1. COURSE INFORMATION

During the one-year duration of “Welder (GMAW & GTAW)” trade, a candidate is trained on Professional Skill, Professional Knowledge, Engineering Drawing, Workshop Calculation & Science and Employability Skill related to job role. In addition to this, a candidate is entrusted to undertake project work, extracurricular activities and on-the-job training to build up confidence. The broad components covered under Professional Skill subject are as below:-

Trainee learns about elementary first aid, firefighting, environment regulation and housekeeping etc. Performs joining of MS sheet by Gas welding in different positions, Joins MS plates by SMAW in different positions, performs straight, bevel & circular cutting on MS plate by Oxy-acetylene cutting process. The trainee learns joining of different types of MS pipe by Gas welding (OAW), SMAW. The Trainee sets up GMAW/ GTAW plant and weld M.S, S.S and Aluminium sheets in all positions, performs Arc gauging on MS plate, joins MS/ Aluminium /SS sheets/plates by GMAW, GTAW & FCAW process in various positions using different modes of metal transfer. Cuts ferrous and non-ferrous metal using plasma Arc cutting. The trainee tests welded joint by visual inspection Dye penetrant & Magnetic particle testing methods.

Professional Knowledge subject is simultaneously taught in the same fashion to apply cognitive knowledge while executing task. In addition components like Physical properties of engineering materials, different types of iron, properties and uses. In addition to above components the core skills components viz., Workshop calculation & science, Engineering drawing, employability skills are also covered. These core skills are essential skills which are necessary to perform the job in any given situation.

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under the aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

Welder (GMAW & GTAW) trade under CTS is one of the courses delivered nationwide through network of ITIs. The course is of one year duration. It mainly consists of Domain area and Core area. In the Domain area (Trade Theory & Practical) imparts professional skills and knowledge, while Core area (Workshop Calculation science, Engineering Drawing and Employability Skills) imparts requisite core skills, knowledge and life skills. After passing out of the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Broadly candidates need to demonstrate that they are able to:

- Read & interpret technical parameters/document, plan and organize work processes, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional skill, knowledge, core skills & employability skills while performing jobs.
- Check the job/assembly as per drawing for functioning, identify and rectify errors in job/assembly.
- Document the technical parameters related to the task undertaken.

2.2 PROGRESSION PATHWAYS

- Can join industry as Technician and will progress further as Senior Technician, Supervisor and can rise up to the level of Manager.
- Can become Entrepreneur in the related field.
- Can take admission in diploma course in notified branches of Engineering by lateral entry.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).

- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable

2.3 COURSE STRUCTURE

Table below depicts the distribution of training hours across various course elements during a period of one year:-

| S No. | Course Element | Notional Training Hours |
|-------|---------------------------------------|-------------------------|
| 1 | Professional Skill (Trade Practical) | 1000 |
| 2 | Professional Knowledge (Trade Theory) | 280 |
| 3 | Workshop Calculation & Science | 80 |
| 4 | Engineering Drawing | 80 |
| 5 | Employability Skills | 160 |
| | Total | 1600 |

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

a) The **Continuous Assessment (Internal)** during the period of training will be done by **Formative assessment method** by testing for assessment criteria listed against learning outcomes. The training institute have to maintain individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in

b) The final assessment will be in the form of summative assessment. The All India Trade Test for awarding NTC will be conducted by Controller of examinations, DGT as per the guidelines. The pattern and marking structure is being notified by DGT from time to time. **The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The examiner during final examination will also check** the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects is 33%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

| Performance Level | Evidence |
|--|---|
| (a) Weightage in the range of 60%-75% to be allotted during assessment | |
| For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices | <ul style="list-style-type: none"> • Demonstration of good skill in the use of hand tools, machine tools and workshop equipment. • 60-70% accuracy achieved while undertaking different work with those demanded by the component/job. • A fairly good level of neatness and |

