 38. Job setting and tool setting. (04 hrs) 39. Perform Facing and Centre drilling. (04 hrs) 40. Demonstrate Plain turning between centres and chamfering. (06 hrs) 41. Step turning and Shoulder	principle-Purpose - functions - Types , Lathe machine elements and uses of accessories Lathe mechanism -Function and importance of —Driving mechanism-Gear Box mechanism.(07 hrs)
	turn, grooving,	turning. (07 hrs)	
	knurling, threading (external 'V' only), plain milling, step milling, grooving, slot milling, profile milling, surface grinding and cylindrical grinding (internal and external))	 42. Taper turning (compound rest). (08 hrs) 43. Grind single point cutting tool (Straight, Left and Right)(08 hrs) 44. Plain turning in a chuck and Drilling practice. (09 hrs) 	Lathe cutting tool - Purpose—function-types, tool elements and its applications and Cutting tool, geometry, Nomenclature, Control Angle and Tool Life. Lathe Operations- Facing, plain turning, Step turning, chamfering, tapper Turing and calculations, knurling, boring and step boring, Die passing. Cutting speed, Feed, depth of cut and time calculations. (07 hrs)
		45. Knurling practice. (04 hrs) 46. Making a bolt and nut using external and internal thread cutting on Lathe. (16 hrs)	Pedestal Grinding Machine- Constructional features- working principle-Purpose- function – uses and applications. (07 hrs)

47. Taper measurement using	
Sine bar / Sine centre. (05	
hrs)	
48. Identify different parts of	Milling Machine -
milling machine and	Constructional features-working
demonstrate the operation	principle-Purpose- functions,
of the machine. (04 hrs)	Types and uses of accessories.
49. Milling a parallel block. (08	Milling Operations- methods of
hrs)	milling, Plain milling, Step
50. Step milling. (04 hrs)	milling, end milling, machine
51. Making a T-nut (milling,	time calculation.(07 hrs)
drilling and tapping). (09	
hrs)	
52. Making one "V" block	Milling Cutter- Purpose- types,
consists of plain milling,	Cutting tool Geometry,
groove milling, taper milling	Nomenclature, Tool Life.
and slot milling. (25 hrs)	(07 hrs)
53. Pocket opening milling and	Selection of coolants / cutting
matching (male and female).	fluids for different materials.
(08 hrs)	Cutting speed, Feed, depth of
54. Straddle milling for making	cut and time calculations.
hexagonal head. (08 hrs)	Fasteners: - Types- purpose and
55. Milling profiles and	its Application. (07 hrs)
matching. (09 hrs)	
56. Identify different parts of	Grinding-Surface grinding
Surface Grinding Machine	machine-Constructional
and demonstrate the	features-working principle-
operation of the machine.	•
(05 hrs)	machine elements and uses of
57. Grinding a parallel blocks.(10	accessories, machine calculation
hrs.)	and method of Surface Grinding
58. Step grinding using surface	•
grinding. (10 hrs)	Cylindrical grinding machine-
	Constructional features-working
	principle-Purpose- functions-
	Types, machine elements and
	uses of accessories, machining
	calculations and Method of

			Cylindrical Grinding operations.
		and demonstrate the operation of the machine. (02 hrs)	Grit-Grain size-Structure-Bond- Grades and selection of
		62. Internal cylindrical grinding. (09hrs)	
Professional Skill 50 Hrs; Professional Knowledge 14 Hrs	Perform different computer operations: setting of computer & MS Office operation]	 Basic Computer Operations 63. Draw sketches using paint for practice on mouse/touch pad. (02 hrs) 64. Create, save, rename, move, copy and delete files and folders. Transfer files and folders from/to external storage devices, Create zip file, Extract the zip file, Create automatic backup, Hide/unhide files/folders, Create password for individual files. Change the display properties for Back ground, Resolution, Screen saver, Desktop icons, Gadgets. (04hrs) 65. Settings of the control panel for Add/remove hardware, Install/uninstall software, Change properties of 	Basic blocks of a computer, Components of desktop and motherboard. Hardware and software, I/O devices, and their working. Different types of printers, HDD, DVD. Various ports in the computer. Windows OS MS widows: Starting windows and its operation, file management using explorer, Display & sound properties, screen savers, font management, installation of program, setting and using of control panel, application of accessories, various IT tools and applications. Concept of word processing,: MS word — Menu bar, standard tool bar, editing, formatting, printing of

Connecting Projector. (08 hrs)

MS-Office

- 65. Work on different menus and editing options of MS-Word. (06 hrs)
- 66. Create your resume in MS-Word. (03 hrs)
- 67. Create purchase order using tables and images. (03 hrs)
- 68. Create an invitation letter using mail merge for 'n' invitees. (03 hrs)
- 69. Work on different menus and formulae options of Excel. (06 hrs)
- Create mark sheet and chart using spread sheet with data validation. (03 hrs)

Basic Trouble Shooting PC

- 71. Check PC Power Supply, SMPS cables and connections to the mother board, connection of I/O devices to PC, HDD/DVD cables. (02 hrs)
- 72. Remove and reinsert CMOS battery,RAM, Connect SATA/IDE Cables to Hard Disk Drive, peripherals (Keyboard, Mouse, USB drive, printer), SVGA/HDMI Cable to the system,

Word Processing Software

- Introduction to the various applications in MS office.
- Introduction to Word features, Office button, toolbars.
- Creating, saving and formatting and printing documents using Word.
- Working with objects, macro, mail merge, templates and other tools in Word.