| | |
|---|--|
| | <p>consistency in the finish.</p> <ul style="list-style-type: none"> • Occasional support in completing the project/job. |
| <p>(b) Weightage in the range of 75%-90% to be allotted during assessment</p> | |
| <p>For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with little guidance, and regard for safety procedures and practices</p> | <ul style="list-style-type: none"> • Good skill levels in the use of hand tools, machine tools and workshop equipment. • 70-80% accuracy achieved while undertaking different work with those demanded by the component/job. • A good level of neatness and consistency in the finish. • Little support in completing the project/job. |
| <p>(c) Weightage in the range of more than 90% to be allotted during assessment</p> | |
| <p>For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.</p> | <ul style="list-style-type: none"> • High skill levels in the use of hand tools, machine tools and workshop equipment. • Above 80% accuracy achieved while undertaking different work with those demanded by the component/job. • A high level of neatness and consistency in the finish. • Minimal or no support in completing the project. |

Welder Gas; fuses metal parts together using welding rod and oxygen acetylene flame. Examines parts to be welded, cleans portion to be joined, holds them together by some suitable device and if necessary makes narrow groove to direct flow of molten metal to strengthen joint. Selects correct type and size of welding rod, nozzle etc. and tests welding, torch. Wears dark glasses and other protective devices while welding. Releases and regulates valves of oxygen and acetylene cylinders to control their flow into torch. Ignites torch and regulates flame gradually. Guides flame along joint and heats it to melting point, simultaneously melting welding rod and spreading molten metal along joint shape, size etc. and rectifies defects if any.

Welder Electric; fuses metals using arc-welding power source and electrodes. Examines parts to be welded, cleans them and sets joints together with clamps or any other suitable device. Starts welding power source and regulates current according to material and thickness of welding. Connect one lead to part to be welded, selects required type of electrode and clamps other lead to electrode holder. May join parts first at various points for holding at specified angles, shape, form and dimension by tack welding. Establish arc between electrode and joint and maintain it throughout the length of the joint.

Gas Cutter; cuts metal to require shape and size by gas flame either manually or by machine. Examines material to be cut and marks it according to instruction of specification. Makes necessary connections and fits required size of nozzle in welding torch. Releases and regulates flow of gas in nozzle, ignites and adjusts flame. Guides flame by hand or machine along cutting line at required speed and cuts metal to required size.

Welder (GMAW & GTAW) while doing Gas Tungsten Arc welding (GTAW) also known as Tungsten Inert Gas (TIG) welding reads fabrication drawing, examines parts to be welded, cleans them and sets joints with clamps or any other suitable device. Selects suitable tungsten electrode, grinds the edges and fit in to the GTA welding torch. Selects gas nozzle and fit in to the GTA welding torch. Selects suitable filler rods and cleans them. Connects work piece with earth cable, Connects the machine with Inert gas Cylinder, regulator and flow meter. Starts the constant current GTA welding machine, sets suitable welding current & polarity and inert gas flow. Establish arc through across a column of highly ionized inert gas between work piece and Tungsten electrode. Melts the metal and deposit weld beads on metal surfaces by passing the suitable filler rod in to the weld puddle. Joins Steel, Stainless steel & Aluminium sheets and Aluminium & SS tubes .

Welder (GMAW& GTAW) while doing Gas Metal Arc welding also known as MIG/MAG Welding, reads fabrication drawing, examines parts to be welded, cleans them and sets joints with clamps or any other suitable device. Connects work piece with earth cable. Connects the machine with suitable gas Cylinder, regulator and flow meter. Connects preheater when CO₂ is used as shielding gas. Selects suitable wire electrode, feed it to welding GMA Welding torch through wire feeder. Selects contact tip gas nozzle and fit in to the GMA welding torch. Preheats joints as required. Starts the Constant Voltage GMA welding machine, sets suitable welding

voltage & wire feed speed and shielding gas flow, produces arc between work piece and continuously fed wire electrode. Melts the metal and deposit weld beads on the surface of metals or joins metal pieces such as Steel, Stainless steel and aluminium metals. Also will do mixed shielding gas welding. May experience with tubular wire welding called Flux Cored Arc Welding (FCAW)

Plan and organize assigned work and detect & resolve issues during execution in his own work area within defined limit. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

5. LEARNING OUTCOME

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOMES (TRADE SPECIFIC)

1. Perform joining of MS sheet by Gas welding in different positions following safety precautions.
2. Join MS plates by SMAW in different positions.
3. Perform straight, bevel & circular cutting on MS plate by Oxy-acetylene cutting process.
4. Perform different types of MS pipe joints by Gas welding (OAW).
5. Weld different types of MS pipe joints by SMAW.
6. Setup GMAW / GTAW plant and weld M.S, S.S and Aluminium sheets in all positions.
7. Perform Arc gauging on MS plate.
8. Join MS/ Aluminium /SS sheets/plates by GMAW in various positions using different modes of metal transfer.
9. Use of mixed shielding gas for GMAW welding.
10. Welding of metals by FCAW process.
11. Join Aluminium & Stainless Steel sheets by GTAW in different position.
12. Weld pipe joints by GTAW.
13. Cut ferrous and nonferrous metal using plasma Arc cutting.
14. Test welded joint by visual inspection Dye penetrant & Magnetic particle testing methods.

6. ASSESSMENT CRITERIA

| LEARNING OUTCOMES | ASSESSMENT CRITERIA |
|--|--|
| 1. Perform joining of MS sheet by Gas welding in different positions following safety precautions. | Plan and select the nozzle size, working pressure type of flame, filler rod as per requirement. |
| | Prepare, set and tack the pieces as per drawing. |
| | Setting up the tacked joint in specific position. |
| | Deposit the weld following proper welding technique and safety aspect. |
| | Carry out visual inspection to ascertain quality weld joint. |
| 2. Join MS plates by SMAW in different positions. | Plan and select the type & size of electrode, welding current, type of edge preparation etc. as per requirement. |
| | Prepare, set and tack the pieces as per drawing. |
| | Set up the tacked pieces in specific position. |
| | Deposit the weld maintaining appropriate arc length, electrode angle, welding speed, weaving technique and safety aspects. |
| | Clean the welded joint thoroughly. |
| | Carry out visual inspection for appropriate weld joint. |
| | Inspect the weld using DPT/MPT. |
| 3. Perform straight, bevel & circular cutting on MS plate by Oxy-acetylene cutting process. | Plan and mark on MS plate surface for straight/bevel/circular cutting. |
| | Select the nozzle size and working pressure of gases as per requirement. |
| | Set the marked plate properly on cutting table. |
| | Perform the straight and bevel cutting operation maintaining proper techniques and all safety aspects. |
| | Perform the circular cutting operation by using profile cutting machine maintaining proper techniques and all safety aspects |
| | Clean the cutting burrs and inspect the cut surface for soundness of cutting. |
| 4. Perform different type of MS pipe joints by Gas welding (OAW). | Plan and prepare the development for a specific type of pipe joint. |
| | Mark and cut the MS pipe as per development. |
| | Select the size of filler rod, size of nozzle, working pressure etc. |
| | Set and tack the pieces as per drawing. |
| | Deposit the weld bead maintaining proper technique and safety aspects. |
| | Inspect the welded joint visually for poor penetration, uniformity |

| | |
|--|--|
| | of bead and surface defects. |
| 5. Weld different types of MS pipe joints by SMAW. | <p>Plan and prepare the development for a specific type of pipe joint.</p> <p>Mark and cut the MS pipe as per development.</p> <p>Select the electrode size and welding current for welding.</p> <p>Set and tack the pieces as per drawing.</p> <p>Deposit the weld bead maintaining proper technique and safety aspects.</p> <p>Inspect the welded joint visually for root penetration, uniformity of bead and surface defects.</p> |
| 6. Setup GMAW/ GTAW plant and weld M.S, S.S and Aluminium sheets in all positions. | <p>Select the welding machine, as per requirement.</p> <p>Connect the torch/welding gun to the machine.</p> <p>Connect the earth cable to the welding table.</p> <p>Set the welding current & Voltage.</p> <p>Set the wire feed rate.</p> <p>Set the gas flow rate.</p> |
| 7. Perform Arc gauging on MS plate. | <p>Plan and select the size of electrode for Arc gouging.</p> <p>Select the polarity and current as per requirement.</p> <p>Perform gouging adapting proper gouging technique.</p> <p>Clean and check to ascertain the required stock removed.</p> |
| 8. Join MS /Aluminium/SS sheets/plates by GMAW in various positions using different modes of metal transfer. | <p>Select size of electrode wire, welding voltage, gas flow rate, wire feed rate as per requirement.</p> <p>Prepare, set and tack the pieces as per drawing.</p> <p>Set up the tacked joint in specific position.</p> <p>Deposit the weld adapting proper welding technique and safety aspects.</p> <p>Carry out visual inspection to ensure quality of welded joint.</p> <p>Inspect the weld using Dye-penetration Test (DPT)/Magnetic particle Test (MPT).</p> |
| 9. Using of mixed shielding gas for GMAW welding. | <p>Select size of electrode wire, welding voltage, gas flow rate, wire feed rate as per requirement.</p> <p>Prepare, set and tack the pieces as per drawing.</p> <p>Set up the tacked joint in specific position.</p> <p>Deposit the weld adapting proper welding technique and safety aspects.</p> <p>Carry out visual inspection to ensure quality of welded joint.</p> <p>Inspect the weld using Dye-penetration (DPT)/Magnetic particle</p> |