Excel – Worksheet basics, data entry and formulae. Moving data in worksheet using tool bars and menu bars, Formatting and calculations, printing worksheet, creating multiple work sheets, creating charts. (14 hrs)

		Multimedia devices to AV	
		port, Crimp CAT 6 cable to	
		RJ 45 connector. (10 hrs)	
Professional	Perform joining of	, ,	Explanation of gas welding, arc
Skill 50Hrs;	metals by welding	gas welding / arc welding /	welding and MIG welding
J 33	and brazing	MIG welding equipment and	techniques description of
Professional	observing standard	demonstrate their	welding equipments and
Knowledge	procedure.	functioning. (05 hrs)	welding joints.
14Hrs	procedure.	67. Simple welding and brazing	
		practice. (20hrs)	material.
		68. Work on tray brazing, die	
		welding, welding on	(14 hrs)
		hardened die block. (25hrs)	(113)
Professional	Construct different	, ,	Basic Electrical Engineering
Skill 100 Hrs;	electrical sub-	person from live wires. (03	Concept of current, voltage,
38111 200 1113,	systems and measure	hrs)	resistance, electric charge,
Professional	parameters.	70. Perform exercise to find out	, , ,
Knowledge	[Different electrical	relationship between V, I, R	,
28 Hrs	sub-systems: - AC/DC	•	<u> </u>
	Motors, DC machine,	,	secondary cells. Measurement
	DC motors, DC motor	circuit. (03 hrs)	of voltage and current in Net
	starter, Universal	71. Check/Test the line, neutral	_
	motor, Induction	and earth wires before	and Square wave forms.
	motor, AC drive,	connecting cable in to plugs.	·
	Servo drive,	(02 hrs)	Electromagnetic theory: - Flux,
	transformer.]	72. Demonstrate the given	Flux density, magnetic effect,
	_	Electrical circuit/board	magnetic field, electromagnetic
		familiarization with	force, concepts of coil
		different types of plugs,	(electromagnetic). Solenoids
		sockets, switches, fuses and	and relays.
		fuse holder. (03 hrs)	Instrument used for Measuring
		73. Construct different DC	electrical parameters:-
		sources by serial and	Measurements of electrical
		parallel connection of	quantities using voltmeter ,
		batteries. (03 hrs)	Ammeter, Multimeter, Megger.
		74. Ascertain different electrical	Power supply units and
		instruments as per the	Stabilizers.
		drawings. (02 hrs)	

75.	Measure th	e volta	age and
	current in	AC/DC	Circuits
	using ammeter, voltmeter		ltmeter,
and multi meter. (03 hrs			3 hrs)

- 76. Measure power factor in poly-phase circuit using ammeter, voltmeter and wattmeter readings. (03 hrs)
- 77. Construct series and parallel combination circuits and verify them. (03 hrs)
- 78. Construct a simple circuit to test the operation of a Relay. (03 hrs)
- 79. Measure input and output voltages in stabilizers, power supply unit in the control panel. (03 hrs)
- 80. Application of test lamp and multi meter for identifying single and three phase supply. (03 hrs)
- 81. Physical identification of Mechanical parts and winding details of AC/DC Motors. (03 hrs)
- 82. Develop work plan to test DC Machine winding continuity and insulation resistance. (04 hrs)
- 83. Construct and perform forward and Reverse operation of DC Motors. (06 hrs)
- 84. Construct and perform speed control of DC Motors.(03 hrs)

Electromagnetic induction,
Motor and Generator effect.
Types of AC and DC Motors,
Construction and its working
principles, Speed control of
AC/DC Motors. Principle and
Operation of servo motor,
Stepper motor and its
applications.

Concepts of AC/DC Drives.

Principle and operation of single phase, Three phase transformer and Auto transformer. Winding details of three phase transformer. Tacho Generator.

Instrument transformers (CT and PT), clamp meter, Phase sequence meter, Power factor meter.

Concepts of open loop and closed loop systems, feedback devices used in Mechatronics, Principle and Operation of tacho-generator, Encoder, and linear scale. (28 hrs)

85. Connect, start, run and
reverse of AC, single phase
motor (inductive-start and
capacitive-start). (05 hrs)
86. Control the speed of AC
motor. (03 hrs)
87. Connect, Start, Run and
reverse universal motor. (03
hrs)
88. Selections of accessories of
a DOL starter, assemble,
and run induction motor.
(04 hrs)
89. Start, Run and reverse AC 3-
phase motor using star-
delta starter. (03 hrs)
90. Check the Motor speed and
its line current using Tacho
Generator and Clamp on
meter. (03 hrs)
91. Configure AC drive for
controlling induction motor.
(03 hrs)
92. Configure DC drive for
controlling DC motor. (03
hrs)
93. Construct a simple circuit to
test positional and velocity
control using Servo Drive.
(04 hrs)
94. Exercise on positional
accuracy using encoder. (03
hrs)
95. Exercise on positional
accuracy using linear scale.
(04 hrs)
96. Verify the terminals of 3-
phase transformer HT and