| | |
|--|--|
| | Test (MPT). |
| 10. Welding of metals by FCAW process. | <p>Select size of electrode wire, welding voltage, gas flow rate, wire feed rate as per requirement.</p> <p>Prepare, set and tack the pieces as per drawing.</p> <p>Set up the tacked joint in specific position.</p> <p>Deposit the weld adapting technique and safety aspects.</p> <p>Carry out visual inspection to ensure quality of welded joint.</p> <p>Inspect the weld using Dye-penetration (DPT)/Magnetic particle Test (MPT).</p> |
| 11. Join Aluminium & Stainless Steel sheets by GTAW in different position. | <p>Select power source as per material, size and type of Tungsten electrode, welding current, gas nozzle size, gas flow rate and filler rod size as per requirement.</p> <p>Prepare, set and tack the pieces as per drawing.</p> <p>Set up the tacked joint in specific position.</p> <p>Deposit the weld by adapting proper welding technique and safety aspects.</p> <p>Carry out visual inspection to ensure quality of welded joint.</p> |
| 12. Weld pipe joints by GTAW. | <p>Plan and prepare development or edge preparation for specific type of pipe joint.</p> <p>Mark and cut the MS pipe as per development.</p> <p>Select the type of welding current, size and type of tungsten electrode, size of nozzle, gas flow rate and welding current as per requirement.</p> <p>Set and tack the piece as per drawing.</p> <p>Deposit the weld bead maintaining proper technique and safety aspects.</p> <p>Inspect the welded joint visually for root penetration, bead uniformity and surface defects.</p> |
| 13. Cut ferrous and nonferrous metal using plasma Arc cutting. | <p>Plan and mark on Ferrous/Non ferrous metal plates surface for plasma cutting.</p> <p>Select the torch/nozzle size, current and working pressure of gas as per requirement.</p> <p>Set the marked plate properly on cutting table.</p> <p>Perform the cutting operation by adapting proper techniques and safety aspects.</p> <p>Clean and inspect the cut surface for quality of cutting.</p> |

| | |
|---|---|
| 14. Test welded joint by visual inspection Dye penetrant & Magnetic particle testing methods. | Plan and select the job and clean the surface thoroughly. |
| | Select the appropriate testing methods. |
| | Perform testing of welded joints adapting standard operating procedure. |
| | Accept/reject the job based on test result. |
| | |