		LT side. (03 hrs) 97. Measure Voltage and current of 1-Φ, 3-Φ Auto transformer. (03 hrs)	
		98. Measure phase sequence and power factor using	
		phase sequence meter, power factor meter. (03 hrs)	
		99. Measure the current of a	
		given load using Tong-	
		Tester. (03 hrs)	
Professional	Construct different	100. Test the Electronic	Electronic components: Basic
Skill 100Hrs;	electronics sub	components using	Electronic components (active
Professional	system and test	component tester and	and passive) and its symbols.
Knowledge	electronic devices	Multi meter, CRO and Test	Reading of electronic circuit
28Hrs	and sub system.	ICs using IC Tester. (04 hrs)	drawing. Types of Resistors,
201113	[Different sub	101. Measure AC/DC	capacitors and its identification.
	system: - Diodes,	parameters using CRO. (03	Working and operation of
	rectifier circuit,	hrs)	Diodes. Rectifier circuits. Zener
	voltage regulator,	102. Construct Diode circuit and	voltage Regulator.
	transistor power electronic devices,	draw V-I characteristics. (03 hrs)	Transistors and its applications.
	op-amp circuit, LED circuit, SCR etc.]	103. Construct and test Half- wave, Full-wave and Bridge	CRO-Block diagram and its
	circuit, SCN etc.j	rectifier. (07 hrs)	functions.
		104. Construct Transistor	DC Regulated power supplies.
		Switch. (03 hrs)	Introduction to Op-Amp,
		105. Construct Transistor Amplifier circuit. (04 hrs)	characteristics, Configuration
		106. Construct Zener regulator.	and its applications.
		(03 hrs)	Introduction to Opto-
		107. Construct transistor	electronics, LED, LDR, Photo
		voltage regulator circuit.	diode, opto-coupler.
		(04 hrs)	
		108. Construct a 12/5 V DC	
		power supply circuit. (04	
		hrs)	
		109. Construct variable DC	

		Regulated power supply.	
		(07 hrs)	
		110. Construct and verify basic	Study of Power Electronic
		op-amp circuits (Inverting,	Devices:
		Non-inverting). (05 hrs)	Power diodes, power
		111. Construct comparator and	transistors, SCR, DIAC, TRIAC,
		Instrumentation Amplifier	UJT IGBT, phase control
		using Op-Amp. (07 hrs)	rectifiers, Converters.
		112. Construct and Verify Photo	rectificis, converters.
		LED circuit.(04 hrs)	Soldering Techniques:
		113. Construct and verify the	Describe Soldering and De-
		operation of LDR and	soldering process, Do and
		Photo diode. (04 hrs)	Don'ts of soldering. Concepts of
		114. Construct isolation circuit	SMD. (28 hrs)
		using opto-isolator. (05	
		hrs)	
		115. Testing of SCR, DIAC,	
		TRIAC, IGBT and UJT using	
		Multimeter and	
		component tester. (06 hrs)	
		116. Construct a phase control	
		·	
		rectifier circuits using SCRs.	
		(08 hrs)	
		117. Construct and test UJT	
		Relaxation oscillator. (03	
		hrs)	
		118. Construct and test	
		universal motor speed	
		control by using SCR. (04	
		hrs)	
		119. Practice Soldering and De-	
		soldering on the PCBs for a	
		given circuit(s). (12 hrs)	
Professional	Estimate and	120. Perform Termination of	Electrical cables and
Skill 75 Hrs;	perform panel wiring	wires, cables and	connectors:
Professional	using cables,	electronic components. (04	Colour code of cables cable
Knowledge	connectors,	hrs)	Colour code of cables, cable joints (straight joints and T-
Kilowieuge	Protective devices	121. Perform Skinning, dressing,	Joints (straight Joints and 1-

21 Hrs	and te	st	and joining for different types of cables.(06 hrs)	Joints), wiring layout diagrams, Types of cables and its
		122	. Perform Crimping practice on RJ45, BNC, Audio, D-	·
		422	shell and Edge connectors. (07 hrs)	Types of connectors and its specifications:
		123	. Measure Insulation Resistance by using Megger. (03 hrs)	connectors, Flat cables, RJ45 Connector, BNC, TNC, Audio
		124	Perform wiring in PVC conduit for power sockets	Video, D-Shell and Edge connector. Cable termination
			controlled independently. (04 hrs)	methods, cable layout diagrams, electrical control panel wiring and electrical bus systems.
		125	. Perform wiring to control one lamp from different places. (04 hrs)	Purpose of using protective devices, Fuses, Contactor
		126	Perform wiring to install buzzer, buttons, and	,Relays, Timers, Circuit Breakers, MCBs, ELCBs, DOL ,Star – Delta
		127	protection alarm. (04 hrs) Prepare panel mains board with switch and	Starters, Push buttons, Limit switches, Micro switches, Float
			distribution fuse box. (04 hrs)	switches, Solenoids, Float switch, OLRs, Photo electric relay,
		128	Estimate the materials for a given panel board connection plan. (04 hrs)	Importance of earthing, Types of earthing techniques.
		129	Perform Wiring of power and control circuits in the panel board. (12 hrs)	Importance on electrical safety, safety marking and symbols, Risk management, Electric
		130	. Measure earth resistance using earth tester. (03 hrs)	hazards, Prevention of accidents and Personal safety aspects.
		131	. Test the switches, pushbuttons, limit switches, Foot pedal switch, Micro switches for	Environment safety and safety precautions while handling electrical equipments. Classification of fires, Different
		132	its operation (08 hrs) Practice on working of protective elements such	type of firefighting equipment. (21 hrs)

Professional Skill 50 Hrs; Professional Knowledge 14 Hrs	Construct and verify different Digital Logic Circuits.	as MCB, OLR, ELCBs and fuses in power circuits. (08 hrs) 133. Ascertain different safety symbols and signs used in workshop. (04 hrs) 134. Verify the truth table of AND, OR, NOT, NAND, NOR, XOR gates. (06 hrs) 135. Construct and verify SR, JK, T and D Flip-Flops. (12 hrs) 136. Construct and verify Binary counter, UP/DOWN counter circuits. (08 hrs)	Number System: Binary, Decimal, Octal, Hexa Decimal Number systems and its Conversions. Binary Arithmetic and logical operations.
		137. Construct and verify encoder and decoder circuits. (08 hrs) 138. Construct Multiplexer and De multiplexer circuits. (04 hrs) 139. Construct on Analog to Digital Converter (R-2R). (04 hrs) 140. Digital to Analog converter (Comparator, Dual slope, Successive approximation.) (08 hrs)	Digital Logic: Boolean algebra. Logic gates: AND, OR, NOT, NAND, NOR, XOR. Encoder and Decoders. Concepts of Flip-Flop: SR, JK,T, D. Counters, Multiplexers and De-Multiplexers. Memories: Discs, RAM, ROM, Semiconductor memories. (14 hrs)
Professional Skill 25 Hrs; Professional Knowledge 07 Hrs	Install different software in computer system and test. [Different software: Office, Multimedia, Fluidism, PLC, etc.]	Software Installation 141. Prepare Hard disk for OS installation by making partitions. (02 hrs) 142. Setup CMOS with desired parameters for hard disk and set date and time. (01 hr) 143. Install Operating System Windows and Linux in two	Distinguish between System Software and Application Software. Differentiate between Linux and Windows OS Windows 32 bit, and 64 bit System FDISK, Format, Scandisk, FAT System, NTFS and Directories, Fragmentation and defragmentation disk

		different partitions. (08 hrs) 144. Install Device Drivers(Printers, Scanners, Xerox, audio), Install/Uninstall Application software (Office, Multimedia, Fluidsim, PLC and other simulation software) (06 hrs) 145. Perform IT-supported fault diagnostics on systems and sub-systems within automation systems, identify, assign and check functions and components. (08 hrs)	equivalent tools for creating documents, spread sheet and presentation Explain and apply common prevention methods, Explain Service Flow Sequence (SFS) and Trouble Shooting Chart (TSC) of PC. Concept and need of Digitalization Concept of Industry 4.0 Introduction, working and Applications of RFID (Identification,
Professional Skill 50 Hrs; Professional Knowledge 14 Hrs	Write an assembly level programme and interface peripherals to 8051 Microcontroller to check functioning.	146. Physically identify the components in 8051 trainer kit. (05 hrs) 147. Write an program to perform arithmetic operations. (05 hrs) 148. Write a program to perform exchange the memory location contents. (05 hrs) 149. Interface LEDs to microcontroller and develop different patterns on it. (05 hrs) 150. Interface switches and LEDs with microcontroller. (05 hrs)	Basic block diagram of computer system. Block diagram of Microprocessor and its functionality. Difference

		151. Interface buzzer to	
		microcontroller. (10 hrs)	
		152. Interface DC motor with	
		microcontroller. (10 hrs)	
		153. Interface stepper motor

	Safety measures in		(10hrs)	
	each stage)	277.	Perform Milling operation.	
			(10hrs)	
		278.	Perform surface finish	
			operation. (07hrs)	
		279.	Assemble the Mechanical	
			components as per	
			drawing. (10Hrs)	
		280.	Assemble Hydraulic and	
			Pneumatic circuit and	
			interface. (13 hrs)	
		281.	Assembling and wiring of	
			Electrical and Electronic	
			system integration. (10hrs)	
		282	Develop, download PLC	
			program and Integrate.	
			(15hrs)	
		283	Testing, Trouble shooting	
		200.	and Repairing. (15hrs)	
			and hebaning. (131113)	

Industrial Training / Project work

SYLLABUS FOR CORE SKILLS

- 1. Workshop Calculation & Science (Common for two-year course) (80 Hrs + 80 Hrs)
- 2. Engineering Drawing (Common for Group-II (Electrical, Electronics & IT Trade Group)) (80Hrs + 80 Hrs)
- 3. Employability Skills (Common for all CTS trades) (160 Hrs + 80 Hrs)

Learning outcomes, assessment criteria, syllabus and Tool List of Core Skills subjects which is common for a group of trades, provided separately in www.bharatskills.gov.in

LIST OF TOOLS AND EQUIPMENT **TECHNICIAN MECHATRONICS (For batch of 24 Candidates)** SI. No Name of the Tool & Equipments **Specification** Quantity A. TRAINEES TOOL KIT 150 mm English and Metric 24+1 Nos. Steel Rule 1 combined Engineer's Square 150 mm with knife edge 24+1 Nos. Bevel Straight Edge 80 X 100 mm 24+1 Nos. 3 100 mm 24+1 Nos. Centre punch 4 24+1 Nos. Dot punch 100 mm 5 24+1 Nos. File flat bastard 300 mm 6 24+1 Nos. File flat 2nd cut 7 250 mm 24+1 Nos. File flat safe edge 200 mm 8 24+1 Nos. File triangular rough 200 mm 9 24+1 Nos. Hammer ½ lb ball peen 10 24+1 Nos. Scriber 6 inch 11 24+1 Nos. Vernier Caliper 150mm with 0.02 mm least count 12 24+1 Nos. Micrometer (outside) 0-25 mm 13 Safety goggles (Personal Protective 24+1 Nos. 14 Equipment) 24+1 Nos. Screw driver electrician 150 mm 15 24+1 Nos. Screw driver Nos. 860,862 16 24+1 Nos. 150mm Long nose plier 17 24+1 Nos. Combination plier 150mm 18 24+1 Nos. Diagonal cutter 150mm 19