7. TRADE SYLLABUS

| SYLLABUS - WELDER (GMAW & GTAW) | | | |
|---|---|--|---|
| DURATION: ONE YEAR | | | |
| Duration | Reference Learning Outcome | Professional Skills (Trade Practical) With Indicative Hours | Professional Knowledge (Trade Theory) |
| Professional Skill 50 Hrs; Professional Knowledge 14 Hrs | Perform joining of MS sheet by Gas welding in different positions following safety precautions. | Induction training: 1. Familiarization with the Institute. (04 hrs) 2. Importance of trade Training. (04 hrs) 3. Machinery used in the trade. (04 hrs) 4. Introduction to safety equipment and their use etc. (03 hrs) 5. Hack sawing, filing square to dimensions. (06 hrs) 6. Marking out on MS plate and punching. (04 hrs) | <ul style="list-style-type: none"> - General discipline in the Institute - Elementary First Aid. - Importance of Welding in Industry - Safety precautions in Shielded Metal Arc Welding, and Oxy-Acetylene Welding and Cutting. (07 Hrs) |
| | | 7. Setting up of Arc welding machine & accessories and striking an arc. (10 hrs) 8. Setting of oxy-acetylene welding equipment, Lighting and setting of flame. (15 hrs) | <ul style="list-style-type: none"> - Introduction and definition of welding. - Arc and Gas Welding Equipments, tools and accessories. - Various Welding Processes and its applications. - Arc and Gas Welding terms and definitions. (07 Hrs) |
| Professional Skill 25 Hrs; Professional Knowledge 07 Hrs | Join MS plates by SMAW in different positions. | 9. Fusion run without and with filler rod on M.S. sheet 2 mm thick in flat position. (06 hrs) 10. Edge joint on MS sheet 2 mm thick in flat position without filler rod. (07 hrs) 11. Marking and straight line | <ul style="list-style-type: none"> - Different process of metal joining methods: Bolting, riveting, soldering, brazing, seaming etc. - Types of welding joints and its applications. Edge preparation and fit up for different thickness. |

| | | | |
|---|--|--|--|
| | | cutting of MS plate. 10 mm thick by gas. (12 hrs) | - Surface Cleaning(07 Hrs) |
| Professional Skill 200 Hrs; Professional Knowledge 56 Hrs | Perform straight, bevel & circular cutting on MS plate by Oxy-acetylene cutting process. | 12. Straight line beads on M.S. plate 10 mm thick in flat position. (10 hrs) | - Basic electricity applicable to arc welding and related electrical terms & definitions. - Heat and temperature and its terms related to welding - Principle of arc welding. And characteristics of arc. (07 Hrs) |
| | | 13. Weaved bead on M. S plate 10mm thick in flat position. (15 hrs) | |
| | | 14. Square butt joint on M.S. sheet 2 mm thick in flat Position. (10 hrs) | - Common gases used for welding & cutting, flame temperatures and uses. - Chemistry of oxy-acetylene flame. - Types of oxy-acetylene flames and uses. - Oxy-Acetylene Cutting Equipment principle, parameters and application. (07 Hrs) |
| | | 15. Fillet "T" joint on M. S. Plate 10 mm thick in flat position. (15 hrs) | |
| | | 16. Beveling of MS plates 10 mm thick. By gas cutting. (10 hrs) | - Arc welding power sources: Transformer, Motor Generator set, Rectifier and Inverter type welding machines and its care & maintenance. - Advantages and disadvantages of A.C. and D.C. welding machines. (07 Hrs) |
| 17. Open corner joint on MS sheet 2 mm thick in flat Position. (05 hrs) | | | |
| 18. Fillet lap joint on M.S. plate 10 mm thick in flat position. (10 hrs) | | | |
| 19. Circular gas cutting on MS plate 10 mm thick by profile cutting machine. (05 hrs) | - Welding positions as per EN & ASME: flat, horizontal, vertical and over head position. - Weld slope and rotation. - Welding symbols as per BIS | | |
| 20. Fillet "T" joint on M S she et 2 mm thick in flat position. (05 hrs) | | | |
| 21. Open Corner joint on MS | | | |

| | | | |
|--|--|---|--|
| | | <p>plate 10 mm thick in flat position. (04 hrs)</p> <p>22. Fillet Lap joint on MS sheet 2 mm thick in flat position. (06 hrs)</p> <p>23. | SYLLABUS FOR CORE SKILLS |
|--|
| 1. Workshop Calculation & Science (Common for one year courses) (80Hrs) |
| 2. Engineering Drawing (80Hrs) |
| 3. Employability Skills (Common for all CTS trades) (160Hrs) |