20	Screw driver Philips	Nos. 860,862	24+1 Nos.
21	Tweezers		24+1 Nos.
22	Knife	100mm	24+1 Nos.
23	Wire Stripper		24+1 Nos.
24	Neon Tester		24+1 Nos.
25	Scissors	150mm	24+1 Nos.
26	Soldering iron	25watts	24+1 Nos.
27	Bread Board		24+1 Nos.
B: TOOLS	S AND EQUIPMENTS:		
1	Caliper outside	150mm	4 nos.
2	V-block	50 mm X 100mm and 75 mm X 100 mm each	2 Nos
3	Divider – 150 mm		4 Nos.
4	Screw driver	150 mm and 200mm each	4 Nos.
5	Circlip plier (inside and outside) each		4 Nos.
6	Centre gauge	55 ⁰ and 60 ⁰	4 Nos.
7	Oil can		4 Nos.
8	Oil Gun and Grease Gun each		4 Nos.
9	File flat smooth	200 mm	4 Nos.
10	File flat smooth	safe edge 200 mm	4 Nos.
11	File half round bastard	300 mm	4 Nos.
12	File half round smooth	250 mm	4 Nos.
13	File triangular smooth	200 mm	4 Nos.
14	File round bastard	250 mm	4 Nos.
15	File square smooth	250 mm	4 Nos.
16	Knife edge file	150 mm	4 Nos.
17	Needle file assorted (12 nos.)	150 mm	4 Nos.
18	File card (spattle)		4 Nos.
19	Scraper flat	250 mm	4 Nos.
20	Hammer Ball Peen	0.5 kg with handle	4 Nos.
21	Hammer Cross Peen	0.75 kg with handle	4 Nos.
22	Chisel cold flat	18 x 150 mm	4 Nos.
23	Chisel Cross Cut	10 x 3 x 200 mm	4 Nos.
24	Chisel Half Round	10 x 250 mm	4 Nos.
25	Chisel diamond point	10 x 200 mm	4 Nos.

26	Scribing block	300 mm	4 Nos.
27	Cast Iron Surface plate	300 x 300 mm	1 No.
28	Granite Surface plate	450 X 450 X 80 mm minimum	1 No.
29	Tap extractor	3 mm to 12 mm x 1.5 mm (ezzy out)	3 set
30	Screw extractor	sizes 1 to 8	3 set
31	Hand Taps and dies	Stock metric 5 mm to 12 mm complete set in a box	2 sets
32	Bench Vice	100 mm jaw	24+1 Nos
33	Machine reamer	set up to 12 mm	2 sets
34	Machine tap set	upto M12mm (with std. pitch)	2 sets
35	Twist Drill	straight Shank Ø 5 to Ø12 mm in steps of 0.5 mm	2 sets
36	Twist Drill	straight Shank Ø 8 mm to Ø 12 mm in steps of 2 mm	2 sets
37	Taper shank drills	Ø 6 mm to Ø 20 mm in steps of 1 mm	2 sets
38	D.E spanners	3-4, 6-8, 10-12, 13-14, 15-16, 18-19, 20-22, 24-26 (8-spanners)	2 sets
39	Letter punch	5 mm set	2 sets
40	Number punch	5 mm set	2 sets
41	Parallel block Standard sets		2 sets
42	Allen key metric	3 to 12 mm set	4 sets
43	Centre drills	3, 4,5 mm	4 each
44	Parallel hand reamer	6 mm to 12 mm in steps of 1 mm with handle	4 sets.
45	Star dresser		1 No.
46	Diamond dresser with holder		2 Nos
47	Surface gauge		2 Nos.
48	Angle plate-adjustable	250x250x300 mm	2 Nos.
49	Micrometer –inside – outside	depth range up to 75mm each	3 sets
50	Vernier caliper with 0.02mm least count	150mm and 200 mm each	4 Nos.
51	Digital Vernier caliper	150mm and 200mm each	1 No each
52	Digital micrometer (inside, outside and depth)		1 No
53	Height Gauge	300mm with 0.02 mm least count	1 no.
54	Vernier bevel protractor	150 mm blade	1 no.
55	Sine bar and Sine Centre each		1 No each
56	Sprit level		1 No.
57	Slip gauge set (STD)		1 Set
58	Magnetic stand	magnetic base 60 x 47.5 mm and	2 Nos

		with universal swivel clamp, dial	
		holding rod (150 mm) scriber	
_	Dial test indicator	Lever type- Range 0-0.8 mm –	
59		Graduation 0.01mm, reading 0-50-0	2Nos
		with accessories	
	Dial test indicator	Plunger type-Range 0-10 mm ,	2.1
60		Graduation 0.01 mm, Reading 0-100	2 Nos.
		with revolution counter	
C1	Bore gauge	dial indicator (1 mm range, 0-0.01	1
61		mm graduation)-Range of bore	1 set
62	Straight adga Single housled	gauge 18-70 mm	1 No
62	Straight edge-Single beveled	Size 150 mm and 250 mm each	1 No
63	Tool maker's clamp	50 mm and 75 mm each	4 Nos.
64	C – clamp-		4 Nos.
65	Bearing Puller	10 mm to 100 mm	2 Nos.
66	Ammeter	0 - 500mA	3Nos.
67	Ammeter	0 – 1 Amp DC	3Nos.
68	Voltmeter	0 – 300/600V AC	4Nos.
69	PF Meter		2 Nos.
70	Phase Sequence Meter	25.	2 Nos.
71	Digital multi Meter	2.5 Amps / 5Amps	3 Nos.
72	Energy meter, Single / Three phase	2 50 4	2 Nos.
73	Clamp on meter	0 – 50 Amps	2 Nos.
74	Ammeter portable type	0 – 15 Amps AC	4 Nos.
75	Test lamp		3 Nos.
76	Tong-Tester		3 Nos.
77	Line Tester		5 Nos.
78	Batter Tester		4 Nos.
79	Electrician Tool Kit		3 Nos.
80	Rechargeable Battery		5 Nos.
	Pressure Transducers panel board to		
81	demonstrate pressure gauge, Load cell,		5 Nos.
	Bourdon tube, Capacitive transducers.		
	Flow Transducers panel board to		
82	demonstrate Flow nozzle, Vane		5 Nos.
	Anemometer, Rota meter.		
	Temperature Transducers panel board		
83	to demonstrate Bimetallic strip, RTD,		5 Nos.
	Thermocouple, Thermistor.		
	Level Transducers panel board to		_
84	demonstrate capacitive and float		5 Nos.
	switch.		

85	Insulated Screw Diver	200 mm	5 Nos.
86	Insulated combination cutting plier	200 mm	5 Nos.
87	Small Screw Driver		5 Nos.
C. TOOLS	& EQUIPMENT OF ELECTRICAL & SEN	NSORS	
i) Electric	cal		
88	Digital Multimeter	0 – 400 Volt	2 nos.
89	Variable Resistance Box, Resistors	With 220Ω, 150Ω, 1kΩ, 33Ω, 100Ω, 1.2Ω	1 each
90	9V DC Battery With Cap		1 no.
91	Dual Power Supply	(230V, 50Hz, Fuse-800mA)	1 no.
92	Solder Iron, Solder Lead, PCB Board (Groove Board), Solder Wick		1 set
93	Inductor	(400 Turns, 200 Turns, 600 Turns, 1200 Turns), I-Core, E-Core, U-Core, Laminated Core	1 each
94	Relay, LED	(5V)	1 no.
95	Function Generator	(230V, 50Hz, Watts-12VA, Fuse-150mA)	1 no.
96	Bread Board		1 no.
97	Synchronous Motor, Capacitor For Synchronous Motor	(240V, 60rpm), (0.8mf ± 5% 450 VAC)	2 nos.
98	Power Chord, Connecting Probes, Single Strand & Multi strand Wires		1 each
ii) Senso	rs		
99	Power Supply	(0-30V DC, 3A)	1 no.
100	Sensor Kit		
	i. Mounting Plate		
	ii. Power Distribution Box	(24V DC, 4A)	
	iii. Counter Box	(10-30V DC/0.05A)	1 set
	iv. Indication Box	(24V Dc)	
	v. Material Box		
	vi. Inductive Sensor	(10-30 V DC, PNP, NO, 5mm (Range))	

	vii Canacitiva Sancer	(10-30 V Dc, PNP, NO, 2-8mm(Range))	
	vii. Capacitive Sensor		
	viii. Magnetic Sensor	(10-60 V DC , PNP, NO, 60mm (Range))	
	ix. Ultrasonic Sensor	(20-30 V DC, PNP, NO, 80- 300mm(Range))	
	x. Connecting Wires		
	xi. Motor With Control Unit	(24V DC,1A)	
D. MECH	ATRONICS LAB OUTFIT		
1	Discrete component tester Trainer kit		2 nos.
2	Analog circuit trainer kit		3 nos.
3	Soldering and de soldering Station		5 nos.
2	Power Electronic Trainer	(with all components for performing control rectifiers, Converter, Inverter experiments)	2 nos.
3	AC Squirrel cage Induction Motor	DOL Starter and star –Delta starter assembly	1 no.
4	DC motor Trainer board.		1 no.
5	Auto transformer	0 – 300 v, 8 Amp	2 nos.
6	C.R.O , 50 M Hz		2 nos.
7	Digital and Analog IC Tester		1 each
8	Digital Tachometer		2 nos.
9	Signal Generator		2 nos.
10	DC Power supply unit	0 - 30 v , 2 Amps	4 nos.
11	Digital Earth Tester		1 No.
12	Firefighting equipment		As required
13	Linear IC Trainer Kit		1 No.
14	AC / DC Motor speed control trainer kit		1 No. each
15	Optical Transducer Trainer kit.		2 Nos.
16	Simple Servomotor trainer kit.		2 Nos.

17	Simple stepper motor trainer kit.		2 Nos.
18	Linear scale setup for positional accuracy check		1 No.
19	A/D and D/A Trainer kit		1 No
20	UPS		As required
21	Stabilizer Trainer kit		1 No
22	AC Drive		4 Nos.
23	DC Drive		1 No.
24	Digital circuits trainer Kit.		2 Nos.
25	8051 Microcontroller trainer board with LED, Switches, Buzzer, DC motor and Stepper motor interfacing circuits.		3 Nos.
26	PLC with IO simulation panel and programming software with PLC application module		1No
27	Ethernet to Profibus converter		2 Nos.
28	НМІ		2 Nos.
29	Personal Computers	CPU: 32/64 Bit i3/i5/i7 or latest processor, Speed: 3 GHz or Higher. RAM:-4 GB DDR-III or Higher, Wi-Fi Enabled. Network Card: Integrated Gigabit Ethernet, with USB Mouse, USB Keyboard and Monitor (Min. 17 Inch.) Licensed Operating System and Antivirus compatible with trade related software.	12 Nos.
30	Operating system (Windows latest version)		12 Users
31	Portable Hard Disk.(1 TB)		1No
32	MS-Office		10 Users.
33	RJ45,BNC,D-Shell, Edge Connector Crimping Tool		2 Nos. each
34	Megger		2 Nos.
35	Encoder Trainer Kit		1 No.