Learning outcomes, assessment criteria, syllabus and Tool List of Core Skills subjects which is common for a group of trades, provided separately in www.bharatskills.gov.in

| LIST OF TOOLS AND EQUIPMENT | | | |
|--|---|------------------------------|-----------------|
| WELDER (GMAW & GTAW) (For Batch of 20 Candidates) | | | |
| S No. | Name of the Tool & Equipment | Specification | Quantity |
| A. TRAINEES TOOLS KIT | | | |
| 1. | Welding helmet fibre | | 21(20+1) Nos. |
| 2. | Welding hand shield fibre | | 21(20+1) Nos. |
| 3. | Chipping Hammer with metal handle | 250 grams | 21(20+1) Nos. |
| 4. | Chisel cold flat | 19 mmx 150 mm | 21(20+1) Nos. |
| 5. | Centre punch | 9mm x 127 mm | 21(20+1) Nos. |
| 6. | Dividers | 200 mm | 21(20+1) Nos. |
| 7. | Stainless steel Rule | 300 mm | 21(20+1) Nos. |
| 8. | Scriber | 150 mm | 21(20+1) Nos. |
| 9. | Tongs flat | 350 mm | 21(20+1) Nos. |
| 10. | Hacksaw frame fixed | 300mm | 21(20+1) Nos. |
| 11. | File half round bastard | 300 mm | 21(20+1) Nos. |
| 12. | File flat | 350 mm bastard | 21(20+1) Nos. |
| 13. | Hammer ball peen | 1 Kg with handle | 21(20+1) Nos. |
| 14. | Try square | 6" | 21(20+1) Nos. |
| 15. | Tip Cleaner | | 21(20+1) Nos. |
| B. GENERAL MACHINERY SHOP OUTFIT | | | |
| 16. | Spindle key | | 4 Nos. |
| 17. | Screw Driver | 300mm blade and 250 mm blade | 1 each |
| 18. | Number punch | 6 mm | 2 set |
| 19. | Letter punch | 6 mm | 2 set |
| 20. | Magnifying glass | 100 mm. dia. | 2 Nos. |
| 21. | Universal Weld measuring gauge | | 2 Nos. |
| 22. | Earth clamp | 600A | 6 Nos. |
| 23. | Spanner D.E. | 6 mm to 32mm | 2 sets |
| 24. | C-Clamps | 10 cm and 15 cm | 2 each |
| 25. | Hammer sledge double faced 4 kg | | 1 No. |
| 26. | S.S tape 5 meters flexible in case | | 1 No. |
| 27. | Electrode holder | 600 amps | 6 Nos. |
| 28. | H.P. Welding torch | with 5 nozzles | 2 sets |
| 29. | Oxygen Gas Pressure regulator double stage | | 2 Nos. |
| 30. | Acetylene Gas Pressure regulator double stage | | 2 Nos. |
| 31. | CO ₂ Gas pressure regulator, with flow | | 2 set |

| | | | |
|--------------------------------|---|--|---------|
| | meter | | |
| 32. | Argon Gas pressure regulator with flow meter | | 2 set |
| 33. | Metal rack | 182 cm x 152 cm x 45 cm | 1 No. |
| 34. | First Aid box | | 1 No. |
| 35. | Steel lockers with 8 Pigeon holes | | 2 Nos. |
| 36. | Steel almirah / cupboard | | 2 Nos. |
| 37. | Black board and easel with stand | | 1 No. |
| 38. | Flash back arrester (torch mounted) | | 4 pairs |
| 39. | Flash back arrester (cylinder mounted) | | 4 pairs |
| C. GENERAL INSTALLATION | | | |
| 40. | Welding Transformer with all accessories | 400A , OCV 60 - 100 V, 60% duty cycle | 2 sets |
| 41. | Welding Transformer or Inverter based welding machine with all accessories | 300A , OCV 60 - 100 V, 60% duty cycle | 2 sets |
| 42. | D.C Arc welding rectifiers set with all accessories | 400 A. OCV 60 -100 V, 60% duty cycle | 1 sets |
| 43. | GMAW welding machine 400A capacity with air cooled torch, Regulator, Gas preheater, Gas hose and Standard accessories | | 2 set |
| 44. | AC/DC GTAW welding machine with water cooled torch, Argon regulator, Gas hose, water circulating system and standard accessories. | torch 300 A | 2 set |
| 45. | Air Plasma cutting equipment with all accessories, capacity to cut 25 mm clear cut | | 1 set |
| 46. | Air compressor suitable for air plasma cutting system | | 1 No. |
| 47. | Auto Darkening Welding Helmet | | 2 |
| 48. | Portable abrasive cut-off machine | | 1 No. |
| 49. | Pug cutting machine Capable of cutting Straight & Circular with all accessories | | 1 set |
| 50. | Pedestal grinder fitted with coarse and medium grain size grinding wheels | dia. 300 mm | 1 No. |
| 51. | Bench grinder fitted with fine grain size silicon carbide green grinding wheel | dia. 150 mm | 1 No. |
| 52. | AG 4 Grinder | | 2 Nos. |
| 53. | Suitable gas welding table with fire bricks | | 2 Nos. |
| 54. | Suitable Arc welding table with positioner | | 9 Nos. |
| 55. | Trolley for cylinder (H.P. Unit) | | 2 Nos. |
| 56. | Hand shearing machine capacity to cut 6 mm sheets and flats | | 1 No. |
| 57. | Power saw machine | 18" | 1 No. |
| 58. | Portable drilling machine | Cap. 6 mm | 1 No. |
| 59. | Oven, electrode drying | 0 to 250°C, 10 kg capacity | 1 No. |