36	Panel Wiring Work bench		3 Nos.
37	Protection Devices Trainer Board.		1 Nos.
38	Limit switch, Pressure switch, Micro switch, Float switch, Foot switch		2 each
39 *	Application trainer kit of proximity sensor, float switch, and reed switch.		1 No
40	LVDT Trainer kit.		2 Nos.
41	Actuators Application Trainer(Servo, stepper motor, and Solenoid)		1 No
42	Simple Servomotor trainer kit.		1 No.
43	Simple stepper motor trainer kit.		1 No.
44	Piezoelectric transducer/actuator trainer kit.		1 No.
45 *	Pneumatic control trainer kit with required pneumatic components.		3 Nos.
46 *	Hydraulic control trainer kit with required hydraulic components.		1No
47 *	Electro-Pneumatic control trainer kit using PLC with required components.	Two of these kits should be fitted with PLCs with facility to isolate PLC as and when required to utilize the kit as Electro-Pneumatic Kit.	4 Nos.
48 *	Electro-Hydraulic control trainer kit using PLC with required components.	One of these kits should be fitted with PLCs with facility to isolate PLC as and when required to utilize the kit as Electro-Pneumatic Kit.	2 Nos.
49 *	Linear scale setup for positional accuracy check		2 Nos.
50 *	PLC Based Conveyor System with Pick and Place and Sorting of Objects (Pneumatic and Hydraulic))		2 Nos.
51 *	Cut section Models of Pneumatic and Hydraulic Motors ,Pumps		Each 1 no.
52 *	Electrical simulator software		12 users license
53 *	Electronic simulator software		12 users license

Γ <i>1</i> *	Hydraulics and Pneumatics	12 users
54 *	simulator software	license

Note: The items marked (*) need to be procured considering optimal utilization of resources. The different components with each trainer kits which are common in all NEED NOT TO BE procured separately for each kit. The common components may be utilized while performing the practical in different trainer kit. However, minimum 03 sets of common items must be there for effective training. The PLC may be of popular make such as Allen Bradley SLC 500 and SIEMENS PLC, etc.

E. GEN	ERAL SHOP OUTFIT		
57.	Sensitive drilling machine	Capacity 12 mm Motorized –with drill chuck and key with Standard and optional accessories.	1No.
58.	Pillar/column type Drilling machine	25 mm capacity-motorized with drill chuck and Key with Standard and optional accessories.	1No.
59.	Power hacksaw machine	21" or more length blade with Standard and optional accessories.	1 No.
60.	Double ended Pedestal Grinder	178 mm wheels(one fine and one rough wheel)	1 No.
61.	SS and SC centre lathe (all geared) with minimum specification as:	Centre height 150 mm and centre distance 1000 mm along with 3 and 4 jaw chucks, Auto feed system, safety guard, taper turning attachment, motorized coolant system, lighting arrangement with standard accessories and optional accessories with set of cutting tools	1 No.
62.	Shearing machine (lever type) hand operated complete	300 mm blade length.	1 No.
63.	Universal Milling Machine	Standard and optional accessories and set of cutters.	2 Nos.
64.	Horizontal and Vertical milling machine	Standard and optional accessories and set of cutters each.	1 Set
65.	Hydraulic Surface Grinding Machine	standard and optional accessories and set of wheels	1 No.
66.	Universal cylindrical grinding machine	Standard and optional accessories and set of wheels.	1 No.
67.	CNC turn Centre	[specification as per Annex-A (I)]	1 No.

68.	CNC Vertical Machining Centre	[specification as per Annex-A (II)]	1 No.
69.	Drafting /AutoCAD software	Latest version	12 license
70.	Mechanical parametric Design /Creo (proE) software	The above three items can be shared if any of the other trade equipment list includes them and need not be procured separately subject to the condition to share amongst maximum of three trades and nine units.	12 license
71.	Simulation software Multimedia based simulator for CNC technology and interactive CNC part programming software for turning &milling with virtual machine operation and simulation using popular operation control system such as Fanuc, Siemens, etc. (Webbased or licensed based) With help of this software the trainees should be able to Write, Edit, Verify & Simulate		12 license (can be used by other trades)

NOTE: -

- 1. No additional items are required to be provided to the batch working in the second and third shift except the items under trainee's toolkit.
- 2. Institute having centralized computer lab may use the existing infrastructure to impart simulation training & in that case not required to procure **item No. 29** under Mechatronics Lab Outfit.
- 3. For units less than 4 (2+2), ITI can enter into MoU with Facilitator who will provide the Training to Trainees admitted and undergoing training in above Trades. The Facilitator should be Government ITI, Engineering/ Polytechnic College, Recognized Training Institute, Industry, Private ITI (Facilitators are arranged in descending preference order). The Facilitator should have the entire above training infrastructure. If any of the facility is not available with facilitator then the same should be provided in the ITI. The facilities of CNC should be made available to ITI trainees at the time of examination. This clause should be part of MoU to be signed. The training provider must be within the range of 15 Km or within city whichever is less.
- 4. Internet facility is desired to be provided in the class room.