| | | | |
|-----|---|--|-------------------|
| 60. | Work bench | 340x120x75 cm with 4 bench vices of 150 mm jaw opening | 5 sets |
| 61. | Oxy Acetylene Gas cutting blow pipe | | 2 sets |
| 62. | Oxygen, Acetylene Cylinders | | #2 each |
| 63. | CO2 cylinder | | #2 Nos. |
| 64. | Argon gas cylinder | | #2 Nos. |
| 65. | Anvil | 12 sq. inches working area with stand | 1 No. |
| 66. | Swage block | | 1 No. |
| 67. | Die penetrant testing kit | | 1 set |
| 68. | Magnetic particle testing Kit | | 1 set |
| 69. | Fire extinguishers (foam type and CO2 type) | | 1 No. |
| 70. | Fire buckets with stand | | 4 nos. |
| 71. | Suitable gas cutting table | | 1 No. |
| 72. | Welding Simulators for SMAW/GTAW/GMAW | | 1 each (Optional) |

D. LIST OF CONSUMABLE

| | | | |
|-----|--|-----------------------|--------------|
| 73. | Leather Hand Gloves | 14 " | 21 Pairs |
| 74. | Cotton hand gloves | 8 " | 21 pairs |
| 75. | Leather hand sleeves | 16 " | 21 pairs |
| 76. | Leg guards leather | | 21 pairs |
| 77. | Leather Apron | | 21 Nos. |
| 78. | Gas welding Goggles with filter glass | 3A or 4A DIN | 21 Nos. |
| 79. | Wire brush (M.S & SS) 5 rows and 3 rows | | 21 Nos. each |
| 80. | Spark lighter | | 6 Nos. |
| 81. | Safety boots for welders | | 21 pairs |
| 82. | Safety goggles with plain glass | | 21 Nos. |
| 83. | AG 4 Grinding wheels | | 10 nos. |
| 84. | Welding rubber hose, oxygen and acetylene 8 mm dia. As per BIS | | 30 mtr each |
| 85. | Rubber hose clips | | 20 nos. |
| 86. | Arc welding filter glasses DIN 9A 11 A & 13 A | 108 mm x 82 mm x 3 mm | 20 each |
| 87. | Plain glasses for helmets | 108 mm x 82 mm x 3 mm | 40 nos |

Note:

1. Internet facility is desired to be provided in the class room.
2. No additional items are required to be provided for unit or batch working in the Second shift except the items under trainee's tool kit and steel lockers.

The DGT sincerely acknowledges contributions of the Industries, State Directorates, Trade Experts, Domain Experts, trainers of ITIs, NSTIs, faculties from universities and all others who contributed in revising the curriculum.

Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

| List of Expert members participated in preparation of course curriculum of Welder (GMAW & GTAW) trade | | | |