Detail	led specification for CNC Lathe		
1.	MACHINE CAPACITY	Units	Size
а	Max. load on Chuck	Kg	Maximum 40
b	Machine weight nett	kg	1500 or higher
2.	SPINDLE		,
а	Maximum spindle speed	RPM	4000 or higher
b	Type of drive		AC servo spindle motor (digital)
С	Front Bearing Dia. (ID)	mm	60 or higher
3.	AXES		
a	X - axis Travel	mm	200 or higher
b	Z - axis Travel	mm	290 or higher
С	Rapid traverse - X	m/min	10/15 or higher
d	Minimum programmable command- X/ Z	mm	0.001
е	Programmable feed range - X, Z axes	mm/mi	10 - 10000
		n	
f	Type of drive		AC servo motor
g	Motor Torque - X axes	Nm	3 or higher
h	Motor torque - Z axis	Nm	6 or higher with brake
5.	ACCURACY as per ISO 230-2		
a	Positioning accuracy for X,Y & Z axes	mm	0.012
b	Repeatability for X,Y & Z axes	mm	±0.007
6.	CNC SYSTEM		
a	Control System	FANUC/	Siemens
b	Machine control panel	Feed rat	te, spindle speed override knob
С	MPG (Manual pulse generator)	On macl	hine operator panel
d	CNC Features	Tool Off	sets MDI
7.	COOLANT/LUBRICATION		
а	Coolant tank Capacity	Litres	100 or higher
b	Coolant pump motor	kW	0.25
С	Coolant pump output	lpm	20 or higher
8.	POWER SOURCE		
а	Mains supply (± 10 %)		415 V, 3 Ph., 50Hz
b	Total connected load requirement		Approx. 15 kVA
9.	STANDARD EQUIPMENT		
a	Voltage Stabilizer	15 kVA	
b	Backup CD for PLC Ladder Logic	1 no.	
С	Machine lightning	1 no.	
d	Levelling pads and jacking screws	4 nos.	

е	Operation manual	1	no.			
f	Maintenance manual		no.			
g	Installation kit	1	no.			
h	Maintenance tool kit	1	no.

	etc.,)					
m.	T Nuts, Strap clamps, Clamping Nuts and	1 set				
	studs					

1.	MACHINE CAPACITY	Units	Size
a	Table size	mm	500x250 or higher
b	Max. load on table	Kg	150 or higher
С	T slot dimension (N x W x P)	mm	3 x 14 x 100 or higher
d	Table height from floor	mm	800 ~ 900
е	Cast Iron grade for bed and saddle		Grade 25 or equivalent
f	Machine net weight	kg	1500 or higher
2.	SPINDLE		
а	Spindle nose		BT30 / BT40
b	Minimum distance (spindle nose to table)	mm	100 - 150
d	Maximum spindle speed	RPM	6000 or higher
е	Spindle power, continuous	kW	3.7 or higher
f	Type of drive		AC servo spindle motor (digital)
g	Spindle bearing class		P4
h	Front Bearing Dia. (ID)	mm	50 or higher
3.	AXES		
а	X - axis Travel	mm	300 or higher
b	Y - axis Travel	mm	250 or higher
С	Z - axis Travel	mm	250 or higher
d	Rapid traverse - X/Y/Z	m/min	20/20/20 or higher
е	Minimum programmable command- X/Y/ Z	mm	0.001
f	Programmable feed range - X, Y & Z axes	mm/min	10 - 10000
g	Type of drive		AC servo motor
h	Motor Torque - X & Y axes	Nm	3 or higher
i	Motor torque - Z axis	Nm	6 or higher with brake
j	Ball screw - X, Y & Z axes (diameter x pitch)	mm	25 x 10 or higher
k	Ball screw finish - X, Y & Z axes		Ground and hardened
	Ball screw class - X, Y & Z axes		Pre-loaded with C3 or better
m	Guideways - X, Y & Z axes		Antifriction linear motion guideway
n	Guideways size - X, Y & Z axes	mm	25 or higher
0	Guideway precision - X, Y, & Z axes		P Class
4.	AUTOMATIC TOOL CHANGER		
а	Number of tool pockets	Nos	8 or higher
b	Max tool diameter	mm	80 or higher

d	Tool shank type		BT30 / BT40
е	Tool weight max	kg	2.5 for BT30 / 6 for BT40
f	Tool length max	mm	100 ~150 for BT30 / 150~200 for BT40
g	Tool change time (chip to chip)	sec	5 or lower
h	Tool clamp & unclamp		Disc Spring & Hydro-Pneumatic
5.	ACCURACY as per ISO 230-2	1	· •
а	Positioning accuracy for X,Y & Z axes	mm	0.012
b	Repeatability for X,Y & Z axes	mm	±0.007
С	Geometrical Alignment		ISO 10791-Part 1
d	Accuracy of finish test piece		ISO 10791-Part 7
6.	CNC SYSTEM		
а	Control System	FANUC/S	iemens
b	Motors & Drives	Compatil	ole with CNC controllers as mentioned
		above	
С	System resolution	0.001 mr	n
d	Tool number display	On mach	ine operator panel
e	Machine control panel	Feed rate	e, spindle speed override knob
f	MPG (Manual pulse generator)	On mach	ine operator panel
g	CNC Features	Graphic S	Simulation, Programming help, Tool
		Offsets N	1DI,
		Absolute	/Incremental Positioning, Pitch error
		compens	ation
7.	COOLANT/LUBRICATION		
а	Coolant tank Capacity	Litres	100 or higher
b	Coolant pump motor	kW	0.37
С	Coolant pump output	lpm	20 or higher
d	Lubrication type		Automatic centralized lubrication
е	Lubrication tank capacity	Litres	3 or higher
8.	AIR COMPRESSOR FOR TOOL UNCLAW	1P	
а	Compressor Type		Screw type with dryer, filter & air receiver
b	Tank capacity	litres	200 or higher
С	Air Flow	CFM	10 or higher
d	Pressure	bar	7 max.
9.	POWER SOURCE	1	
а	Mains supply (± 10 %)		415 V, 3 Ph., 50Hz
b	Total connected load requirement		Approx. 15 kVA
	·	<u> </u>	
10.	STANDARD EQUIPMENT
